# Background

## **Method Of Discovery**

Name, Location, Phone Number

## **Summary of findings**

### **Background:**

Subject, Rush Copley Medical Center was founded approximately 130 years ago in Aurora, IL. Rush Copley Medical Center is a part of the "Rush academic health system," which includes Rush University Medical Center and Rush Oak Park Hospital. Please note that all social media accounts found for Rush Copley Medical Center are joint accounts with the previously mentioned group. It was found that the hospital CEO is Dr. Omar Lateef.

### **Employment:**

Per the company's website, they indicate the services offered at the Rush Copley Medical Center are; Aesthetic and Reconstructive Surgery, Cancer Care, Colon and Rectal Surgery, Emergency Service, Endocrinology, Gastroenterology, General Surgery, ENT Care, Heart Care, Hepatology, Lung Care, NICU, Obstetrics and Gynecology, Orthopedics, Pediatric Specialty Care, Physical Rehabilitation, Primary Care, Sports Medicine, Thoracic Surgery, Weight Loss services, and Vascular Surgery.

### **Social Media:**

Subject has Facebook, Instagram, Threads, X, YouTube, and LinkedIn accounts. A Facebook profile was found (rushcopley) that indicated it was used for just Rush Copley Medical Center updates; however, in 2022, they shared about joining the social media of the hospitals.

### **Prior to DOI:**

- 01/09/2019: News article about a child dying from the flu at Rush Copley Medical Center.
- 01/17/2019: News article about an assault that occurred at the emergency room of Rush Copley Medical Center.
- 03/03/2021: Post about RUSH listed on "...2021 list of Best Maternity Care Hospitals".
- 03/04/2021: Post about the "Rush Copley's radiation oncology program".
- 03/05/2021: Post about employee appreciation day.

### **On DOI:**

- 03/06/2021: Post about COVID-19 vaccines.

### **After DOI:**

- 03/08/2021: Post about International Women's Day.
- 04/24/2021: Post about medical laboratory.
- 05/13/2021: Post about "Rush Copley's High Risk Breast Clinic".
- 09/02/2021: Post giving, "...inside look at cardiac electrophysiology at Rush".
- 10/26/2021: Post about Rush physical therapists.
- 12/30/2021: Post about how the "Edward A. Brennan Entry Pavilion..." was transformed for COVID patients.
- 03/01/2022: Post about using AI in "colorectal cancer screenings".
- 04/22/2022: Promotional video for the Rush Copley Medical Group.
- 07/07/2022: Post about "Rush Copley recognized for commitment to high-quality stroke care".

- 10/28/2022: Post about the social media for the different hospitals being merged.
- 04/26/2023: Video shows the "behind the scenes" after getting blood drawn.
- 08/31/2023: Video of a procedure offered at RUSH.
- 04/26/2024: Post about "...the creation of RUSH MD Anderson Cancer Center....".
- 05/07/2024: Video shows "night in the life of an ER Nurse".
- 07/31/2024: Post showing a patient getting skin cancer removed.
- 08/01/2024: Video about Rush being ranked among the "Nation's Best".
- 11/15/2024: Video showing the RUSH MD Anderson Cancer Center at Rush Copley Medical Center.
- 12/10/2024: Post about the hospital receiving a donation.
- 12/27/2024: Interview of a physician; within the video, a procedure is seen.
- 01/09/2025: Posts indicate that RUSH Copley Medical Center is the "highest ranking... for Maternity Care".
- 03/28/2025: Doctors who work at Rush were interviewed
- 03/31/2025: Video shows robotic surgery tools
- 04/07/2025: Information video about measles

### **Findings:**

Prior to DOI, there were two news articles about incidents that occurred at Rush Copley Medical Center in 2019. The majority of content shared on Rush Copley Medical Center's social media is informing people about the services it offers, as well as showing different procedures. After DOI, on September 2nd, 2021, they shared multiple photos giving "...inside look at cardiac electrophysiology at Rush," which included photos while the procedure was occurring. On December 30th, 2021, a post was shared indicating they had transformed the "Edward A. Brennan Entry Pavilion..." to deal with the surge of COVID-19 patients. In July 2022, Subject shared that "Rush Copley recognized for commitment to high-quality stroke care." In the caption of this post, they indicated it was for the tenth consecutive year. Throughout 2023, there were multiple posts shared about the staff at RUSH, the procedures offered, and interviews with physicians. On April 26th, 2024, a post was made to LinkedIn announcing "...the creation of RUSH MD Anderson Cancer Center." A video shared on August 1st, 2024, indicates that Rush was ranked among the "nation's best," and the caption contains a quote from the president and CEO, Dr. Omar Lateef. On December 10th, 2024, a post was shared indicating that the hospital received a "\$10 million gift," which they will use for Alzheimer's dementia research. A post was shared that indicates that RUSH Copley Medical Center is the "highest ranking... for Maternity Care" in the U.S. News and World Report shared on January 9th, 2025. On March 28th, 2025, a video was shared on YouTube where physicians who work at Rush were interviewed to celebrate "Doctors' Day." On March 31st, 2025, a video was shared on Facebook showing robotic surgery tools and a physician using them.

In addition to the social media for Rush Copley Medical Center, Google reviews, GlassDoor reviews, and a Health Care Report Card have been included in the report. There were approximately 428 Google reviews left for Rush Copley Medical Center, leaving an overall star rating of 2.5 out of 5. The majority of the reviews discuss wait times for the ER and the level of care received. All of the reviews were not included in the report and were filtered to show the recent 1-star reviews. The GlassDoor reviews indicate that it received a 3.6 out of 5 star rating from previous and current employees, with the majority of the reviews mentioning management, staffing, and salary issues. Lastly, the Health Care Report Card from the state of Illinois indicates that Rush Copley Medical Center received a 73%, indicating that is the percentage of "patients that would definitely recommend Rush Copley Medical Center."

### **Property and Court Records:**

Public property records for the Requestor-provided address, 2000 Ogden Ave, Aurora, IL 60504, indicate that Copley Memorial Hospital INC c/o Jonathan Shedd, Controller, owns the property.

Public court records for "Rush Copley Medical Center" yielded 183 results, the date range of the records being from 2007 to March 2025. Within the court records, there are 8 wrongful death cases, 12 medical malpractice cases; the majority of the cases are arbitration to different monetary values.

## Girl, 3, dies from flu in Kane County, officials say

By [Michelle Gallardo](#)  Wednesday, January 9, 2019

 The media could not be loaded, either because the server or network failed or because the format is not supported.  
[Retry](#)

A 3-year-old girl died of the flu in Kane County.

KANE COUNTY, Ill. (WLS) -- A 3-year-old girl in Kane County died of the flu, the first death of the season health officials said Wednesday.

The Centers for Disease Control is now reporting a widespread presence of the flu virus in 24 states. At least 13 children have died as a result of the flu so far, though only one in Illinois.

-  Richard Roeper guest-co-hosts 'Windy City Weekend' 17 minutes ago
-  US stocks slide, Trump says tariff policy will 'never change'

The Kane County Health Department and Kane County Coroner confirmed Wednesday that death took place in Aurora. The victim, was a 3-year-old girl who died December 21 at Rush-Copley Medical Center.

She's the second child to have died from flu-related complications in Kane County over the last year. The first was 5-year-old Mia Lobo from Carpentersville.

"Before that we hadn't had one in several years. It is unusual and terribly sad when it happens," said Kane County Health Department Public Information Officer Tom Schlueter.

Schlueter said he did not know whether the 3-year-old had gotten a flu shot, but pointed to the CDC's guidelines on the issue.

"Younger children have not had the opportunity for their immune system to build up the resistance to most illnesses. That's one of the issues that we try to push. Everybody over the age of six months should get a flu vaccination," he said.

Medical experts admit the flu shot is not perfect. Some people may still get sick, but are unlikely to suffer complications that lead to hospitalization or death.

The flu shot takes two weeks to take full effect and should ideally be given as soon as it's available in the fall, but it's never too late to get it.

While the CDC says everyone over 6 months old should get the vaccine, they stress that it is children under 5, pregnant women, seniors and those with compromised immune systems who, if not vaccinated, are most at risk of contracting the disease and ending up with serious health complications as a result.

During the 2017-2018 flu season approximately 80 percent of children who died as a result of the flu had not been vaccinated.

In an effort to help everyone get vaccinated, Walmart will be giving low-cost flu shots at all their Chicago area stores Saturday from 10 a.m. to 2 p.m.

A woman has been charged after she was seen on cell phone video dragging a 5-year-old child by his hair through an Aurora hospital's emergency room.

AURORA, Ill. (WLS) -- A woman has been charged after she was seen on cell phone video dragging a 5-year-old child by his hair through an Aurora hospital's emergency room.

Tanye McNeal, of Aurora, is charged with three felony counts of aggravated battery and three misdemeanor counts of domestic battery.

US stocks slide, Trump says tariff policy will 'never change'

The charges stem from an incident that occurred Monday inside the emergency room at Rush Copley Medical Center around 4:40 p.m.

A 28-year-old Wisconsin woman filmed McNeal allegedly dragging the child by his hair and then alerted police. Prior to the dragging that was captured on video, McNeal also allegedly held the child down in a chair while pinching his neck and causing bruises, according to Aurora police.

The 5-year-old victim and another 2-year-old boy, both of whom are related to McNeal, went to stay with a relative Monday evening, police said. Police did not specify how the children were related to McNeal.

McNeal was arrested Wednesday. She was due to appear in bond court Thursday.

 **Bonnie Ewald**  
Copley has a midwifery group - while not named in this piece, I'm sure they are a big driver in this success. I wish this care were available as part of maternity offerings at the main campus. Midwives are part of enabling improved outcomes for all patients we serve!

I Love Rush Copley They are the best .It is always clean & very helpful. I will not go anywhere else. Every one does there job perfect. Congratulations. They are all awesome.

4y Like Reply  

 **Amanda Mullen**  
Rush is awesome and is the best hospital there is in Illinois!! Congratulations to them on being the top most highly rated nurses in the obstetrics, gynecology, and perinatology (maternal-fetal health) departments!!

So grateful to Michelle, Megan, Matthew, Dakota and the entire ICU health team that so lovingly cared for my dad, Tom Davis, while he battled Covid. You so kindly received our daily calls for updates and walked us through the ups and downs of his days. Though his stay was short you made an indelible mark on our hearts. Thank you for all you do! XO

 Shaw Karl   
rush copley medical center specifically have rip off pricing agreement and charges customer 3 times to what other private practice charge. Took a hit twice in same week and never going to visit rush copley medical at Montgomery. When contacted billing they said this is what it is. \$40 from private doctor for a test Vs \$130 at rush because they ask you to check in, confirm the ID, someone walk with you , there is a greeter and they make this so called 5 star. Shameful [...](#)

Video shows robotic surgery tools Caption: If you were an avid gamer as a kid, studies show you might have an advantage in the operating room using tools like the da Vinci Xi robot. Henry Govekar, MD, demonstrates how the tiny, wrist-like instruments and 3D imaging allow for smaller incisions, faster recovery times and improved surgical outcomes. **Certified Medical Assistant Interview**

 Anonymous Interview Candidate

② Aurora, IL

 No offer  Positive experience  Easy interview

**Application**

I applied online. The process took 2 weeks. I interviewed at Rush-Copley Medical Center (Aurora, IL) in Jan 2025

**Interview**

Did a phone interview. Then asked to do an in person interview. After that I had to wait until I got a phone call or looked on the portal to see if I got the job.

**Interview questions [1]**

Question 1

Why should I hire you?

discharge care. Get a phone 8 hours after discharge about some concerns in her chest Xray. Mind you 8 hours later after discharge. I use to like Copley but over the years I learned that the service gets worse and worse. This hospital is not for children services. No choice to go to Rush due to all my daughter's specialist at Rush.

This review is for an ER visit I had on 3/01/2024 6:42am with CHRISTOPHER HWANG, MD. I'm so disappointed and quite honestly sad the way my situation was handled. I went in for chest pain and shortness of breath. I waited for 5 hours to be seen (which is standard for ER visits). When CHRISTOPHER HWANG walked in the room he was extremely annoyed and rude. He asked me why I was in the ER and after explaining to him he proceeded to say "that all of my test were normal and that it was all mental" The level of compassion that man had towards me and my situation was non existent. I was glad there was nothing medically wrong with me but sad at how I was treated and I shed some tears. After that his attitude change and all of a sudden he was listening to me and kindnesses came out of no where. He asked more questions and then determined it was something medical and said he was going to prescribe me medication. When he walked away from the room my husband and I left.

CHRISTOPHER HWANG, I hope you read this and I hope they bring this up to his attention and advise him to work on his poor bedside manners and his intentionally mean-spirited behavior while interacting with patients. He knows exactly what I'm talking about. Compasión and kindness goes a long way and that's something you don't learn in medical school. You either have or you don't.

As a patient I would encourage you to consider another hospital if you can unless you want to be treated poorly. I'm thankful for all the medical staff in general and I know there are so many caring and genuinely good doctors.

I had a terrible experience there in 2018. I haven't talked about it much. I was in for a colon resection. I got pneumonia and was very sick and in a lot of pain. I was in for 9 days when it was decided they had to discharge me. There was a blizzard outside. I begged them to wait until the next day and they refused and said they would drop me at a homeless shelter if someone wouldn't pick me up. My 16 year old daughter, new driver, had to drive 2 1/2 hours in the dark, in that blizzard to pick me up.

Look all hospitals get busy but I'm literally here with my mom who couldn't breathe an hour and a half ago. And they are saying 8 plus hours wait time. I would think her literally not being able to breathe would trump most others coming in but guess not. If you need immediate care you best hope that the emergency room is empty.

My husband was admitted here for 10 days he has a trache and Gtube he was admitted for pneumonia and is incontinent.

His Gtube dressing was never changed for 10 days.

He has bed sores

And a level 4 rash on his butt and private area upon admission he did not have any of these problems the hospital didn't have him on any depends and just let him go all over himself I know the nurses seem this rash because I noticed it as soon as he got home he's been in so much pain and this is sickening I am reaching out to corporate as we speak because my husband was also returned home w a black eye.

I have reached out to the charge nurse and he basically did he don't care how do you report a hospital to the state for investigation??

So, you know a clown college? Well, this is the hospital version of that. I don't know where they found their staff... Craigslist maybe... Doctors, nurses and techs are completely incompetent. She was brought in by ambulance for passing out and seizing (she has never had a seizure before this). While the ER my wife had a

pretty aggressive seizure right in front of me and multiple nurses (whom confirmed what happened) but the doctor, who was not present, wasn't convinced that she had one and didn't document it. She takes a few medications (ones that you can't just stop taking) and by morning number two in the hospital they haven't given her any of them! I'm furious about the lack of care, knowledge and professionalism at this hospital. I cannot believe that this place is even permitted to serve the community... one doctor had an intelligent contribution but other than that it seems like it's everyone's first day on the job. That's putting it nicely... complete incompetence.

this hospital has the worst emergency room ive ever seen, extremely unorganized, 7 hour wait, i literally left and went to Mercy, never coming back. This hospital doesnt value your "Emergency". i saw plenty of people with situations that were obviously less severe go in and out in 2 hours max, do not recommend to anyone !! (Oh, Don't forget they'll charge you like gave you 5 star services in less than 30 minutes!)

I am very disappointed at Rush Copley, I was very serious about applying here, yet who would want to represent a hospital with this type of services. This is not the first time I go to rush copley with nurses or front desk people at ER department with an attitude, I understand that it is a stressful/busy department but at least show some professionalism and compassion. I took my son to the ER yesterday around 1pm. Standing waiting for the receptionist to finish with the phone call, and I see her talking on the phone with an attitude, she rolled her eyes and hung up the phone, she turns around, says something to the security guy and both giggle, it looked like she hung up on someone. I then stated that I wanted to register my son. She continues again with an attitude stating "just to let you know there's a 3hr wait, do you want to check him in or not". I left right away. Rush Copley needs to work on customer service.

This is an atrocious place for primary care. Healthcare doesn't actually appear to be within their vocabulary. Their Billing department is a disaster, their understanding and willingness to help with insurance coverage and benefits is non-existent, unless you get one or two of the kind hearted and actually competent people who work there. But that's a long shot. Primary care is non-existent, though gynecologic care is decent. But it's not worth a try. Go elsewhere immediately. Switch immediately. This hospital doesn't deserve the benefit of the doubt. And you deserve better.

Worst Emergency Room Ever - Rush Copley Aurora!! Arrived at 10:15 AM refused unnecessary imaging testing at 5:03PM. Never got any relief the whole 7 hrs while I was there. Heading to another ER. This place is ludicrous and by far the last ER you should ever go to for an emergency. The reviews are  true about how they have people waiting over 8 hours for an emergency! Take heed.

Unless you are dying, request that the paramedics take you to another hospital. The ER was so filthy, especially the bathroom, I wonder if they spread more disease than they treat.

Staff is SLOW to respond to call buttons, average response time is between 15 and 20 minutes. And this was despite a large number of staff and what looked to be a relatively low number of patients. Staff does not tell you anything about your treatment or what is going on. They all walk around with sour frowns giving you the impression they hate their jobs.

Hospital would be well advised to thoroughly clean the patient rooms and bathrooms, then figure out why staff doesn't want to be there.

Someone needs to train staff on how to insert an IV too. This is basic medicine and they can't get it right. The amount of blood on my son's arm as they bungled their way through getting a needle in his vein was horrible. I seriously feel like we should not have to pay the bill as these people all acted like they were in training.

I had a terrible experience after I delivered my baby in December. We were completely neglected, my husband had to go find a nurse every time we needed help. Lactation consultant never showed up. When I needed sheets changed because I was sitting in a pool of blood, they just came and dropped them off and left me to do myself just hours after giving birth. They never restocked anything. The nurses had a poor work ethic and were rude. I eventually signed a AMA to leave so I could seek care somewhere else.

For every good experience with a staff member there are 3 bad ones. I was not able to sit with my dad during surgery because the nurse said no, visiting hours don't start until 9am. I looked it up on the website later because we were told the night before I would be able to sit in and the website clearly said 2 family members are allowed to sit in during surgery. It was too late by that time, but is it really a lot to ask of the staff to stay current on the hospitals visiting policies? It literally takes 1 minute to ask or look up the informations before you get rude with a patients family member and misinform them about being able to see their dad (on father's day too). It's not as important to you (staff members) but really important for your patients who sit alone all day and patients family members who worry because they're not allowed to be with them.

Update: I was given a number to talk to Carlos who is a case manager, but none of my voicemails or calls were returned by him.

Your cafeteria staff is awful. My wife is in labor and my mother-in-law decided to come downstairs to get some food. While I understand the cafeteria is closed between 10-11 am, the staff was incredibly rude. Their tone of voice and lack of care is horrendous. All we wanted were some options or direction as to where to find food. They even took their time coming to the

find food. They even took their time coming to the register and looked visibly displeased with our presence. Do better. Northwestern has better service, the only reason we're here is before of our care plan for my wife.

Horrible place. Dirty. Waited for hours. Was sent home. Returned 6 hours later. Had to pay copay again. Was seen on a gurney in the hallway. Was sent home again. Had surgery the next day at different hospital for bowel obstruction. Billing department sucks. Uncooperative and rude. Talk over you while you're speaking and won't listen.

The reason the wait time is so long, is because they have ER beds occupied for COVID positive patients with NO symptoms and they don't release for a minimum of 5 days. They let these patients just sit there for 5 full days in the ER bed. Zero stars would be more fitting. Any intelligent person would know this is ER and place them more appropriately.

Yesturday my mom met me and my husband at the rush Copley hospital for me to get an x ray on my right wrist. The experience that we noticed was the lady at the outpatient center desk was very rude. Upon entering there was no instructions to get a visitors pass, no one stopped us to tell us to stop at the main entrance desk to get scanned. No one was wearing masks during my visit, the hospitals floors were dirty seemed that haven't been touched. Anyhow , the x ray nurse who took care of me was very nice and polite and telling what she was going to do.

If I could give 0 stars, I would. Ridiculous 6-8 hour wait in the emergency room! Never have I ever waited so long to see a Doctor. Took my mother due to chest pain and breathing problems and there was no urgency whatsoever. The attendants and even the nurses are rude. If possible go to Edward Hospital in Naperville! Get you in and out within an hour!

My primary care in the middle of my appointment "annual exam" mentioned that she needs to continue the exam another time as her next patient arrived and she left me without finishing my exam or hearing my medical concerns, knowing that I'm her first time patient and arrived on time. Now they billed my insurance for my annual for nothing?! That next visit she asked me to schedule is going to be paid as a regular visit not annual!! I contacted the office to submit a complaint and no one got back to me, it's been 3 weeks!! Worse CS and doctor!

A Spanish or dark skin nurse Refusing to care for 5 month baby. I will not come here again. But the receptionist was really nice and sweet and understanding. I had been over exhausted and I understand but I needed my mother there to help make decisions for my infant because I wasn't capable. I dropped my bags in frustration and this nurse turned around and said "I don't need to take you in I don't have to do anything, you will not talk to me like that" I asked her to find someone who would she refused and had for security guards on me and my mother. who are both now crying hysterically because a hospital is refusing to take care of my infant who's had a bad UTI and fever all day. That nurse needs to be fired. The only reason my daughter got treated was the lovely receptionist in front who has a child of her own and she was understanding and was able to get the head nurse who was able to help us out

Went to the ER at 4 am, I have anxiety issues and am 16 and was sent alone on an ambulance. The nurse had me go into the public waiting room and wait with no shoes/socks on and wearing little to nothing because I went in on an ambulance. The nurse wouldn't take me seriously because she thought I was just having a panic attack. When I tried explaining that I have health issues she would cut me off and say it's due to my anxiety. After an hour of waiting I finally got into a room to find out it wasn't anxiety but dehydration. It was extremely frustrating since the nurse would flat out refuse to listen to me. The nurse was extremely rude and unprofessional. Before I got admitted to a room, she was telling me that the reason my health issues are not solved/diagnosed was because it was just anxiety. Absolutely disrespectful and unhelpful.

I'm very disappointed in Rush overall especially the Aurora team. I've had horrible stomach pain for over a year and they finally figured out... I hope... the issue is my gallbladder. I had to last make an appointment just to talk to the surgeon for him to say let's make another appointment to have your gallbladder tested again. Got it tested again and I had to call and email just to get feedback on what the results meant and my next steps. When I did get someone on the phone they said we need to now make another appointment so you can go over the results with the surgeon because "he is recommending next to take your gallbladder out." Made ANOTHER appointment which the earliest was a week away just for them to call me the day off an hour before my appointment and say "we have to reschedule because he will be in surgery". I make ANOTHER appointment just for him to NOT call at my appointment time because this appointment is a "video/call" appointment and I was waiting for an hour for the call just for him to finally get on the phone to say "next step is to schedule your gallbladder to be removed" AND THAT WAS ALL. NOW my appointment for removal is not until May 18th!!!! I could have scheduled this a LONG TIME AGO THE MOMENT MY RESULTS CAME IN!! NOW I'm sitting at Rush Oak Park in the ER because my pain is so bad... I don't see me making it until May 18th. After this is all done I am DONE WITH RUSH! My primary is at the newer location on Michigan Ave and we have to pay for parking now so this entire situation is the cherry on top!

If you have mychart and your results (radiology, pathology and labs) aren't available immediately after they are interpreted and signed off by the radiologist or pathologist - this is a violation of the "cures act" Federal law as of 4/2021.

You DO NOT need your ordering physician to release them before you can review them.

This hospital does not follow the mandated cures act rule and can be heavily fined for this violation.

Rush Copley CEO - fix this glitch immediately!

I've experienced this violation 2 times in the past 3 months.

Cancer Center at Rush Copley Hospital  
Hasn't gotten enough Oncologist on staff , I started my treatments with no supervision yet at anytime I would message the Oncologist about side effects, was told too give it more time

As time has gone by I have been neglected by that Oncologist since he told me that my cancer was less of the worst of my type Omg 😭

Everything I have put on here has been altered too protect this Center from the poor care of the only Oncologist that they had too treat me! I feel like this center needs a revamped of staff I give no rating

My husband just got a \$7,000 bill for one CT scan (\$5,000 after "insurance," even though we have a \$2500 deductible, so this wasn't likely submitted to insurance at all). He had already paid them \$3,000 for an MRI. What are these prices? The "high" price for a CT scan in this area is \$1800. This is ridiculous and predatory. Similarly, I've had to pay over \$1,000 for my mammograms, with insurance. Additionally, my doctor was extremely rude and condescending (I have anxiety about health), so I haven't been there in 3 years.

My husband had also been referred by his doctor (McAfee) to a few other area specialists for a specific test. None of the specialists he was referred to even did the test. When he attempted to contact the doctor, she never responded to him. When he found providers on his own, they needed referrals from his doctor at Rush. The office failed to fax the referrals three time, so my husband had to go pick them up and drive them to the specialists himself. The doctor never once replied to him on MyChart or phone. He did speak to a nurse who was extremely rude to him, immediately prior to going

to hand deliver his own referrals. I have a physical scheduled for 5/28 and am cancelling it as soon as I hit "submit" on this review. I do not recommend this hospital or its physicians at all, and they charge exorbitant prices for services that are a fraction of the cost elsewhere, and won't tell you the cost prior to the procedures. Disgusting.

My loved one ended up in a behavioral unit that was atrocious at best because of the actions taken by the ER staff. I firmly believe that because of the actions and treatment of the ER staff my loved one will not admit when they need help the next time. I do not recommend that you go to this hospital.

BEWARE! Bill for services not rendered then refuse to fix! Called billing multiple times talking with many people including managers (the one's that answered anyway. All others never called back about messages left. Completely unprofessional). All told me to just pay it and refused to fix their mess up or just plain lied through their teeth about the bill. Treated very poorly. All they care about is money not your care. They have now sent that bill to collections so I now have those parasites harassing me. Huge ethical issue! Corrupt and Shady. Sad I loved my doctor. Worse they lost 5 other patients because of this but guarantee they don't care

Terrible, frustrating and disappointing experience at this hospital. I hope my family never has to deal with them again. Doctors, nurses, PT/OT, etc. do not communicate with one another. We had to ask for nurse

communicate with one another. we had to ask for nurse help, ask for meals, blankets, basic care. We were promised doctors visits or special tests would be done. After waiting overnight with no answers and having to inquire again, visits or tests were finally done. The only good review I can give is that the nurses aides were friendly, helpful and treated my family with respect and patience.

2 hour wait at 2am in the ER. You'd think they'd give a 4 week old baby with breathing/choking/congestion issues a little bit more priority but because he wasn't having an episode right at that moment they had us exposed to several other sick people in the waiting room. When we finally got back all they did was check his breathing and an X-ray and sent us on our way. Diagnosed with rhinovirus and that was that. Baby ended up in UC a few days later for same issue and they suctioned out A LOT to clear his breathing. The ER could have easily done this and saved my baby several days of suffering but they didn't.

Time and time again the emergency room is an absolute disaster. Every time I've gone there for myself, my wife, or my 1yo child the wait times are well over 3hrs. I just went there this evening due to my child having a 104 degree fever. We were called back to do a prescreen, where the temperature was verified, and Tylenol was given, and then returned to the lobby. The next couple that arrived was told it would be at least 3hrs. I waited about 45 minutes, and approached the counter as my daughter was shaking uncontrollably,

and burning up, and asked about how long it would be (my daughter was obviously sick); they advised they couldn't give an accurate timeframe. There were three others waiting. How do you not have the ability to forecast a timeframe? Anyways, I pulled up Edward Medical Groups ER wait times, because they magically have that technology, and neither the Naperville Hospital location, nor the ER in Plainfield had any wait times. Needless to say I told the front desk to remove me from their list and hightailed it over to Naperville. 1.) Edward Hospital is and always has been nicer, 2.) the staff is far kinder, 3.) there's hardly ever a wait and the staff is far more quick to provide medical treatment if there happens to be a wait. I will never, unless I have no other choice (i.e. unconscious arriving by ambulance), be returning to Rush Copley. I will always go to Edward if the option is available. I better not receive a bill for one dose of Tylenol.

Went to Rush & 1:15am short of breath, bad cough and wheeze and rattle in my chest.. had a chest X-ray by 1:40 am was told when a bed would come available they would call my name once the doctor read the image I would be informed.. I sat in the ER lobby until 4:40 am finally I said if I'm going to die negligent let me die at home so I left. I have never had such a long wait period. So now I'm home still wheezing and can't sleep.. not knowing what to do next. I will never go to this hospital again

My mother was brought in by ambulance for stroke symptoms. One would think this type of thing is a priority. They sat her in the waiting room. Finally they put her in triage and there we sat again. They drew some blood and took a CT scan and nothing for 3 hours. They then wheeled her into the ER where she saw a nice enough doctor, but the doctor left and then nothing. It is going on 3 hours again and not a word. Meanwhile her head is in pain from the stroke and they offer nothing for that after advising or her pain several times. This is still on-going. They are the worst. The doctor told her she had migraine and told her the symptoms of waking up with a splitting headache, texting strange unrecognizable sentences when she was trying to text something else, and slurred speech before entering the hospital were not signs of a stroke.

Well she went to see her regular doctor a week later at Edward/Elmhurst and they couldn't believe what the emergency room doctor told her. Her symptoms were indeed signs of a mini stroke or TIA and she did suffer from another TIA. Now she is following up with real doctors and neurologists. This emergency room doctor should not be practicing medicine.

They even went so far as to suggest to my mother that her last TIA a year ago may not have been a TIA at all when her primary care physician and neurologists diagnosed it as such. This type of care is potentially quite serious and dangerous.

I have never experienced such a horrible hospital before. I don't even want to discuss the bill I received which is another issue. Let alone the er waiting room is VERY DIRTY. There was spiders and crumbs on the floor. they do their pre check in and then tell you "wait

in the waiting room." No updates or nothing just simply wait. When I did the rude front lady could she tell me what I was waiting on she told me "no i dont see updates i dont know anything." Should have learned the first time i went, I WILL NOT BE BACK! For er purposes. They will leave you in the waiting room to die literally. Hopefully I can find another hospital to delivery my baby because this place is horrible

Went to the emergency room to get surgery. Nurses and doctors were so quick to kick me out after I told them I still feel pain. They're response is "you have to go home today" and I was there the day of surgery and they were already kicking me out less than 24 hrs later! I was asking for help getting out of bed and they act like i was asking for their life! Very stuck up nurses with bad attitudes. NOT to mention they were giving me medication as I kept asking what it was for and they act like they it was too much info they were giving me? WILL NEVER GO BACK JUST TO BE TREATED LIKE LESS OF A HUMAN!

Well after charging me 30,000 for a 45 minute ankle surgery i woke up from surgery, i asked for something to eat after billing me for \$30,000 i figured i was entitled to it. They told me i "had to go down to the cafeteria to get something" fresh out of surgery, within 30 minutes of waking up they were just about literally pushing me out the door, when i got home i was still so doped up from the General anesthesia i fell on my leg they just did surgery on. Needless to say i understand a hospital is a business but for \$30,000 i think i should

get a 4 dollar lunch and should be able to stay a couple of hours to recover before they are shoving me out the door. I had a similar experience when my daughter was born at this hospital just very shitty care. Edwards hospital, Central DuPage and Hines are superior in this area. The Rush hospital system just sucks period.

I guess vomiting blood and stomach pain so bad I can't walk isn't considered severe enough to be seen right away. Been in the er for 2 hours now. Pain getting worse and vomiting not stopping. Still not urgent enough to see me. And they put me back in the waiting room with either people and have me a bag to vomit in. It's funny. We can't go to work if we have vomiting or diarrhea but the hospitals can throw us back into the waiting room piled on top of eachother even though there's been vomiting and that's ok

Just moved to Aurora from another state. Have a long health history of blood clots, seizures and what not. Went into the ER for a terrible headache, face pain, dizziness and numbness. 1. they ignored my health history and issues. offered me a headache cocktail and I told them they wont work since I have had numerous in the past, just want to make sure nothing major is happening. They immediately started telling me they cant offer me any stronger medicine. Like what? I don't want medicine, I want to be sure this headache, numbness and swelling isn't something bad happening. I left. Imbeciles. I will never go here again.

\*\*It has not gone unnoticed that Rush Copley has responded to every other review, albeit a canned response, except mine. I suspect this is purposeful, as they don't know how to react to a review written by the widow of a patient who passed while in their care. This is hands down the worst hospital! My husband collapsed at home and was unconscious on 12/8/24. He was regrettably taken by ambulance to RCMC ER as it was less than 2 miles from our home. He was admitted to their CDU as an outpatient early on the 9th, where he received the most horrendous care, other than a wonderful nurse named Greg who took the time to listen. Dr. Siddiq could find nothing wrong with my husband, despite him being unable to swallow or walk safely. He was released to home on the 9th. On the 10th, my husband's condition worsened and we had to return to the ER with assistance from the Oswego Police Department, as he was still unable to ambulate safely. We spent nearly 24 hours between the waiting and holding areas of the ER before finally being admitted, against Dr. Shah's wishes. Dr. Shah was extremely rude, disrespectful and spoke to my husband and myself with complete disdain and lack of compassion. He should not be allowed to work at any hospital, much less in an ER where people come in at their most vulnerable.

My husband passed away at RCMC on Christmas Eve. During his 2 week stay the only positive things I can mention are most of the nurses on both the Orthopedic Unit and in the ICA were kind and compassionate. I did find the units to be obviously understaffed, as most times when my husband needed assistance from a nurse it took at least 2 tries of the call button (approximately 7-10 minutes apart).

However, there was a particular nurse Alex in the ICA who I question his true ability to have earned his nursing license. Rather than call my husband by his name, which was clearly printed on the board in his room, he referred to him as 'gentleman'. He

demonstrated no compassion, empathy or kindness during the few times I saw him the 2 days in his care (12/19-12/20). As a matter of fact, many times the nurses could be heard laughing loudly at the nurses station, while I heard a patient in a nearby room yelling for help repeatedly. At one point my husband was in obvious distress and I pointed this out to Alex, who did nothing. After a few hours of observing my husband's pain and agitation, Alex took the time to check his catheter and noticed that it had become pinched and was not releasing the urine, causing my husband immeasurable and preventable pain and distress. Once the problem was fixed, my husband was more comfortable. But it took several hours. Disgusting! In addition, while I was arranging to put my husband into hospice in Rush Copley, I was told they would have to move him to another facility as they needed the bed space. Needless to say as I came in and out of the ICA for several days, there were plenty of empty rooms. Last, but not least, the monitors were removed from my husband sometime Monday the 23rd of December. Why? I'm not certain. However, it obviously made it impossible for staff to know when my husband took his last breath. Sadly, my daughter went to visit him at 8:30 a.m. Christmas Eve and found him in his room unresponsive. That's right, my daughter found her father passed away before nursing staff had any idea. She will have to live with that. Shame on Rush Copley Medical Center. My husband of 40 years was treated poorly by most of the doctors he came into contact with. He was treated as a number, not as a human. I will make it my personal mission to make sure everybody knows the pathetic and substandard level of care provided by Rush Copley.

I am a healthcare worker and so is my husband. The staff treated me horrible in the ER. I had surgery the prior day at a different hospital. My stent moved and I was left vomiting and bleeding in your lobby. No nurses treated to me. I was treated like a drug addict. I later walked out of the emergency room to go back to the original hospital I originally had surgery at. I was taking care of any immediately put into a room. For emergency surgery. Rush hospital neglect their patients. I have bumped into other staff that have worked there and they have said this place is incredibly racist. Then they proceeded to have their incredibly rude staff. Harass me over a \$20 bill. This place should be shut down. Beautiful building waste of space. I would never work here I would never tell my nurse friends or doctors to work here as well.

I am presently at Rush Copley hospital's ER, where my mother was ambulanced in. The heart monitor's persistent alerts prompted me to call for nursing assistance, but none arrived. The condition of the facilities was subpar, including a women's restroom with paper towels on the floor and an overflowing trash can. The nurses' lack of attention to my mother's needs was concerning. As a former employee, I've seen a significant decline in cleanliness standards. This experience does not inspire confidence in recommending this hospital.

Just very disappointing and frustrating that every time I go to Rush Copley Emergency Room, my experience is a negative one. The check in staff is rude, the wait time is outrageously long no matter what your pain level is or condition. Waited over an hour before my son got triaged, just to wait another 2 hours with no communication about wait times no room available to see a Dr. My son just sits there in pain, doubled over. When I asked the front desk if there was any information on how much longer the wait could be, the blunt response was, "I don't know," and that was the end of the conversation. This particular time, with my son being in so much pain, we decided it was best to leave because there was no near end to our wait time. The waiting room was so crowded with a line out the door of more patients at one point. At this point we will have to go to a different emergency room and that's so frustrating. I never have this experience at other hospitals. It's a shame that it's the closest one to us.

Dr McGivney operated fusion surgery on my lower back in July 2024. Since then I have not been able to do anything, pain getting worse and worse and he is not answering any questions regarding the pain I have. He did not take any responsibility for what he did, in middle of recovery in few months after surgery He discharged me, and his nurses just push me to go to pain management clinic to be on narcotic medication. I went to see another doctor to get second opinion and found out Dr McGivney's surgery had been failed and he keeps ignoring and not doing anything to make me better and he denies doing another surgery to fix a mess he created. My pain is increasing every day and I can't do any activity or work and I'm losing everything I have in my life because of this unprofessional behavior Dr. Not recommended this doctor or Rush Hospital at all.

My elderly mother was treated with no dignity or compassion by ER nurses and ER Doctor. MRI techs jolted her from one bed to another causing her neck, and back pain and a headache. She has dementia and

was very confused why they had hurt her and they showed no compassion nor offered an apology when I said to be more careful. If you must go here, keep a watchful eye on your loved ones and don't go alone.

If I could give zero stars, I definitely would have! For a regular MRI procedure, was charged over \$2500 out of pocket at Rush copley. And, this is after insurance coverage. The receptionist in the front desk Ms. Dawn gave an estimate of \$270 out of pocket for the procedure which is why I went for the procedure. Understood that there is always a difference between the actual amount and the estimate. But, how can the bill be 10 times more than what your estimate was, and with a 150% variance?

After weeks of calls, messages, and email requests, they offered some discount on the total amount, but it was answered by a rude accounts manager Yvette, who asked to take the discount or leave it without concerns for people or patients whatsoever. The refuse to accept it was their mistake of low balling the estimate. They just exist to make money. For the same procedure, it costed less than \$300 out of pocket at duly. Please save your time and money and stay out of these money sucking parasites!

I recently visited the medical records office and had an unpleasant experience with the lady at the front desk. From the moment I approached her, her tone was condescending and unnecessarily rude. I felt dismissed and as though my questions and concerns were a bother to her.

It's disappointing to encounter such behavior in a setting where professionalism and courtesy should be a priority. Interacting with medical records can already be stressful, and the attitude displayed only made the experience more frustrating.

I hope management addresses this issue to ensure that future visitors are treated with the respect and kindness they deserve.

If you take yourself into the E.R. I hope you don't have an actual emergency. Over 4 hours there without being seen. After people were walking out with 5+ and 7+ hours of waiting we realized it was hopeless at this place. Save yourself bills for the tests they repeat every 2 hours as you watch the easier patients come and go while you lay on the floor writhing in pain while staff ignores you. There's a reason this place has 1.5 rating and the E.R. proves it. Better hospital 15 mins away in Naperville or Plainfield. We left and in under a hour the hospital in Naperville had us in a room and actually taking care of patients! What a concept, a hospital that actually cares. Maybe Rush needs to take some notes. Wouldn't come back here if my life depended on it as I see they wouldn't even care.

Never again will I go to Rush Copley in Aurora. I accumulated a few hospital bills in 2022 and 2023. I religiously made consistent payments on my bill every single month! This wasn't good enough of Money hungry rush Copley so they sent me to collections. We're in turn, I am makin the same monthly payments as I was. Now the kicker! I come to find out that even though I was payment Rush every single month, they were charging me \$3.95 a month for being on a payment plan! And apparently these fees can not be reversed . So, you get punished for making at least some payment! I was honest and paid what I could every month and this is what I get! How unsympathetic can you be? You can't cut someone some slack ? Rush has always been my go to hospital but never again. Last time I went to Edward and for financial reasons, they wiped out my whole hospital bill ! Now that is customer service. Come on Rush ! You're that desperate for my \$120 that you won't accept my monthly payment without tacking on charges . Have some humanity!

I wish I could give this ER a 0. Doctor was extremely rude. Nurses were incompetent and sleepy. They repeated cts and xrays. I'm sure to increase their already outrageous prices. Their app for billing is ridiculous. You can not get any answers from their rude billing department. They sent threatening letters about paying when they know it was a car accident going through insurance.

Live 5 minutes away and have to go to other hospital centers in the area.

Any appointment we try to get for our daughter or us is a minimum of 6 months out. We don't want to just go to a nurse practitioner at the satellite offices. We had good experiences with our primary but I need to actually see doctors in a reasonable amount of time.

This hospital is all for profit and not patient care.

Not good for pediatrics, VERY hard to get ahold of anyone live, phone calls are dropped suddenly with no return call, will not allow you to bring multiple children in for visits, very dismissive nurses of parents concerns, the staff they have to answer phones and set appts are just no help at all. Now to see they billed incorrectly, we finally have had enough and will be going else where. Rush does not care about patients and only \$. After voicing my concerns to the person on the phone i received a phone call from the head of pediatrics, for no reason. I did not ask for her to call me nor can she assist me as I already found better care for my children which I informed her. It felt like harassment! We won't be back

Terrible. There was blood on the seat for vitals. When I brought my child before this they did everything but what they were supposed to do so at his follow up appointment I found out he had an ear infection in both ears. The kicker they never checked his ears but mentioned earlier infection as possibility. I was there last night and the nurse I had was the rudest after I waited 2 hours just to find out I had the flu. At the end she literally threw my discharge papers on my lap. I was so disgusted and dismayed. It's bad enough I'm super sick and it hurts to move but to be so careless in the medical position she was in is wild. The doctor was pretty nice though.

This hospital sucks, like the doctors and nurses literally dont know what they are doing. I had two family members who has been admitted here multiple times with health complications and the doctors and nurses have no idea how to treat them. The next minute my family members go to other hospitals towards downtown chicago, they get treated correctly and the doctors and nurses diagnose them and know whats going on with them. I swear its like the staff at this Aurora location are practicing on patients with no adequate training, experience and licensing. No wonder this hospital at this location has bad reviews. I hate this hospital and i warn all my friends and family not to go there.

Crushed my finger very seriously. Id post a pic but trust me you don't wanna see it. Ambulance took me here. They took an x rays when I got there and then sat me in the lobby and didn't follow up with me for 7.5 hours. I eventually left and drove back to my home town where I made an appointment with a hand surgeon on my own. It's 3 days later and still the only people to even see the wound exposed are me and the guy in the ambulance. Not sure what this means for the future of my finger. But if I ever find myself in the area I'm driving right past and going to a different hospital.

I've quite literally received better care while locked up in county jail. I hate this country's healthcare system..

\*\*\*\*Update\*\*\*\*

The talented hand surgeon that I went to at Carle Bromer managed to save my finger. After 3 months of healing, Dr appointments and physical therapy it's back to normal.

Rush Copley on the other hand messaged me and told me to call a number about the bad experience I had at their location. And after telling them about my experience there. They proceeded to send me a bill for things that never happened. Using terms like "triage". After googling the definition "the preliminary assessment of patients or casualties in order to determine the urgency of their need for treatment and the nature of treatment required."

It was at that point I realized Rush Copley was not interested in the care of their residents. And only concerned with how much money they can get out of my insurance provider and myself combined. I could go on about this. But I think this review pretty well gets the point across.

And to the lady that works there that told me to take this down.. The answer is no.

Worst hospital in Chicago!! My mom went with fluid in her lungs and high troponin levels and they still didn't see her after a 6 hour wait. My mom's bp was 190 and I eventually had to take her home to give her meds. Next day she was admitted at Edward Hospital. Their patients will be dying but they still won't see them. Never going back

We have been coming here for years and have been more than pleased. But this time around I have been disappointed from day 1. These so called hospst Dr. They have do not look out for the patients well being at all. I have to be here all the time to be sure he is being taken care of and all the meds he is on they have not given him. And he has congested heart failure and nothing for all the water. He looks like a balloon. This is so not right. These r peoples lives. We will find a new hospital.

We had a bad experience with the nurse and receptionist. We had our baby there and my children couldn't go in to look at their sister since we have 3. Kids of 16 years old, 13 years old and 3 years old. According to what we can't have more than 2 people in the room, I asked to leave so they could come in and look. to her sister and she doesn't care, they told me that my 3-year-old girl now counts as an adult. Later, my relatives came and told them that they couldn't come in because the room was full with 7 people, when there was no one, I came out to complain and they told me, we think That was another person and he just said the hundredth thing and laughs.!! Later the same thing happened with my friend, he came to visit and brought his 1-year-old baby and they didn't let him in. I went out to talk to them telling them that I was leaving so that my friend could come with his baby. The receptionist called the nurse. and he said no and they made fun of us. Then the nurse came to our room to argue with me. That scared my wife and made her sick because of what she came to do.!! It is the worst service I have ever received in my vada RUSH COPLEY FROM AURORA IS GARBAGE!!! I ASK GOD NOT TO RETURN TO YOU 🙏

If you have any type of emergency do not come here. The nurses in the emergency department have absolutely no compassion. You will wait for 8+ hours while there are 50+ people in excruciating pain, sleeping on benches/floors, and getting sick all over the bathrooms waiting to be seen and never being updated. I was in for a possible stroke and couldn't see at all out of my left eye. When my mom asked to talk to a nurse about my blood pressure, a male nurse came out & explained in the most condescending way that he simply was not concerned about me. They are there for the check.. not because they genuinely care about people. I prayed for everyone there last night struggling and being treated like absolute garbage. I understand it can get stressful.. I work in healthcare, but never in a million years would I treat another human being the way the nurses treated everyone there, including myself.

Horrible experience .. after first going to the convenient care with our toddler, they immediately recommended we go to the emergency room because he had low oxygen levels and labored breathing, and a cough so extreme it was making him throw up.. we arrived at the rush ER at 5:45, took almost 45 minutes to get a round of tests taken, then they told us to return to waiting room.. we sat in the dirty waiting room for an additional 5 hours without any further attention.. after a total of almost 6 hours of waiting with no updates or progress we decided to leave without any treatments, answers, or medications .... F you rush!! We will never use this hospital system again!!

Nurses 5/5 couldn't ask for better. The Dr Ankur Patel on the other hand was the worst experience I have ever had with a physician. Unprofessional in every way.

As for you, Dr Ankur Patel, I'm very disappointed with being under your care as your patient. Yesterday was one of the worst days of my withdrawals and was prescribed the least amount of medicine to help me

cope with it. I had mentioned to you prior that I needed something stronger to help me with my tremors or at the very least provided a dose on a more frequent basis. You ignored my request as if you have been through withdrawals yourself and knew what was best. To my understanding a doctor patient relationship is supposed to be built on trust, respect, communication, and a common understanding of both the doctor and patients' side, yet you dismissed my concerns of needing stronger or more frequent doses to help me battle the hell and agony of withdrawals. As if you knew best for me without even experiencing what I was feeling. This was very disappointing and discouraging. Every doctor that I was under their care would come to check up on me at the minimum twice a day, I understand you may be busy but nonetheless this is how it was. Under your care I felt more like a number rather than a patient who is cared for.

I'm saddened this was the experience I received from you, and hope that for future patient's in my situation you can take into consideration the concerns I have. For this reason I would give you a 0/5 stars. I wouldn't recommend this hospital or you to any of my friends or family if they are ever in the situation I was in. But there's always room to grow as a person and as a professional and I hope these words resonate with you next time you have a patient in my position. At the very least I do thank you for what you did do. I just wish it could've been more. Do better Dr Patel.

I received a bill on (12/30/23) for emergency room service I received on 11/20/23. The bill was dated 12/24/23 and requested payment within 30 days. I received a phone call from the bill collection department at 8:30 AM on 1/2/24 (just 4 days after receiving the bill) pushing me for payment. The caller said they had not received any funds for services but they actually HAD received funds from my medical insurance provider. I fully intended to pay my portion of the bill but contacting me and trying to "strong arm" me to pay well before the due date is completely unacceptable. I am highly insulted by this attempt to hassle me for early payment and will find a different medical facility to work with in the future.

Bad place to go for treatment. Staff are not helpful. I was there December 2 at afternoon with my neck and arm pain. I wait 4 hour at dirty waiting room. I was so much pain then I have to leave without any treatment. Staff don't care at all. Worse hospital. Front desk and nurses who check your blood pressure they are very rude. There attitude is they don't care about your pain.

Wouldnt take my worst enemy here.

We just lost my cousin because of the negligent care of the doctors and nurses at this hospital, she had a perfectly normaly c-section, kept telling the nurses she didnt feel good and they kept dismissing and ignoring her pleas. She passed away there, exactly a week after her c section, leaving behind her 14 year old son, 8 year old daughter, 1 week old son, and partner of almost 17 years.

Immediately after she passed, the doctors and nurses who failed her ran and hid! The family asked to speak with them for answers, and they had the audacity to claim they were too distraught to speak to us. AVOID THIS HOSPITAL!!!

I am sure which hospital is worse Copley or Mercy...well they are both the same now. They worst ever. Was in the emergency last my baby who I explained to has an auto immune disease and I didn't want to expose her to all the other sick people in the waiting. As I expressed my concerns the front desk receptionist and a RN seem to brush it off and stated it was a 5 to 10 wait for triage. I explained my daughter medical history clearly and they didn't seem to review her chart from her previous discharge care. Get a phone 8 hours after discharge
