Vaccines for Children Program
Patient Eligibility Screening Record

1. Date Screened: MM / DD / YYYY

2. Child's Name: Phillips Parker L
Last First MI

3. Child's Date of Birth: 02/08/2022
MM DD YYYY

4. Parent/Guardian/Individual of Record: Blue Jatun E
Last First MI

5. This child qualifies for immunization through the VFC program because he/she
(check only one):
☐ (a) Is enrolled in Medicaid, or
☐ (b) Does not have health insurance, or
☐ (c) Is an American Indian or Alaskan Native, or
☐ (d) Is underinsured (has health insurance that does not pay for vaccinations).

6. Is your facility a Federally Qualified Health Center (FQHC) or Rural Health Center (RHC)?

Provider of Record: _____
Last First MI

Record of VFC eligibility for all children 18 years of age or younger who receive VFC program
immunizations should be maintained in the provider's office. The record may be completed by
anyone responsible for the child's immunizations. While verification of responses is not required, it is a good practice
to maintain a record for each VFC eligible child receiving vaccine for three years.

Back: Intact, straight
Cord stump: No surrounding erythema
Screening DDH: Ortolani's and Barlow's signs absent bilaterally, leg lengths symmetrical, hip position symmetrical, thigh and gluteal folds symmetrical, hip ROM normal bilaterally, normal tone, normal strength
GU: normal male - testes descended bilaterally
Pulses: Brachial normal, femoral normal
Extremities: Extremities normal, atraumatic, no cyanosis or edema, moves all extremities equally, normal strength, normal tone
Neuro: Alert, good 3-phase Moro reflex, good grasp, good rooting reflex, good suck reflex

Assessment:

Healthy newborn infant
Seizures

Plan:

1. Anticipatory Guidance:
6-8 Wet diapers Daily, Avoid Honey, Car Seat, Cord Care, Skin and Nail Care, Sleep on Back and Sleep Patterns
2. Screening tests:
 - A. State newborn metabolic screen: Result of screen normal
 - B. Urine reducing substances (for galactosemia): not indicated
 - C. Hb or HCT (CDC recs before 6mos if preterm or LBW): not indicated
3. Hearing Screening: Awakes to loud noise, Head turning with noise and Passed Newborn hearing screen [family h/o childhood sensorineural deafness, congenital perinatal infections, head/neck malformations, < 1.5kg birth weight, bact. meningitis, jaundice w/exchange transfusion, severe perinatal asphyxia, ototoxic medications, or evidence of any syndrome known to include hearing loss].
4. Ultrasound of the hips to screen for developmental dysplasia of the hip [consider per AAP if breech or if both family hx of ddh + female]: not indicated
5. Immunizations today: see immunization activity
6. Vision: Parental perception of vision and Observation for blinking, pupillary response, red reflex, tracking, ocular movement
7. See EMR for follow-up, referrals, orders, medications, and patient instructions.

Scan on 3/8/2022 3:58 PM by Henson, Jilin C (below)

Vaccines for Children Program
Patient Eligibility Screening Record

1. Date Screened: MM / DD / YYYY

2. Child's Name: Phillips Parker L
Last First MI

3. Child's Date of Birth: 02/08/2022
MM DD YYYY

4. Parent/Guardian/Individual of Record: Blue Jatun E
Last First MI

5. This child qualifies for immunization through the VFC program because he/she
(check only one):
☐ (a) Is enrolled in Medicaid, or
☐ (b) Does not have health insurance, or
☐ (c) Is an American Indian or Alaskan Native, or
☐ (d) Is underinsured (has health insurance that does not pay for vaccinations).

6. Is your facility a Federally Qualified Health Center (FQHC) or Rural Health Center (RHC)?

Provider of Record: _____
Last First MI

Record of VFC eligibility for all children 18 years of age or younger who receive VFC program
immunizations should be maintained in the provider's office. The record may be completed by
anyone responsible for the child's immunizations. While verification of responses is not required, it is a good practice
to maintain a record for each VFC eligible child receiving vaccine for three years.

Vaccines for Children Program
Patient Eligibility Screening Record

1. Date Screened: MM / DD / YYYY

2. Child's Name: Phillips Parker L
Last First MI

3. Child's Date of Birth: 02/08/2022
MM DD YYYY

4. Parent/Guardian/Individual of Record: Blue Jatun E
Last First MI

5. This child qualifies for immunization through the VFC program because he/she
(check only one):
☐ (a) Is enrolled in Medicaid, or
☐ (b) Does not have health insurance, or
☐ (c) Is an American Indian or Alaskan Native, or
☐ (d) Is underinsured (has health insurance that does not pay for vaccinations).

6. Is your facility a Federally Qualified Health Center (FQHC) or Rural Health Center (RHC)?

Provider of Record: _____
Last First MI

Record of VFC eligibility for all children 18 years of age or younger who receive VFC program
immunizations should be maintained in the provider's office. The record may be completed by
anyone responsible for the child's immunizations. While verification of responses is not required, it is a good practice
to maintain a record for each VFC eligible child receiving vaccine for three years.

Author: Landis, Derek T, MD
Filed: 5/2/2022 9:32 AM
Editor: Landis, Derek T, MD (Physician)

Service: —
Encounter Date: 5/2/2022

Author Type: Physician
Status: Signed

History Subjective:

Parker Phillips is a 2 m.o. male who is presenting for this well child visit.
History was provided by the mother.

All Notes (continued)

Progress Notes by Landis, Derek T, MD at 5/2/2022 9:28 AM (continued)

Version 1 of 1

Current Issues:

Current concerns by guardian include none..

Review of Nutrition:

Current feeding pattern: infant formula: Good Start Soothe: 30 ounces daily

Water source: bottled

Difficulties with feeding: no

Current stooling frequency: Consistent with age.

Normal number of Wet diapers.

Social Screening:

Current child-care arrangements: in home: primary caregiver: mother

Siblings: see family history section of the EMR

Parental coping and self-care: Doing well; no concerns.

Secondhand smoke exposure? no

Developmental Milestones:

Developmental questions have been answered in the visit navigator.

Objective:

Vitals:

05/02/22 0918

Pulse: 142

Temp: (!) 97.7 °F (36.5 °C)

TempSrc: Temporal

Weight: 5557 g (12 lb 4 oz)

Height: 24.5" (62.2 cm)

HC: 41.3 cm (16.25")

83 %ile based on WHO (Boys, 0-2 years) head circumference-for-age based on Head Circumference recorded on 5/2/2022.

20 %ile based on WHO (Boys, 0-2 years) weight-for-age data based on Weight recorded on 5/2/2022.

79 %ile based on WHO (Boys, 0-2 years) Length-for-age data based on Length recorded on 5/2/2022.

Growth parameters are noted and are appropriate for age.

[Exam found to be normal, need to document abnormal findings]

Exam performed: unclothed

General: Active, alert, in no distress

Skin: Dry, normal - no rash and well perfused

Head: Anterior fontanel soft and flat, normal cephalic, atraumatic and normal fontanels Eyes: Normal corneal light reflex, pupils equal and reactive, red reflex, sclera white bilaterally

Ears: Normal external and internal anatomy, pinna normal appearance, ear appropriately positioned

Nose: Normal external appearance, nares patent, and septum midline

Mouth: No perioral or gingival cyanosis or lesions. Tongue is normal in appearance, normal mucosa, palate intact, uvula midline, uvula single.

Neck: Supple, no masses, no thyromegaly, clavicles intact

All Notes (continued)

Progress Notes by Landis, Derek T, MD at 5/2/2022 9:28 AM (continued)

Version 1 of 1

Lungs: Breath sounds equal, clear to auscultation bilaterally, no retractions, no stridor, normal respiratory effort

Heart: Regular rate and rhythm, S1 and S2 normal, no murmur, no click, no rub, no gallop

Abdomen: Soft, non-tender, bowel sounds normal, no masses, no organomegaly

Back: Intact, straight

Cord stump: No surrounding erythema

Screening DDH: Ortolani's and Barlow's signs absent bilaterally, leg lengths symmetrical, hip position symmetrical, thigh and gluteal folds symmetrical, hip ROM normal bilaterally, normal tone, normal strength

GU: normal male - testes descended bilaterally

Pulses: Brachial normal, femoral normal

Extremities: Extremities normal, atraumatic, no cyanosis or edema, moves all extremities equally, normal strength, normal tone

Neuro: Alert, good 3-phase Moro reflex, good grasp, good rooting reflex, good suck reflex

Assessment:

Healthy infant

Plan:

1. Anticipatory guidance provided: Avoid Honey, Baby's Temperament, Car Seat, Infant Weight Gain, Keep Hand on Baby, Know Signs of Illness, Skin and Nail Care and Sleep on Back
2. Screening tests:
Hb or HCT (CDC rec's before 6mos if preterm or LBW): not indicated
3. Hearing screening: Not indicated [family h/o childhood sensorineural deafness, congenital perinatal infections, head/neck malformations, < 1.5kg birth weight, bact. meningitis, jaundice w/exchange transfusion, severe perinatal asphyxia, ototoxic medications, or evidence of any syndrome known to include hearing loss].
4. Immunizations today: parent refuses vaccines
5. Vision: Parental perception of vision and Observation for blinking, pupillary response, red reflex, tracking, ocular movement
6. Ultrasound of the hips to screen for developmental dysplasia of the hip [consider per AAP if breech or if both family hx of ddh + female]: not indicated
7. See EMR activities for meds, referrals, orders, patient instructions, and follow-up.

Documents — Encounter Level on 05/02/2022:

Scan on 6/3/2022 12:18 PM by South, Aretha J: Immunization REFUSAL TO VACCINATE (below)

Refusal To Vaccinate

Child's name Parker Phillips Date of birth 02 08 22
Parent's/Guardian's name Jatom Blue
My child's doctor/nurse Dr. Landis, MD has advised me that my child (named above) should receive the following vaccine(s):

Recommended	Declined
<input checked="" type="checkbox"/> Hepatitis B vaccine	<input checked="" type="checkbox"/>
<input checked="" type="checkbox"/> Diphtheria, tetanus, acellular pertussis (DTaP or Tdap) vaccine	<input checked="" type="checkbox"/>
<input checked="" type="checkbox"/> Diphtheria tetanus (DT or Td) vaccine	<input checked="" type="checkbox"/>
<input checked="" type="checkbox"/> Haemophilus influenzae type b (Hib) vaccine	<input checked="" type="checkbox"/>
<input checked="" type="checkbox"/> Pneumococcal conjugate vaccine	<input checked="" type="checkbox"/>
<input checked="" type="checkbox"/> Inactivated poliovirus (IPV) vaccine	<input checked="" type="checkbox"/>
<input checked="" type="checkbox"/> Measles-mumps-rubella-varicella (MMRV) vaccine	<input checked="" type="checkbox"/>
<input checked="" type="checkbox"/> Measles-mumps-rubella (MMR) vaccine	<input checked="" type="checkbox"/>
<input checked="" type="checkbox"/> Varicella (chickenpox) vaccine	<input checked="" type="checkbox"/>
<input checked="" type="checkbox"/> Influenza (flu) vaccine	<input checked="" type="checkbox"/>
<input checked="" type="checkbox"/> Meningococcal vaccine	<input checked="" type="checkbox"/>
<input checked="" type="checkbox"/> Hepatitis A vaccine	<input checked="" type="checkbox"/>
<input checked="" type="checkbox"/> Rotavirus vaccine	<input checked="" type="checkbox"/>
<input type="checkbox"/> Other	<input type="checkbox"/>

I have read the Vaccine Information Sheet(s) from the Centers for Disease Control and Prevention explaining the vaccine(s) and the disease(s) they prevent. I have had the opportunity to discuss these with my child's doctor or nurse, who has answered all of my questions regarding the recommended vaccine(s). I understand the following:

- The **purpose** of and the need for the recommended vaccine(s).
- The **risks and benefits** of the recommended vaccine(s).
- If my child does not receive the vaccine(s), the **consequences** may include:
 - Contracting the illness the vaccine should prevent (the outcomes of these illnesses may include one or more of the following: pneumonia, illness requiring hospitalization, death, brain damage, meningitis, seizures, and deafness. Other severe and permanent effects from these vaccine-preventable diseases are possible as well)
 - Transmitting the disease to others.
 - Requiring my child to stay out of child care or school during disease outbreaks.
- My child's doctor or nurse, the American Academy of Pediatrics, the American Academy of Family Physicians, and the Centers for Disease Control and Prevention all strongly recommend that these vaccines be given according to recommendations.

Nevertheless, I have decided at this time to decline the vaccine(s) recommended for my child, as indicated above, by checking the appropriate box under the column titled "declined."

I know that failure to follow the recommendations about vaccination may endanger the health or life of my child and others with which my child might come into contact.

I know that I may re-address this issue with my child's doctor or nurse at any time and that I may change my mind and accept vaccination for my child any time in the future.

I acknowledge that I have read this document in its entirety and fully understand it.

Vaccines for Children Program
Patient Eligibility Screening Record

1. Date Screened: MM / DD / YYYY

2. Child's Name: Phillips Last Parker First L MI

3. Child's Date of Birth: 02/08/2022
MM DD YYYY

4. Parent/Guardian/Individual of Record: Blue Last Tatum First E MI

5. This child qualifies for immunization through the VFC program because he/she (check only one):
(1) Is enrolled in Medicaid, or
(2) Does not have health insurance, or
(3) Is an American Indian or Alaskan Native, or
(4) Is underinsured (has health insurance that does not pay for vaccinations).

6. Is your facility a Federally Qualified Health Center (FQHC) or Rural Health Center (RHC)?

7. Provider of Record: _____
Last First MI

8. This record is for VFC eligibility for all children 18 years of age or younger who receive VFC program services at this facility, or at the health care provider's office. The record may be completed by any qualified person (e.g., an assistant vaccination provider). This record may be changed. While verification of responses is not required, it is a good practice to maintain a regular record for each VFC eligible child receiving vaccine for three years.

Vaccines for Children Program
Patient Eligibility Screening Record

1. Date Screened: MM / DD / YYYY

2. Child's Name: Phillips Parker L
Last First MI

3. Child's Date of Birth: 02/08/2022
MM DD YYYY

4. Parent/Guardian/Individual of Record: Blue Jatun E
Last First MI

5. This child qualifies for immunization through the VFC program because he/she
(check only one):
☐ (a) Is enrolled in Medicaid, or
☐ (b) Does not have health insurance, or
☐ (c) Is an American Indian or Alaskan Native, or
☐ (d) Is underinsured (has health insurance that does not pay for vaccinations).

6. Is your facility a Federally Qualified Health Center (FQHC) or Rural Health Center (RHC)?

Provider of Record: _____
Last First MI

Record of VFC eligibility for all children 18 years of age or younger who receive VFC program
immunizations should be maintained in the provider's office. The record may be completed by
anyone responsible for the child's immunizations. While verification of responses is not required, it is a good practice
to maintain a record for each VFC eligible child receiving vaccine for three years.

Version 1 of 1

Author: Landis, Derek T, MD

Service: —

Author Type: Physician

Filed: 7/6/2022 9:39 AM

Encounter Date: 7/6/2022

Status: Signed

Editor: Landis, Derek T, MD (Physician)

Subjective:

Parker Phillips is a 4 m.o. male who is presenting for this well child visit.
History was provided by the parents.

Current Issues:

Current concerns by guardian include none.

All Notes (continued)

Progress Notes by Landis, Derek T, MD at 7/6/2022 9:36 AM (continued)

Version 1 of 1

Review of Nutrition:

Current feeding pattern: infant formula: Good Start Soothe: 30 ounces daily
Water source: bottled
Difficulties with feeding: no
Currently stooling frequency: consistent with age
Normal Wet diapers.

Social Screening:

Current child-care arrangements: in home: primary caregiver: mother
Sibling, parent, and smoke exposure detailed in depth at first well baby visit.

Developmental Milestones:

Developmental questions have been answered in the visit navigator.

Objective:

Vitals:

	07/06/22 0905
Pulse:	144
Temp:	98.2 °F (36.8 °C)
TempSrc:	Temporal
Weight:	6.265 kg (13 lb 13 oz)
Height:	25" (63.5 cm)
HC:	43.2 cm (17")

73 %ile based on WHO (Boys, 0-2 years) head circumference-for-age based on Head Circumference recorded on 7/6/2022.

6 %ile based on WHO (Boys, 0-2 years) weight-for-age data based on Weight recorded on 7/6/2022.

16 %ile based on WHO (Boys, 0-2 years) Length-for-age data based on Length recorded on 7/6/2022.

Growth parameters are noted and are appropriate for age.

[Exam found to be normal, need to document abnormal findings]

Exam performed: unclothed

General: Active, alert, in no distress

Skin: Dry, normal - no rash and well perfused

Head: Anterior fontanel soft and flat, normal cephalic, atraumatic and normal fontanels

Eyes: Normal corneal light reflex, pupils equal and reactive, red reflex, sclera white bilaterally

Ears: Normal external and internal anatomy, pinna normal appearance, ears appropriately positioned

Nose: Normal external appearance, nares patent, and septum midline

Mouth: No perioral or gingival cyanosis or lesions. Tongue is normal in appearance, normal mucosa, palate intact, uvula midline, uvula single.

Neck: Supple, no masses, no thyromegaly, clavicles intact

Lungs: Breath sounds equal, clear to auscultation bilaterally, no retractions, no stridor, normal respiratory effort

Heart: Regular rate and rhythm, S1 and S2 normal, no murmur, no click, no rub, no gallop

Abdomen: Soft, non-tender, bowel sounds normal, no masses, no organomegaly

All Notes (continued)

Progress Notes by Landis, Derek T, MD at 7/6/2022 9:36 AM (continued)

Version 1 of 1

Back: Intact, straight

Screening DDH: Ortolani's and Barlow's signs absent bilaterally, leg lengths symmetrical, hip position symmetrical, thigh and gluteal folds symmetrical, hip ROM normal bilaterally, normal tone, normal strength

GU: normal male - testes descended bilaterally

Pulses: Brachial normal, femoral normal

Extremities: Extremities normal, atraumatic, no cyanosis or edema, moves all extremities equally, normal strength, normal tone

Neuro: Alert, social, interactive

Assessment:

Healthy 4 m.o. infant

Plan:

1. Anticipatory guidance provided: Avoid Honey, Breastfeed or Iron-fortified Formula, Car Seat, Childproof Home and Introduce Solid Food
2. Screening tests:
Hb or HCT (CDC rec's before 6mos if preterm or LBW): not indicated
3. Hearing screening: Not indicated [family h/o childhood sensorineural deafness, congenital perinatal infections, head/neck malformations, < 1.5kg birth weight, bact. meningitis, jaundice w/exchange transfusion, severe perinatal asphyxia, ototoxic medications, or evidence of any syndrome known to include hearing loss].
4. Immunizations today: parent refuses vaccines
5. Vision: Parental perception of vision and Observation for blinking, pupillary response, red reflex, tracking, ocular movement
6. See EMR activities for medications, referral, orders, and follow-up.

Vaccines for Children Program
Patient Eligibility Screening Record

1. Date Screened: MM / DD / YYYY

2. Child's Name: Phillips Parker L
Last First MI

3. Child's Date of Birth: 02/08/2022
MM DD YYYY

4. Parent/Guardian/Individual of Record: Blue Jatun E
Last First MI

5. This child qualifies for immunization through the VFC program because he/she
(check only one):
☐ (a) Is enrolled in Medicaid, or
☐ (b) Does not have health insurance, or
☐ (c) Is an American Indian or Alaskan Native, or
☐ (d) Is underinsured (has health insurance that does not pay for vaccinations).

6. Is your facility a Federally Qualified Health Center (FQHC) or Rural Health Center (RHC)?

Provider of Record: _____
Last First MI

Record of VFC eligibility for all children 18 years of age or younger who receive VFC program
immunizations. This record is the property of the provider's office. The record may be completed by
anyone responsible for the child's immunizations. While verification of responses is not required, it is a good
practice to maintain a record for each VFC eligible child receiving vaccine for three years.

Progress Notes by Landis, Derek T, MD at 10/5/2022 10:00 AM

Version 1 of 1

Author: Landis, Derek T, MD

Service: —

Author Type: Physician

Filed: 10/5/2022 4:51 PM

Encounter Date: 10/5/2022

Status: Signed

Editor: Landis, Derek T, MD (Physician)

Subjective:

Parker Phillips is a 7 m.o. male who is presenting for this well child visit.
History was provided by th.

Current guardian Issues: referral to Scottish Rite. Also persistent nasal congestion

Review of Nutrition:

Current feeding pattern: infant formula: Good Start Soothe : 32 ounces daily, cereal, Baby foods: solids stage 1

Water source:bottled

Difficulties with feeding: no

Normal stooling frequency:and pattern.

Normal number of Wet diapers.

Sleeping difficulties: no

Social Screening:

Current child-care arrangements: in home: primary caregiver: mother

Sibling, parent, and smoke exposure detailed indepth at first well baby visit, see.

Developmental Milestones:

Developmental questions have been answered in the visit navigator.

Objective:

Vitals:

10/05/22 0936

Pulse: 130

Temp: 97.6 °F (36.4 °C)

TempSrc: Temporal

Weight: 7.087 kg (15 lb 10 oz)

All Notes (continued)

Progress Notes by Landis, Derek T, MD at 10/5/2022 10:00 AM (continued)

Version 1 of 1

Height: 27.5" (69.9 cm)

HC: 45.1 cm (17.75")

70 %ile based on WHO (Boys, 0-2 years) head circumference-for-age based on Head Circumference recorded on 10/5/2022., 4 %ile based on WHO (Boys, 0-2 years) weight-for-age data based on Weight recorded on 10/5/2022., 40 %ile based on WHO (Boys, 0-2 years) Length-for-age data based on Length recorded on 10/5/2022.

Growth parameters are noted and are appropriate for age.

[Exam found to be normal, need to document abnormal findings]

Exam performed: unclothed

General: Active, alert, in no distress

Skin: Dry, normal - no rash and well perfused

Head: Anterior fontanel soft and flat, normal cephalic, atraumatic and normal fontanels

Eyes: Normal corneal light reflex, pupils equal and reactive, red reflex, sclera white bilaterally

Ears: Normal external and internal anatomy, pinna normal appearance, ears appropriately positioned

Nose: Normal external appearance, nares patent, and septum midline

Mouth: No perioral or gingival cyanosis or lesions. Tongue is normal in appearance, normal mucosa, palate intact, uvula midline, uvula single.

Neck: Supple, no masses, no thyromegaly, clavicles intact

Lungs: Breath sounds equal, clear to auscultation bilaterally, no retractions, no stridor, normal respiratory effort

Heart: Regular rate and rhythm, S1 and S2 normal, no murmur, no click, no rub, no gallop

Abdomen: Soft, non-tender, bowel sounds normal, no masses, no organomegaly

Back: Intact, straight

Screening DDH: Ortolani's and Barlow's signs absent bilaterally, leg length symmetrical, hip position symmetrical, thigh and gluteal folds symmetrical, hip ROM normal bilaterally, normal tone, normal strength

GU: normal male - testes descended bilaterally

Pulses: Brachial normal, femoral normal

Extremities: Extremities normal, atraumatic, no cyanosis or edema, move extremities equally, normal strength, normal tone

Neuro: Alert, social, interactive

Assessment:

Healthy 7 m.o. infant

HIE

Allergic rhinitis

Plan:

1. Anticipatory guidance provided: Avoid Choke Foods, Breastfeed or Iron-fortified Formula, Brush Teeth, Car Seat, Introduce Solid Food, and Pat-a-cake, Peekaboo

2. Screening tests:

Hb or HCT (CDC recs before 6mos if preterm or LBW): not indicated

All Notes (continued)

Progress Notes by Landis, Derek T, MD at 10/5/2022 10:00 AM (continued)

Version 1 of 1

3. Hearing screening: Not indicated [family h/o childhood sensorineural deafness, congenital perinatal infections, head/neck malformations, < 1.5kg birthweight, bact. meningitis, jaundice w/exchange transfusion, severe perinatal asphyxia, ototoxic medications, or evidence of any syndrome known to include hearing loss].
4. Immunizations today: see immunization report in EMR.
Appropriate VIS given at today's visit.
No History of previous adverse reactions to immunizations.
5. Vision: Parental perception of vision and Observation for blinking, pupillary response, red reflex, tracking, ocular movement
6. Lead Screening required: See visit navigator: Lead questions.
7. Dental issues or referral: Normal tooth eruptions times
8. See the EMR activities for medications, referrals, orders, and follow-up.

Vaccines for Children Program
Patient Eligibility Screening Record

1. Date Screened: MM / DD / YYYY

2. Child's Name: Phillips Parker L
Last First MI

3. Child's Date of Birth: 02/08/2022
MM DD YYYY

4. Parent/Guardian/Individual of Record: Blue Jatun E
Last First MI

5. This child qualifies for immunization through the VFC program because he/she
(check only one):
☐ (a) is enrolled in Medicaid, or
☐ (b) Does not have health insurance, or
☐ (c) is an American Indian or Alaskan Native, or
☐ (d) is underinsured (has health insurance that does not pay for vaccinations).

6. Is your facility a Federally Qualified Health Center (FQHC) or Rural Health Center (RHC)?

Provider of Record: _____
Last First MI

Record of VFC eligibility for all children 18 years of age or younger who receive VFC program
services. This record is to be maintained in the provider's office. The record may be completed by
anyone responsible for the child's care. While verification of responses is not required, it is a good
practice to do so. While verification of responses is not required, it is a good practice to do so.
A separate record for each VFC eligible child receiving vaccine for three years.

Version 1 of 1

Author: Landis, Derek T, MD
Filed: 12/7/2022 4:12 PM
Editor: Landis, Derek T, MD (Physician)

Service: —
Encounter Date: 12/7/2022

Author Type: Physician
Status: Signed

Subjective:

Parker Phillips is a 9 m.o. male who is presenting for this well child visit.
History was provided by the parents.

Current Issues:

Current concerns by guardian include none..

All Notes (continued)

Progress Notes by Landis, Derek T, MD at 12/7/2022 10:21 AM (continued)

Version 1 of 1

Review of Nutrition:

Current feeding pattern: infant formula: Good Start natural Cultures: 32 ounces daily, cereal, Baby foods: solids stage 2

Water source: bottled

Difficulties with feeding: no

Voiding and stooling: Consistent with age.

Sleeping difficulties: no

Social Screening:

Current child-care arrangements: in home: primary caregiver: mother

Sibling, parent, and smoke exposure detailed in depth at first well baby visit.

Developmental Milestones:

Developmental questions have been answered in the visit navigator.

Objective:

Vitals:

12/07/22 1011

Pulse: 120
Temp: 97.3 °F (36.3 °C)
TempSrc: Temporal
Weight: 7.683 kg (16 lb 15 oz)
Height: 28" (71.1 cm)
HC: 43.8 cm (17.25")

11 %ile based on WHO (Boys, 0-2 years) head circumference-for-age based on Head Circumference recorded on 12/7/2022.

6 %ile based on WHO (Boys, 0-2 years) weight-for-age data based on Weight recorded on 12/7/2022.

18 %ile based on WHO (Boys, 0-2 years) Length-for-age data based on Length recorded on 12/7/2022.

Growth parameters are noted and are appropriate for age.

[Exam found to be normal, need to document abnormal findings]

Exam performed: unclothed

General: Active, alert, in no distress

Skin: erythematous diaper area with satellite lesions

Head: Anterior fontanel soft and flat, normal cephalic, atraumatic and normal fontanelles

Eyes: Normal corneal light reflex, pupils equal and reactive, red reflex, sclera white bilaterally

Ears: Normal external and internal anatomy, pinna normal appearance, ears appropriately positioned

Nose: Normal external appearance, nares patent, and septum midline

Mouth: No perioral or gingival cyanosis or lesions. Tongue is normal in appearance, normal mucosa, palate intact, uvula midline, uvula single.

Neck: Supple, no masses, no thyromegaly, clavicles intact

Lungs: Breath sounds equal, clear to auscultation bilaterally, no retractions, no stridor, normal respiratory effort

All Notes (continued)

Progress Notes by Landis, Derek T, MD at 12/7/2022 10:21 AM (continued)

Version 1 of 1

Heart: Regular rate and rhythm, S1 and S2 normal, no murmur, no click, no rub, No gallop
Abdomen: Soft, non-tender, bowel sounds normal, no masses, no organomegaly
Back: Intact, straight
Screening DDH: Ortolani's and Barlow's signs absent bilaterally, leg length symmetrical, hip position symmetrical, thigh and gluteal folds symmetrical, hip ROM normal bilaterally, normal tone, normal strength
GU: normal male - testes descended bilaterally
Pulses: Brachial normal, femoral normal
Extremities: Extremities normal, atraumatic, no cyanosis or edema, moves all extremities equally, normal strength, normal tone
Neuro: Alert, social, interactive

Assessment:

Healthy 9 m.o. infant
HIE
Developmental delay - receiving therapy
Candidal diaper dermatitis

Plan:

1. Anticipatory guidance provided: Avoid Choke Foods, Brush Teeth, Use of Florida, Car Seat, Childproof Home, and Pat-a-cake, Peekaboo
2. Iron Deficiency/Hemoglobin/HCT Screening: Screening not needed, not applicable
3. Hearing screening: Not indicated [family h/o childhood sensorineural deafness, congenital perinatal infections, head/neck malformations, < 1.5kg birth weight, bact. meningitis, jaundice w/exchange transfusion, severe perinatal asphyxia, ototoxic medications, or evidence of any syndrome known to include hearing loss].
4. Immunizations today: see immunization orders and report.
Appropriate VIS given at today's visit.
No history of previous adverse reactions to immunizations:
5. Vision: Parental perception of vision and Observation for blinking, pupillary response, red reflex, tracking, ocular movement
6. Lead Screening required: See lead questions in the visit navigator.
7. Dental issues or referral: Normal tooth eruptions times.
8. For medications, orders, referrals, and follow-up: See EMR activities.

All Notes (continued)

Progress Notes by Landis, Derek T, MD at 3/3/2023 9:54 AM (continued)

Version 1 of 1

History was provided by the father.

Parker Phillips is a 12 m.o. male who is seen today for his one year well child visit.

Current Issues:

Current concerns on the part of guardian include none.

Review of Nutrition:

Current feeding pattern: infant formula: Good Start Soothe : 40 ounces daily, juice, table foods (meats, vegetables, fruits, etc)

Water source:bottled

Difficulties with feeding: no

Social Screening:

Current child-care arrangements: in home: primary caregiver: mother

Siblings as documented previously.

Parental coping and self-care: Doing well; no concerns.

Secondhand smoke exposure? no

Developmental Milestones:

Developmental questions have been answered in the visit navigator.

Objective:

Vitals:

03/03/23 0943

Pulse: 124

Temp: 97 °F (36.1 °C)

TempSrc: Temporal

Weight: 8.165 kg (18 lb)

Height: 30" (76.2 cm)

No head circumference on file for this encounter.

5 %ile based on WHO (Boys, 0-2 years) weight-for-age data based on Weight recorded on 3/3/2023.

43 %ile based on WHO (Boys, 0-2 years) Length-for-age data based on Length recorded on 3/3/2023.

Growth parameters are noted and are appropriate for age.

[Exam found to be normal, need to document abnormal findings]

Exam performed: unclothed

General: Active, alert, in no distress

Skin: Dry, normal - no rash and well perfused

Head: Normal cephalic, atraumatic and normal fontanel

Eyes: Normal corneal light reflex, pupils equal and reactive, red reflex, sclera white bilaterally

Ears: Normal external and internal anatomy, pinna normal appearance, ears appropriately positioned

Nose: Normal external appearance, nares patent, and septum midline

Mouth: No perioral or gingival cyanosis or lesions. Tongue is normal in appearance, normal mucosa, palate intact, uvula midline, uvula single.

Neck: Supple, no masses, no thyromegaly, clavicles intact

All Notes (continued)

Progress Notes by Landis, Derek T, MD at 3/3/2023 9:54 AM (continued)

Version 1 of 1

Lungs: Breath sounds equal, clear to auscultation bilaterally, no retractions, no stridor, normal respiratory effort

Heart: Regular rate and rhythm, S1 and S2 normal, no murmur, no click, no rub, no gallop

Abdomen: Soft, non-tender, bowel sounds normal, no masses, no organomegaly

Back: Intact, straight

Screening DDH: Leg length symmetrical, hip position symmetrical, thigh and gluteal folds symmetrical, hip ROM normal bilaterally, normal tone, normal strength

GU: normal male - testes descended bilaterally

Extremities: Extremities normal, atraumatic, no cyanosis or edema, intact distal pulses, moves all extremities equally, normal strength, normal tone

Neuro: Alert, social, interactive

Assessment:

Healthy exam.

Plan:

1. Anticipatory guidance: Avoid Choke Foods, Brush Teeth, Fluoride, Check Hazards, Routines, and Self-care, Self-quieting

2. Laboratory screening

a. Iron Deficiency/ Hb/ HCT Screening: Screening not needed, not applicable

b. PPD: not indicated (Rec'd annually if at risk: immunosuppression, clinical suspicion, poor/overcrowded living conditions; recent immigrant from TB-prevalent regions; contact with adults who are HIV+, homeless, IVDU, Residence or travel from high prevalence areas, farm workers, or with active TB) Caregiver was educated on the importance of the lead screening blood draw and subsequently did not have it completed
refer to the visit navigator lead question section.

3. Immunizations today: See orders and report in EMR activities.
Appropriate VIS given at today's visit.

4. Hearing screening: Not indicated

5. Vision: Parental perception of vision and Observation for blinking, pupillary response, red reflex, tracking, ocular movement

6. Dental issues or referral: Normal tooth eruptions times

7. For medications, orders, referrals, patient instructions, and follow-up; See EMR.

LEAD BLOOD	<1.0	mcg/dL	—	QUEST CLINIC

Comment:

Reference Range

Birth - 6 years: <3.5 mcg/dL

Blood lead levels in the range of 3.5-9.0 mcg/dL have been associated with adverse health effects in children aged 6 years and younger. Patient management varies by age and CDC Blood Lead Level range. Refer to the CDC website regarding Lead Publications/Case Management for recommended interventions.

See Note 1

Note 1

This test was developed and its analytical performance characteristics have been determined by Quest Diagnostics. It has not been cleared or approved by the FDA. This assay has been validated pursuant to the CLIA regulations and is used for clinical purposes.

Vaccines for Children Program
Patient Eligibility Screening Record

1. Date Screened: MM / DD / YYYY

2. Child's Name Phillips Parker L
Last First MI

3. Child's Date of Birth: 02/08/2022
MM DD YYYY

4. Parent/Guardian/Individual of Record: Blue Jatun E
Last First MI

5. This child qualifies for immunization through the VFC program because he/she
(check only one):
☐ (a) Is enrolled in Medicaid, or
☐ (b) Does not have health insurance, or
☐ (c) Is an American Indian or Alaskan Native, or
☐ (d) Is underinsured (has health insurance that does not pay for vaccinations).

6. Is your facility a Federally Qualified Health Center (FQHC) or Rural Health Center (RHC)?

Provider of Record: _____
Last First MI

Record of VFC eligibility for all children 18 years of age or younger who receive VFC program
immunizations should be maintained in the provider's office. The record may be completed by
anyone responsible for the child's immunizations. While verification of responses is not required, it is a good practice
to maintain a record for each VFC eligible child receiving vaccine for three years.

Progress Notes by Landis, Derek T, MD at 6/2/2023 9:53 AM

Version 1 of 1

Author: Landis, Derek T, MD

Service: —

Author Type: Physician

Filed: 6/2/2023 12:58 PM

Encounter Date: 6/2/2023

Status: Signed

Editor: Landis, Derek T, MD (Physician)

Subjective:

History was provided by the father.

Parker Phillips is a 15 m.o. male who is seen today for well child visit.

Current Issues:

Current concerns on the part of guardian include need for referral to PT. Also rash after eating some foods.

Review of Nutrition:

Current feeding pattern: juice, milk: 16 ounces daily of: Pediasure , table foods (meats, vegetables, fruits, etc)

Balanced diet? yes

Water source:bottled

Difficulties with feeding: no

Social Screening:

Obtained and documented at one year of age. See EMR Family history section.

Current child-care arrangements: in home: primary caregiver: mother

Naps:yes

Developmental Milestones:

Developmental questions have been answered in the visit navigator.

Objective:

Vitals:

06/02/23 0936

Pulse: 120

Resp: 20

Temp: 97.3 °F (36.3 °C)

TempSrc: Temporal

Weight: 9.185 kg (20 lb 4 oz)

Height: 30" (76.2 cm)

HC: 43.2 cm (17")

All Notes (continued)

Progress Notes by Landis, Derek T, MD at 6/2/2023 9:53 AM (continued)

Version 1 of 1

<1 %ile based on WHO (Boys, 0-2 years) head circumference-for-age based on Head Circumference recorded on 6/2/2023.

12 %ile based on WHO (Boys, 0-2 years) weight-for-age data based on Weight recorded on 6/2/2023.

7 %ile based on WHO (Boys, 0-2 years) Length-for-age data based on Length recorded on 6/2/2023.

33 %ile based on WHO (Boys, 0-2 years) BMI-for-age based on body measurements available as of 6/2/2023.

Growth parameters are noted and are appropriate for age.

[Exam found to be normal, need to document abnormal findings]

Exam performed: unclothed

General: Active, alert, in no distress

Skin: Dry, normal - no rash and well perfused

Head: Normal cephalic, atraumatic and normal fontanels

Eyes: Normal corneal light reflex, pupils equal and reactive, red reflex, sclera white bilaterally

Ears: Normal external and internal anatomy, pinna normal appearance, ears appropriately positioned

Nose: Normal external appearance, nares patent, and septum midline

Mouth: No perioral or gingival cyanosis or lesions. Tongue is normal in appearance, normal mucosa, palate intact, uvula midline, uvula single.

Neck: Supple, no masses, no thyromegaly, clavicles intact

Lungs: Breath sounds equal, clear to auscultation bilaterally, no retractions, no stridor, normal respiratory effort

Heart: Regular rate and rhythm, S1 and S2 normal, no murmur, no click, no rub, no gallop

Abdomen: Soft, non-tender, bowel sounds normal, no masses, no organomegaly

Back: Intact, straight

Screening DDH: Leg length symmetrical, hip position symmetrical, thigh and gluteal folds symmetrical, hip ROM normal bilaterally, normal tone, normal strength

GU: normal male - testes descended bilaterally

Extremities: Extremities normal, atraumatic, no cyanosis or edema, intact distal pulses, moves all extremities equally, normal strength, normal tone

Neuro: Alert, social, interactive

Assessment:

Healthy exam.

Developmental Delay

Possible allergy to foods

Plan:

1. Anticipatory guidance:

Avoid Choke Foods, Behavior Management, Enforce Rules, Brush Teeth, Fluoride, Check Hazards, Childproof Home, Routines, Safety (pets, mower, pool, street,car), and Toddler Car Seat, Airbags

2. Laboratory screening

a. Iron Deficiency/Hb/HCT (CDC rec's for children at risk between 9-12mos then again 6mos later;

AAP recommends once age 9-15mos):

Screening not needed, not applicable

All Notes (continued)

Vaccines for Children Program
Patient Eligibility Screening Record

1. Date Screened: MM / DD / YYYY

2. Child's Name Phillips Parker L
Last First MI

3. Child's Date of Birth: 02/08/2022
MM DD YYYY

4. Parent/Guardian/Individual of Record: Blue Jatun E
Last First MI

5. This child qualifies for immunization through the VFC program because he/she
(check only one):
☐ (a) Is enrolled in Medicaid, or
☐ (b) Does not have health insurance, or
☐ (c) Is an American Indian or Alaskan Native, or
☐ (d) Is underinsured (has health insurance that does not pay for vaccinations).

6. Is your facility a Federally Qualified Health Center (FQHC) or Rural Health Center (RHC)?

Provider of Record: _____
Last First MI

Record of VFC eligibility for all children 18 years of age or younger who receive VFC program
immunizations. This record is the property of the provider's office. The record may be completed by
anyone responsible for the child's immunizations. While verification of responses is not required, it is a good practice
to maintain a record for each VFC eligible child receiving vaccine for three years.

5. This child qualifies for immunization through the VFC program because he/she
(check only one):
☐ (a) Is enrolled in Medicaid, or
☐ (b) Does not have health insurance, or
☐ (c) Is an American Indian or Alaskan Native, or
☐ (d) Is underinsured (has health insurance that does not pay for vaccinations).

6. Is your facility a Federally Qualified Health Center (FQHC) or Rural Health Center (RHC)?

Provider of Record: _____
Last First MI

Record of VFC eligibility for all children 18 years of age or younger who receive VFC program
vaccines. This record is maintained in the provider's office. The record may be completed by
anyone responsible for administering vaccinations. While verification of responses is not required, it is a good
practice to maintain a record for each VFC eligible child receiving vaccine for three years.

5. This child qualifies for immunization through the VFC program because he/she
(check only one):
☐ (a) Is enrolled in Medicaid, or
☐ (b) Does not have health insurance, or
☐ (c) Is an American Indian or Alaskan Native, or
☐ (d) Is underinsured (has health insurance that does not pay for vaccinations).

6. Is your facility a Federally Qualified Health Center (FQHC) or Rural Health Center (RHC)?

Provider of Record: _____
Last First MI

Record of VFC eligibility for all children 18 years of age or younger who receive VFC program
immunizations. This record is the property of the provider's office. The record may be completed by
anyone responsible for the child's immunizations. While verification of responses is not required, it is a good practice
to maintain a record for each VFC eligible child receiving vaccine for three years.

Author: Landis, Derek T, MD

Service: —

Author Type: Physician

Filed: 9/5/2023 9:53 AM

Encounter Date: 9/5/2023

Status: Signed

Editor: Landis, Derek T, MD (Physician)

Subjective:

History was provided by the parents.

Parker Phillips is a 18 m.o. male who is seen today for well child visit.

Current Issues:

Current concerns on the part of guardian include none.

Review of Nutrition:

Current feeding pattern: juice, table foods (meats, vegetables, fruits, etc), Pediasure 20oz per day

Balanced diet? yes

Water source:bottled

Difficulties with feeding: no

Social Screening:

Obtained and documented at one year of age. See EMR Family history section.

Current child-care arrangements: in home: primary caregiver: mother

Naps:yes

Developmental Milestones:

Developmental questions have been answered in the visit navigator.

Objective:

Vitals:

09/05/23 0932

Pulse: 130

Temp: 97.8 °F (36.6 °C)

TempSrc: Temporal

Weight: 9.44 kg (20 lb 13 oz)

Height: 32" (81.3 cm)

HC: 43.5 cm (17.13")

<1 %ile based on WHO (Boys, 0-2 years) head circumference-for-age based on Head Circumference recorded on 9/5/2023.

7 %ile based on WHO (Boys, 0-2 years) weight-for-age data based on Weight recorded on 9/5/2023.

25 %ile based on WHO (Boys, 0-2 years) Length-for-age data based on Length recorded on 9/5/2023.

6 %ile based on WHO (Boys, 0-2 years) BMI-for-age based on body measurements available as of 9/5/2023.

Growth parameters are noted and are appropriate for age.

[Exam found to be normal, need to document abnormal findings]

Exam performed: unclothed

General: Active, alert, in no distress

All Notes (continued)

Progress Notes by Landis, Derek T, MD at 9/5/2023 9:48 AM (continued)

Version 1 of 1

Skin: Dry, normal - no rash and well perfused
Head: Normal cephalic, atraumatic and normal fontanelles
Eyes: Normal corneal light reflex, pupils equal and reactive, red reflex, sclera white bilaterally
Ears: Normal external and internal anatomy, pinna normal appearance, ears appropriately positioned
Nose: Normal external appearance, nares patent, and septum midline
Mouth: No perioral or gingival cyanosis or lesions. Tongue is normal in appearance, normal mucosa, palate intact, uvula midline, uvula single.
Neck: Supple, no masses, no thyromegaly, clavicles intact
Lungs: Breath sounds equal, clear to auscultation bilaterally, no retractions, no stridor, normal respiratory effort
Heart: Regular rate and rhythm, S1 and S2 normal, no murmur, no click, no rub, no gallop
Abdomen: Soft, non-tender, bowel sounds normal, no masses, no organomegaly
Back: Intact, straight
Screening DDH: Leg length symmetrical, hip position symmetrical, thigh and gluteal folds symmetrical, hip ROM normal bilaterally, normal tone, normal strength
GU: normal male - testes descended bilaterally
Extremities: Extremities normal, atraumatic, no cyanosis or edema, intact distal pulses, moves all extremities equally, normal strength, normal tone
Neuro: Alert, social, interactive

Assessment:

Healthy exam.
Speech delay

Plan:

1. Anticipatory guidance:
Avoid Choke Foods, Brush Teeth, Fluoride, Childproof Home, Routines, Safety (pets, mower, pool, street, car), and Self-care, Self-quieting
2. Laboratory screening
 - a. Iron Deficiency/Hb/HCT (CDC rec's for children at risk between 9-12mos then again 6mos later; AAP recommends once age 9-15mos):
Screening not needed, not applicable
 - b. PPD: not indicated (Rec'd annually if at risk: immunosuppression, clinical suspicion, poor/overcrowded living conditions; recent immigrant from TB-prevalent regions; contact with adults who are HIV+, homeless, IVDU, Residence or travel from high prevalence areas, farm workers, or with active TB)
 - c. Lead screening: see questions in the visit navigator
3. Immunizations today: immunization activity
Appropriate VIS given at today's visit.
No history of previous adverse reactions to immunizations
4. Hearing screening: Not indicated [family h/o childhood sensorineural deafness, congenital perinatal infections, head/neck malformations, < 1.5kg birth weight, bact. meningitis,

5. This child qualifies for immunization through the VFC program because he/she
(check only one):
☐ (a) Is enrolled in Medicaid, or
☐ (b) Does not have health insurance, or
☐ (c) Is an American Indian or Alaskan Native, or
☐ (d) Is underinsured (has health insurance that does not pay for vaccinations).

6. Is your facility a Federally Qualified Health Center (FQHC) or Rural Health Center (RHC)?

Provider of Record: _____
Last First MI

Record of VFC eligibility for all children 18 years of age or younger who receive VFC program
immunizations should be maintained in the provider's office. The record may be completed by
anyone responsible for the child's immunizations. While verification of responses is not required, it is a good practice
to maintain a record for each VFC eligible child receiving vaccine for three years.

Vaccines for Children Program
Patient Eligibility Screening Record

1. Date Screened: MM / DD / YYYY

2. Child's Name Phillips Parker L
Last First MI

3. Child's Date of Birth: 02/08/2022
MM DD YYYY

4. Parent/Guardian/Individual of Record: Blue Jatun E
Last First MI

5. This child qualifies for immunization through the VFC program because he/she
(check only one):
☐ (a) Is enrolled in Medicaid, or
☐ (b) Does not have health insurance, or
☐ (c) Is an American Indian or Alaskan Native, or
☐ (d) Is underinsured (has health insurance that does not pay for vaccinations).

6. Is your facility a Federally Qualified Health Center (FQHC) or Rural Health Center (RHC)?

Provider of Record: _____
Last First MI

Record of VFC eligibility for all children 18 years of age or younger who receive VFC program
immunizations should be maintained in the provider's office. The record may be completed by
anyone responsible for the child's immunizations. While verification of responses is not required, it is a good practice
to maintain a record for each VFC eligible child receiving vaccine for three years.

Progress Notes by Landis, Derek T, MD at 2/9/2024 8:58 AM

Version 1 of 1

Author: Landis, Derek T, MD

Service: —

Author Type: Physician

Filed: 2/9/2024 12:44 PM

Encounter Date: 2/9/2024

Status: Signed

Editor: Landis, Derek T, MD (Physician)

Subjective:

History was provided by the mother.

Parker Phillips is a 2 y.o. 0 m.o. male who is seen today for his 2 year well child visit.

Current Issues:

Current concerns on the part of guardian include none.

Review of Nutrition:

Current feeding pattern: juice, milk: 16 ounces daily of: whole, table foods (meats, vegetables, fruits, etc)

Balanced diet? yes

Water source: bottled

Difficulties with feeding: no

Social Screening:

Current child-care arrangements: in home: primary caregiver: mother

Documented previously. See family history section of EMR. No changes.

Parental coping and self-care: Doing well; no concerns.

Secondhand smoke exposure? no

Sleep Hygiene:

Naps: yes

Snores: no

Developmental Milestones:

Developmental questions have been answered in the visit navigator.

Objective:

Vitals:

02/09/24 0825

Pulse: 110

Temp: 97.1 °F (36.2 °C)

TempSrc: Temporal

All Notes (continued)

Progress Notes by Landis, Derek T, MD at 2/9/2024 8:58 AM (continued)

Version 1 of 1

Weight: 11 kg (24 lb 4 oz)
Height: 33" (83.8 cm)

No head circumference on file for this encounter.

9 %ile based on CDC (Boys, 2-20 Years) weight-for-age data based on Weight recorded on 2/9/2024.

22 %ile based on CDC (Boys, 2-20 Years) Stature-for-age data based on Stature recorded on 2/9/2024.

23 %ile based on CDC (Boys, 2-20 Years) BMI-for-age based on body measurements available as of 2/9/2024.

Growth parameters are noted and are appropriate for age.

[Exam found to be normal, need to document abnormal findings]

Exam performed: fully/partially clothed due to patient/parent/guardian request

General: Active, alert, in no distress

Skin: Dry, normal - no rash and well perfused

Head: Normal cephalic, atraumatic

Eyes: Normal corneal light reflex, pupils equal and reactive, red reflex, sclera white bilaterally

Ears: Normal external and internal anatomy, pinna normal appearance, ear appropriately positioned

Nose: Normal external appearance, nares patent, and septum midline

Mouth: No perioral or gingival cyanosis or lesions. Tongue is normal in appearance, normal mucosa, palate intact, uvula midline, uvula single.

Neck: Supple, no masses, no thyromegaly, clavicles intact

Lungs: Breath sounds equal, clear to auscultation bilaterally, no retractions, no stridor, normal respiratory effort

Heart: Regular rate and rhythm, S1 and S2 normal, no murmur, no click, no rub, no gallop

Abdomen: Soft, non-tender, bowel sounds normal, no masses, no organomegaly

Back: Intact, straight

GU: normal male - testes descended bilaterally

Extremities: Extremities normal, atraumatic, no cyanosis or edema, intact distal pulses, moves all extremities equally, normal strength, normal tone

Neuro: Alert, social, interactive, CN II-XII grossly intact, normal DTR's, normal sensory and cerebellar responses.

Assessment:

Healthy exam

Speech delay

Plan:

1. Anticipatory guidance: Affection, Listen, Respect, Interest in Activities
Behavior Management, Enforce Rules, Acceptable Alternative Behaviors

2. Laboratory screening

a. Iron, Hb or HCT: Screening not needed, not applicable

b. PPD: not indicated

c. Lead screening: Caregiver was educated on the importance of the lead screening blood draw and subsequently did not have it completed

All Notes (continued)

Progress Notes by Landis, Derek T, MD at 2/9/2024 8:58 AM (continued)

Version 1 of 1

3. Immunizations today: see immunization orders activity in EMR.
Appropriate VIS given at today's visit.
No History of previous adverse reactions to immunizations.
4. Hearing screening: Not indicated
5. Vision: Parental perception of vision and Observation for blinking, pupillary response, red reflex, tracking, ocular movement
6. Dental issues or referral: Normal tooth eruptions times
7. Hyperlipidemia screening: These risk factors associated with development of atherosclerosis and CHD:screening not indicated at this visit
8. See EMR for medications, orders, referral, follow-up.
9. Continue speech therapy

5. This child qualifies for immunization through the VFC program because he/she
(check only one):
☐ (a) Is enrolled in Medicaid, or
☐ (b) Does not have health insurance, or
☐ (c) Is an American Indian or Alaskan Native, or
☐ (d) Is underinsured (has health insurance that does not pay for vaccinations).

6. Is your facility a Federally Qualified Health Center (FQHC) or Rural Health Center (RHC)?

Provider of Record: _____
Last First MI

Record of VFC eligibility for all children 18 years of age or younger who receive VFC program
immunizations should be maintained in the provider's office. The record may be completed by
anyone responsible for the child's immunizations. While verification of responses is not required, it is a good practice
to maintain a record for each VFC eligible child receiving vaccine for three years.

Vaccines for Children Program
Patient Eligibility Screening Record

1. Date Screened: MM / DD / YYYY

2. Child's Name Phillips Parker L
Last First MI

3. Child's Date of Birth: 02/08/2022
MM DD YYYY

4. Parent/Guardian/Individual of Record: Blue Jatun E
Last First MI

5. This child qualifies for immunization through the VFC program because he/she
(check only one):
☐ (a) Is enrolled in Medicaid, or
☐ (b) Does not have health insurance, or
☐ (c) Is an American Indian or Alaskan Native, or
☐ (d) Is underinsured (has health insurance that does not pay for vaccinations).

6. Is your facility a Federally Qualified Health Center (FQHC) or Rural Health Center (RHC)?

Provider of Record: _____
Last First MI

Record of VFC eligibility for all children 18 years of age or younger who receive VFC program
immunizations should be maintained in the provider's office. The record may be completed by
anyone responsible for the child's immunizations. While verification of responses is not required, it is a good practice
to maintain a record for each VFC eligible child receiving vaccine for three years.

Scan on 3/8/2022 3:58 PM by Henson, Jilin C (below)

Vaccines for Children Program
Patient Eligibility Screening Record

1. Date Screened: MM / DD / YYYY

2. Child's Name Phillips Parker L
Last First MI

3. Child's Date of Birth: 02/08/2022
MM DD YYYY

4. Parent/Guardian/Individual of Record: Blue Jatun E
Last First MI

5. This child qualifies for immunization through the VFC program because he/she
(check only one):
☐ (a) Is enrolled in Medicaid, or
☐ (b) Does not have health insurance, or
☐ (c) Is an American Indian or Alaskan Native, or
☐ (d) Is underinsured (has health insurance that does not pay for vaccinations).

6. Is your facility a Federally Qualified Health Center (FQHC) or Rural Health Center (RHC)?

Provider of Record: _____
Last First MI

Record of VFC eligibility for all children 18 years of age or younger who receive VFC program
immunizations should be maintained in the provider's office. The record may be completed by
anyone responsible for the child's immunizations. While verification of responses is not required, it is a good practice
to maintain a record for each VFC eligible child receiving vaccine for three years.

Vaccines for Children Program
Patient Eligibility Screening Record

1. Date Screened: MM / DD / YYYY

2. Child's Name Phillips Parker L
Last First MI

3. Child's Date of Birth: 02/08/2022
MM DD YYYY

4. Parent/Guardian/Individual of Record: Blue Jatun E
Last First MI

5. This child qualifies for immunization through the VFC program because he/she
(check only one):
☐ (a) Is enrolled in Medicaid, or
☐ (b) Does not have health insurance, or
☐ (c) Is an American Indian or Alaskan Native, or
☐ (d) Is underinsured (has health insurance that does not pay for vaccinations).

6. Is your facility a Federally Qualified Health Center (FQHC) or Rural Health Center (RHC)?

Provider of Record: _____
Last First MI

Record of VFC eligibility for all children 18 years of age or younger who receive VFC program
immunizations must be maintained in the provider's office. The record may be completed by
anyone responsible for the child's immunizations. While verification of responses is not required, it is a good practice
to maintain a record for each VFC eligible child receiving vaccine for three years.

Vaccines for Children Program
Patient Eligibility Screening Record

1. Date Screened: MM / DD / YYYY

2. Child's Name Phillips Parker L
Last First MI

3. Child's Date of Birth: 02/08/2022
MM DD YYYY

4. Parent/Guardian/Individual of Record: Blue Jatun E
Last First MI

5. This child qualifies for immunization through the VFC program because he/she
(check only one):
☐ (a) Is enrolled in Medicaid, or
☐ (b) Does not have health insurance, or
☐ (c) Is an American Indian or Alaskan Native, or
☐ (d) Is underinsured (has health insurance that does not pay for vaccinations).

6. Is your facility a Federally Qualified Health Center (FQHC) or Rural Health Center (RHC)?

Provider of Record: _____
Last First MI

Record of VFC eligibility for all children 18 years of age or younger who receive VFC program
immunizations should be maintained in the provider's office. The record may be completed by
anyone responsible for the child's immunizations. While verification of responses is not required, it is a good practice
to maintain a record for each VFC eligible child receiving vaccine for three years.

Vaccines for Children Program
Patient Eligibility Screening Record

1. Date Screened: MM / DD / YYYY

2. Child's Name Phillips Parker L
Last First MI

3. Child's Date of Birth: 02/08/2022
MM DD YYYY

4. Parent/Guardian/Individual of Record: Blue Jatun E
Last First MI

5. This child qualifies for immunization through the VFC program because he/she
(check only one):
☐ (a) Is enrolled in Medicaid, or
☐ (b) Does not have health insurance, or
☐ (c) Is an American Indian or Alaskan Native, or
☐ (d) Is underinsured (has health insurance that does not pay for vaccinations).

6. Is your facility a Federally Qualified Health Center (FQHC) or Rural Health Center (RHC)?

Provider of Record: _____
Last First MI

Record of VFC eligibility for all children 18 years of age or younger who receive VFC program
immunizations must be maintained in the provider's office. The record may be completed by
anyone responsible for the child's immunizations. While verification of responses is not required, it is a good practice
to maintain a record for each VFC eligible child receiving vaccine for three years.

Progress Notes by Landis, Derek T, MD at 2/25/2025 8:45 AM

Version 1 of 1

Author: Landis, Derek T, MD

Service: —

Author Type: Physician

Filed: 2/26/2025 8:50 AM

Encounter Date: 2/25/2025

Status: Signed

Editor: Landis, Derek T, MD (Physician)

Subjective:

History was provided by the parents.

Parker Phillips is a 3 y.o. male who presents for this well child visit.

Current Issues:

Current concerns include feeding therapy referral to The Spot.

Toilet trained? no

Concerns regarding hearing? no

Screening for sleep apnea -- Does pt snore? no

Review of Nutrition:

Balanced diet? yes

Current dietary habits: typical for age.

Social Screening:

Current child-care arrangements: in home: primary caregiver: mother

Sibling relations: see family history section and previous visits

Parental coping and self-care: Doing well; no concerns.

Opportunities for peer interaction? no

Concerns regarding behavior with peers? no

Secondhand smoke exposure? no

Developmental Milestones:

Developmental questions have been answered in the visit navigator.

Objective:

Growth parameters are noted and are appropriate for age.

38 %ile based on CDC (Boys, 2-20 Years) weight-for-age data based on Weight recorded on 2/25/2025.,

Normalized weight-for-recumbent length data not available for patients older than 36 months.

All Notes (continued)

Progress Notes by Landis, Derek T, MD at 2/25/2025 8:45 AM (continued)

Version 1 of 1

63 %ile based on CDC (Boys, 2-20 Years) weight-for-stature based on body measurements available as of 2/25/2025.

15 %ile based on CDC (Boys, 2-20 Years) Stature-for-age data based on Stature recorded on 2/25/2025.

No blood pressure reading on file for this encounter.

70 %ile based on CDC (Boys, 2-20 Years) BMI-for-age based on body measurements available on 2/25/2025.

[Exam found to be normal, need to document abnormal findings]

Exam performed: fully/partially clothed due to patient/parent/guardian request

General: Active, alert, in no distress

Skin: Dry, normal - no rash and well perfused

Head: Normal cephalic, atraumatic.

Eyes: Normal corneal light reflex, pupils equal and reactive, red reflex, sclera white bilaterally

Ears: Normal external and internal anatomy, pinna normal appearance, ears appropriately positioned

Nose: Normal external appearance, nares patent, and septum midline

Mouth: No perioral or gingival cyanosis or lesions. Tongue is normal in appearance, normal mucosa, palate intact, uvula midline, uvula single.

Neck: Supple, no masses, no thyromegaly, clavicles intact

Lungs: Breath sounds equal, clear to auscultation bilaterally, no retractions, no stridor, normal respiratory effort

Heart: Regular rate and rhythm, S1 and S2 normal, no murmur, no click, no rub, no gallop

Abdomen: Soft, non-tender, bowel sounds normal, no masses, no organomegaly

Back: Intact, straight

GU: normal male - testes descended bilaterally

Extremities: Extremities normal, atraumatic, no cyanosis or edema, intact distal pulses, moves all extremities equally, normal strength, normal tone

Neuro: Alert, social, interactive, CN II-XII grossly intact, normal DTR's, normal sensory and cerebellar responses.

Assessment:

Healthy exam

HIE

Plan:

1. Anticipatory guidance: Affection, Listen, Respect, Interest in Activities, Brush Teeth, Use of Fluoride, Routines, Safety (pets, mower, pool, street,car), and See Dentist

2. Laboratory screening

a. LEAD LEVEL: see visit navigator questions.

b. Hb or HCT (CDC recc's annually though age 5y for children at risk; AAP recc's once at 15mo-5y) not indicated

c. PPD: not indicated

d. Hyperlipidemia screening:screening not indicated at this visit

All Notes (continued)

Progress Notes by Landis, Derek T, MD at 2/25/2025 8:45 AM (continued)

Version 1 of 1

3. Immunizations today: See immunization orders
Appropriate VIS given at today's visit.
No History of previous adverse reactions to immunizations.
4. Hearing screening: Not indicated [family h/o childhood sensorineural deafness, congenital perinatal infections, head/neck malformations, < 1.5kg birth weight, bact. meningitis, jaundice w/exchange transfusion, severe perinatal asphyxia, ototoxic medications, or evidence of any syndrome known to include hearing loss].
5. Vision: Parental perception of vision and Observation for blinking, pupillary response, red reflex, tracking, ocular movement
Recommend routine vision appointment. List of providers given.
6. Dental issues or referral: Normal tooth eruptions times
7. Blood Pressure Screening: Does the patient need to return for repeat blood pressure checks? not indicated
8. See EMR for orders, medications, referrals, patient instructions, and follow-up.

Vaccines for Children Program
Patient Eligibility Screening Record

1. Date Screened: MM / DD / YYYY

2. Child's Name Phillips Parker L
Last First MI

3. Child's Date of Birth: 02/08/2022
MM DD YYYY

4. Parent/Guardian/Individual of Record: Blue Jatun E
Last First MI

5. This child qualifies for immunization through the VFC program because he/she
(check only one):
☐ (a) Is enrolled in Medicaid, or
☐ (b) Does not have health insurance, or
☐ (c) Is an American Indian or Alaskan Native, or
☐ (d) Is underinsured (has health insurance that does not pay for vaccinations).

6. Is your facility a Federally Qualified Health Center (FQHC) or Rural Health Center (RHC)?

Provider of Record: _____
Last First MI

Record of VFC eligibility for all children 18 years of age or younger who receive VFC program
immunizations should be maintained in the provider's office. The record may be completed by
anyone responsible for the child's immunizations. While verification of responses is not required, it is a good practice
to maintain a record for each VFC eligible child receiving vaccine for three years.

Vaccines for Children Program
Patient Eligibility Screening Record

1. Date Screened: MM / DD / YYYY

2. Child's Name Phillips Parker L
Last First MI

3. Child's Date of Birth: 02/08/2022
MM DD YYYY

4. Parent/Guardian/Individual of Record: Blue Jatun E
Last First MI

5. This child qualifies for immunization through the VFC program because he/she
(check only one):
☐ (a) Is enrolled in Medicaid, or
☐ (b) Does not have health insurance, or
☐ (c) Is an American Indian or Alaskan Native, or
☐ (d) Is underinsured (has health insurance that does not pay for vaccinations).

6. Is your facility a Federally Qualified Health Center (FQHC) or Rural Health Center (RHC)?

Provider of Record: _____
Last First MI

Record of VFC eligibility for all children 18 years of age or younger who receive VFC program
immunizations should be maintained in the provider's office. The record may be completed by
any staff member responsible for immunization services. While verification of responses is not required, it is a good practice
to maintain a record for each VFC eligible child receiving vaccine for three years.

Documents — Patient Level:

Scan on 3/8/2022 3:58 PM by Henson, Jilin C (below)

Vaccines for Children Program
Patient Eligibility Screening Record

1. Date Screened: MM / DD / YYYY

2. Child's Name: Phillips Parker L
Last First MI

3. Child's Date of Birth: 02/08/2022
MM DD YYYY

4. Parent/Guardian/Individual of Record: Blue Jatun E
Last First MI

5. This child qualifies for immunization through the VFC program because he/she
(check only one):
☐ (a) Is enrolled in Medicaid, or
☐ (b) Does not have health insurance, or
☐ (c) Is an American Indian or Alaskan Native, or
☐ (d) Is underinsured (has health insurance that does not pay for vaccinations).

6. Is your facility a Federally Qualified Health Center (FQHC) or Rural Health Center (RHC)?

Provider of Record: _____
Last First MI

Record of VFC eligibility for all children 18 years of age or younger who receive VFC program
immunizations should be maintained in the provider's office. The record may be completed by
anyone responsible for the child's immunizations. While verification of responses is not required, it is a good practice
to maintain a record for each VFC eligible child receiving vaccine for three years.

LEAD BLOOD	<1.0	mcg/dL	—	QUEST CLINIC

Comment:

Reference Range

Birth - 6 years: <3.5 mcg/dL

Blood lead levels in the range of 3.5-9.0 mcg/dL have been associated with adverse health effects in children aged 6 years and younger. Patient management varies by age and CDC Blood Lead Level range. Refer to the CDC website regarding Lead Publications/Case Management for recommended interventions.
