MEDICAL DECISION MAKING AND PLAN OF CARE

MDM

Summary Statement:

Discussed viral illness vs allergy type s/s. There is one small white plaque soft palate and she is going to watch to make sure this isn't worsening as this would be a reason for decreased eating if we are starting to have thrush. If this worsens to let me know in the next couple of days and we can call in nystatin swish and swallow for him.

May use tylenol every four hours if needed for low grade temperature and possible mouth soreness to see if that will help as well. Return to ER if worsening and if shortness of breath occurs.

Narrative:

Negative results do not rule out infection. If clinically indicated, consider PCR testing which is more sensitive than antigen testing. If PCR testing is desired, consult with your local laboratory as sample recollection may be required.
