**HISTORY OF PRESENT ILLNESS**

Parker Phillips, a 3 wk.o. male presents to the ED with a Chief Complaint of Fever

Subjective

Parker Phillips, 3 wk.o. male presents to the ED with the chief complaint of irritability since last night. TMAX-- axillary temperature of 100.3 at home. His grandmother reports that he has continued to feel warm to them since last night. This morning, the patient seems to be fussier than usual. Normal wet diapers. Normal BM's. Upon arrival to the ED, his temperature is 99.9 rectally. Patient is s/p vaginally delivery with Dr. Whittington in Durant February 8th. He was transferred to OU Children's for seizure like activity after delivery. Diagnosed with HIE. 12 day NICU admission. No reported issues breathing. No seizure-like activity. No other issues reported at this time. Father denies vomiting, diarrhea, rash, cough, or any other modifying factors. Tolerating PO well. Mother states patient has been acting appropriately.

History provided by: **The father and a grandparent**

History limited by: **Age**

Arrived by: **Private vehicle**

Arrived from: **Home**

**Fever**

Max temp prior to arrival: **100.3**

Temp source: **Axillary**

Severity: **Mild**

Onset quality: **Gradual**

Timing: **Intermittent**

Progression: **Waxing and waning**

Chronicity: **New**

Relieved by: **None tried**

Worsened by: **Nothing**

Ineffective treatments: **None tried**

Associated symptoms: **no coughing, no diarrhea, no difficulty breathing, no rash and no vomiting**

Behavior:

Behavior: **Fussy**

Feeding type: **Formula**

Intake amount: **Normal**

Urine output: **Normal**

Last void: **Less than 6 hours ago**

Last stool: **Less than 6 hours ago**

**REVIEW OF SYSTEMS**

Review of Systems

Constitutional: Positive for **crying** and **irritability**. Negative for appetite change and fever.

HENT: Positive for **ear pain**. Negative for congestion, rhinorrhea and sore throat.

Eyes: Negative. Negative for discharge and redness.

Respiratory: Negative. Negative for apnea and cough.

Cardiovascular: Negative. Negative for sweating with feeds and cyanosis.

Gastrointestinal: Negative. Negative for abdominal pain, diarrhea, nausea and vomiting.

Genitourinary: Negative. Negative for hematuria and scrotal swelling.

Musculoskeletal: Negative. Negative for extremity weakness and joint swelling.

Skin: Negative. Negative for color change and rash.

Allergic/Immunologic: Negative.

Neurological: Negative. Negative for seizures.

Hematological: Negative. Negative for adenopathy. Does not bruise/bleed easily.

**PAST MEDICAL HISTORY REVIEWED**

**MEDICAL:**

Patient has a past medical history of Seizure.

**SURGICAL:**

Patient has no past surgical history on file.

**FAMILY:**

Patient's family history is not on file.

**03/04/2022 - ED in Mercy Emergency Department Ardmore (continued)**

**ED Provider Note (All Versions) (continued)**

**SOCIAL:**

No birth history on file.

**Social History**

Patient has no known allergies.

**HOME MEDICATIONS**

There are no discharge medications for this patient.

**Objective**

**PHYSICAL EXAM**

**INITIAL VS**

BP: (not recorded), Heart Rate: (not recorded), Resp: 32 (03/04/22 1130), Pulse: (not recorded), Temp: 99.9 °F (37.7 °C) (03/04/22 1130), Temp src: Rectal (03/04/22 1130), SpO2: (not recorded), Length: 20" (50.8 cm) (03/04/22 1130), Weight: 4264 g (9 lb 6.4 oz) (03/04/22 1130), BMI (Calculated): 16.52 (03/04/22 1130) No LMP for male patient.

**Physical Exam**

Vitals and nursing note reviewed.

**Constitutional:**

General: He is not in acute distress.

Appearance: He is not diaphoretic.

**HENT:**

Head: No cranial deformity or facial anomaly. Anterior fontanelle is flat.

Right Ear: Tympanic membrane normal.

Left Ear: Tympanic membrane normal.

Nose: Nose normal. No nasal discharge.

**Mouth/Throat:**

Mouth: Mucous membranes are moist.

Pharynx: Oropharynx is clear. Normal.

**Comments:**

**Eyes:**

**03/04/2022 - ED in Mercy Emergency Department Ardmore (continued)**

**ED Provider Note (All Versions) (continued)**

General:

Right eye: No discharge.

Left eye: No discharge.

Extraocular Movements: EOM normal.

Conjunctiva/sclera: Conjunctivae normal.

Pupils: Pupils are equal, round, and reactive to light.

Cardiovascular:

Rate and Rhythm: Normal rate and regular rhythm.

Pulses: Pulses are **palpable**.

Heart sounds: No murmur heard.

Pulmonary:

Effort: Pulmonary effort is normal. No respiratory distress, nasal flaring or retractions.

Breath sounds: Normal breath sounds. No stridor. No wheezing, rhonchi or rales.

Abdominal:

General: Bowel sounds are normal. There is no distension.

Palpations: Abdomen is soft. There is no hepatosplenomegaly or mass.

Tenderness: There is no abdominal tenderness. There is no guarding or rebound.

Hernia: No hernia is present.

Genitourinary:

Penis: Normal and circumcised.

Musculoskeletal:

General: No tenderness, deformity, signs of injury or edema. Normal range of motion.

Cervical back: Normal range of motion and neck supple.

Lymphadenopathy:

Head: No occipital adenopathy.

Cervical: No cervical adenopathy.

Skin:

General: Skin is warm.

Turgor: Normal.

Coloration: Skin is not jaundiced, mottled or pale.

Findings: No petechiae or rash. Rash is not purpuric.

Nails: There is no cyanosis.

Neurological:

Mental Status: He is alert.

Motor: No abnormal muscle tone.

Primitive Reflexes: Suck normal.

Deep Tendon Reflexes: Strength normal.

**DIAGNOSTICS**

**LAB:**

**RSV, PCR DETECTION - Normal**

Result	Value
RSV by PCR	Not
	Detected

**INFLUENZA A/B AND COVID-19 PCR PANEL - Normal**

**RADIOLOGY:**

XR CHEST PA OR AP 1 VW

**Radiologist Impression**

**IMPRESSION:**

Mild interstitial markings noted throughout both lungs concerning for an acute viral process or reactive airway disease. No consolidation or pneumonia.

**EKG:**

**PROCEDURES**

Procedures

**MEDICAL DECISION MAKING AND PLAN OF CARE**

**MDM**

I have reviewed current: **labs and imaging**

I have reviewed nursing notes related to past medical history, social history, and review of systems and agree, unless otherwise noted.

**The patient was seen immediately after being brought to the treatment room. They were interviewed and examined with a nurse in the room, and the nursing notes were reviewed. Any ordered laboratory, EKG, and radiologic studies were reviewed and the results considered in my medical decision making process. A wide differential diagnosis was considered to exclude life & limb threatening emergencies.**

3-week-old male presenting to the ED for irritability. On arrival patient was hemodynamically stable and afebrile. Well-appearing. Vigorous on exam, interactive. Patient did not appear septic or toxic on my exam. No focal source of infection. He did not have a fever technically, highest recorded temperature was 100.3 by family number at home. He is currently afebrile here. Patient did have a NICU stay, and given this, I did offer full septic work-up however after a long shared decision-making conversation with mother and grandmother, decision was made to have a more conservative approach. Decision was made to obtain swabs and chest x-ray. I did offer full lab work-up however at this time they declined. I think this is reasonable. Technically patient did not have a fever. He does not appear septic or toxic. Viral swabs are negative, chest x-ray consistent with likely viral illness. Patient was feeding well in the ER. Behaving appropriately, was not inconsolable, consolable by parents. Okay for discharge home at this time. Patient

**03/04/2022 - ED in Mercy Emergency Department Ardmore (continued)**

**ED Provider Note (All Versions) (continued)**

has a follow-up with his pediatrician in 2 days. Given the fact the patient did not have a technical fever I think is reasonable not to obtain full septic work-up. Gaining weight appropriately, no need for admission at this time. I explained all this to the grandmother and the mother and they were agreeable. Return precautions given, discharged in good condition.

There are no discharge medications for this patient.

**LAST VS**

BP: (not recorded), Heart Rate: (not recorded), Resp: 32 (03/04/22 1130), Pulse: (not recorded), Temp: 99.9 °F (37.7 °C) (03/04/22 1130), Temp src: Rectal (03/04/22 1130), SpO2: (not recorded)

**CLINICAL IMPRESSION**

Final diagnoses:

[R11.10] Spitting up infant (Primary)

**DISPOSITION, EDUCATION AND MEDICATION RECONCILIATION**

Medications reconciled. See after visit summary for patient education on discharged patients.

##### Questionnaire

Question	Answer
Employed in healthcare setting (with direct patient contact)?	Unknown
Resident in a congregate (group) care setting?	Unknown
Is this the first test the patient has had for COVID-19?	Yes
Reason for Testing	Symptomatic
Symptomatic for COVID-19 as defined by CDC?	Yes
Date of Symptom Onset	3/4/2022
Admitted to ICU for COVID-19?	No
Hospitalized for COVID-19?	No
Patient's race?	Caucasian
Patient's Ethnicity	Non-Hispanic

##### Specimen Information

ID	Type	Source	Collected By
22AR-063H0131	Upper Respiratory	Nasopharynx	03/04/22 1232

#### Flu A and B , RSV, and Covid-19 Panel [851009087]

##### INFLUENZA A/B AND COVID-19 PCR PANEL [851009103] (Normal)

Resulted: 03/04/22 1317, Result status: Final result

Ordering provider: Hunter, Kale J, MD 03/04/22 1205

Order status: Completed

Filed by: Rucker, Darrell 03/04/22 1317

Collected by: Garcia, Alejandra, RN 03/04/22 1232

Resulting lab: MERCY HOSPITAL ARDMORE LAB SERVICES

Narrative:

This test has been authorized by the FDA under an Emergency Use Authorization for use by authorized laboratories. This test has been validated in accordance with the FDA's guidance regarding Coronavirus Disease-2019 testing. Optimum specimen types and timing for peak viral levels during infection have not been determined. A negative RT-PCR result does not rule out infection with the 2019-Novel Coronavirus.

##### Components

#### Disclaimer

**Important:** You were examined and treated today on an emergency basis. This was not a substitute for, nor an effort to provide, complete and ongoing medical care.

On arrival to the Emergency Department, your home medications were reviewed with you by the Emergency Department staff. Any new medications or changes to your existing medications are noted in these instructions. You should follow up with your primary care and specialty physicians as directed for ongoing medication management.

Some lab or x-ray results may be pending when you leave the Emergency Department. Please be sure that the phone number you provided to Registration is accurate so that we can contact you with these results.

### After Visit Summary (continued)

#### Attached Information

Nausea and Vomiting (English)

## Nausea and Vomiting: Care Instructions

### Overview

© Healthwise, Incorporated

When you are nauseated, you may feel weak and sweaty and notice a lot of saliva in your mouth. Nausea often leads to vomiting. Most of the time you do not need to worry about nausea and vomiting, but they can be signs of other illnesses.

Two common causes of nausea and vomiting are a stomach infection and food poisoning. Nausea and vomiting from a viral stomach infection will usually start to improve within 24 hours. Nausea and vomiting from food poisoning may last from 12 to 48 hours.

The doctor has checked you carefully, but problems can develop later. If you notice any problems or new symptoms, **get medical treatment right away**.

**Follow-up care is a key part of your treatment and safety. Be sure to make and go to all appointments, and call your doctor if you are having problems. It's also a good idea to know your test results and keep a list of the medicines you take.**

### How can you care for yourself at home?

- To prevent dehydration, drink plenty of fluids. Choose water and other clear liquids until you feel better. If you have kidney, heart, or liver disease and have to limit fluids, talk with your doctor before you increase the amount of fluids you drink.
- Rest in bed until you feel better.
- When you are able to eat, try clear soups, mild foods, and liquids until all symptoms are gone for 12 to 48 hours. Other good choices include dry toast, crackers, cooked cereal, and gelatin dessert, such as Jell-O.

### When should you call for help?

Call 911 anytime you think you may need emergency care. For example, call if:

- You passed out (lost consciousness).

**03/04/2022 - ED in Mercy Emergency Department Ardmore (continued)**

**After Visit Summary (continued)**

**Call your doctor now or seek immediate medical care if:**

- You have symptoms of dehydration, such as:
  - Dry eyes and a dry mouth.
  - Passing only a little urine.
  - Feeling thirstier than usual.
- You have new or worsening belly pain.
- You have a new or higher fever.
- You vomit blood or what looks like coffee grounds.

Watch closely for changes in your health, and be sure to contact your doctor if:

- You have ongoing nausea and vomiting.
- Your vomiting is getting worse.
- Your vomiting lasts longer than 2 days.
- You are not getting better as expected.

**Where can you learn more?**

COVID WHAT DO MY TEST RESULTS MEAN (below)

#### To see your COVID-19 test results, go to your MyMercy account.

COVID-19 test results will become viewable in your MyMercy account as soon as they are available. When there are high volumes, test results may take up to 24-48 hours.

##### How to enroll in MyMercy

To access it on your phone, visit [www.mercy.net/MyMercyApp](http://www.mercy.net/MyMercyApp) or download the app at the Apple App Store or on Google Play.

To access it on a desktop, go to [www.mymercy.net](http://www.mymercy.net).

##### When logging in for the first time:

- Click on the "Register Now" button.
- You will be asked to provide further verification such as your billing number from your Mercy statement or insurance number located on your insurance card. Access codes are also available through your doctor's office.
- Complete the registration form and create your username and password.
- If we can verify your information, you will be automatically logged in and registered.
- You will receive an email to verify we have your correct email address. Click the link provided to complete your registration process.

For help, please call **MyMercy** at **1.888.986.3729**.

Forgot your username or password?

Go to <https://www.mymercy.net/#/support> to reset them.

**03/04/2022 - ED in Mercy Emergency Department Ardmore (continued)**

**After Visit Summary (continued)**

**What do my test results mean?**

Your test result is **Positive**:

- A positive result means that the virus was detected, and you are infected with COVID-19.
- If you tested positive or have symptoms regardless of vaccination status:

**Stay home for at least 5 days**

- Stay home for 5 days and **isolate** from others in your home.
- Wear a well-fitted mask if you must be around others in your home.

**Ending isolation if you had symptoms**

- End isolation after 5 full days if you are fever-free for 24 hours (without the use of fever-reducing medication) and your symptoms are improving.

**Ending isolation if you did NOT have symptoms**

- End isolation after at least 5 full days after your positive test.\*

**If you were severely ill with COVID-19**

- You should isolate for at least 10 days. Consult your doctor before ending isolation.

**Take precautions until day 10**

- Wear a mask
- Wear a well-fitted mask for 10 full days any time you are around others inside your home or in public. Do not go to places where you are unable to wear a mask.
- Avoid travel
- Avoid being around people who are at high risk

**Getting Your Results**

- Providers will contact patients on the day their test results are made available. If a patient doesn't receive communication from their provider on the day results are received, the patient should contact the location that ordered their test.
- Some people (especially individuals with no symptoms of illness) wonder about the possibility of a false positive or incorrect result. False positive results with the type of viral test that was performed are very rare.
- Typically, repeat molecular testing (such as a PCR or NAAT) is not recommended for 3 months after an initial positive result unless recommended by your health care provider. That said, some people may want to obtain an antigen test (such as those available over the counter) prior to exiting quarantine/solation. If an individual has access to an antigen test and wants to test, the best approach is to test towards the end of the 5-day isolation period. Collect the test sample only if you are fever-free for 24 hours without the use of fever-reducing medication and your other symptoms have improved (loss of taste and smell may persist for weeks or months after recovery and need not delay the end of isolation). If your test result is positive, you should continue to isolate until day 10. If your test result is negative, you can end isolation, but continue to wear a well-fitting mask around others at home and in public until day 10. Follow additional recommendations for masking and restricting travel as described above.\*
- Seek emergency care immediately if you have trouble breathing, chest pain, new confusion, inability to wake-up or stay awake, bluish lips or face, or other symptoms that concern you.

Your test result is **Negative**: A negative result means that you were probably not infected at the time your sample was collected. However, that does not mean you will not get sick. It is possible that you were very early in your infection when your sample was collected and that you could test positive later. Steps to take based on the reason your doctor ordered COVID-19 testing:

- You had symptoms of COVID-19: A negative test does not completely rule out the possibility that your symptoms are due to COVID-19. Unless your health care provider has another reason for your symptoms, you should continue to quarantine/ isolate at home until your symptoms have improved including being fever-free without the use of fever reducing medications for at least a day. Contact your health care provider with any questions.
- You are not fully vaccinated AND boosted against COVID-19 (if you are booster eligible), but were exposed to someone with COVID-19 AND you do not have any symptoms:
  - If you had close contact (within 6 feet for more than 15 total minutes throughout a day) with someone with COVID-19, you should quarantine/ isolate at home for 5-days from the date of your last known contact while monitoring for symptoms and checking for fever twice daily, if possible. You should attempt to get tested for COVID-19 5 days after exposure if possible. Finally, you should wear a mask when you are around others until it has been 10 days since your last known close contact. If you develop symptoms, you should get re-tested and stay home.
- You are fully vaccinated AND boosted (or fully vaccinated and not yet booster eligible) against COVID-19, were exposed to someone with COVID-19 AND you do not have any symptoms:
  - If you develop symptoms, you should get tested and stay home. Otherwise, you should wear a mask when you are around others for 10 days after your last known close contact exposure. If possible/ not already done - testing a 5 days after the exposure is suggested.
- You were exposed and have symptoms of COVID-19:
  - If you had close contact (within 6 feet for more than 15 total minutes throughout a day) with someone with COVID-19, you should quarantine/ isolate at home until you have completed a 10 day quarantine from the date of your last known contact from someone with COVID-19/ 5 days since symptoms developed (whichever is longer), you are fever free and symptoms have improved. You should wear a mask if you exit quarantine prior to 10 days since your symptoms develop. If your symptoms worsen or you have questions, contact your health care provider.
- You were tested for pre-procedure/ pre-surgical screening:
  - You need to limit time spent out in the community (self-quarantine) prior to your procedure/ surgery to avoid any potential for COVID-19 exposure. If you develop any symptoms or fever prior to your procedure/surgery, notify your health care provider.

**Coding Summary**

MERCY HOSPITAL ARDMORE  
1011 14th Ave NW  
Ardmore OK 73401-1828

Phillips, Parker  
MRN: E1305567552, DOB: 2/8/2022, Legal Sex: M  
Acct #: 54200084389  
ADM 3/4/2022, D/C 3/4/2022

### 03/04/2022 - ED in Mercy Emergency Department Ardmore (continued)
