#### Chief Complaint

NP establish, DM/HTN/HLD, med refills

#### History of Present Illness

53 y/o F hx of DM, HTN, HLD, AV nodal tachy s/p ablation, GERD, hiatal hernia, UI here to establish care and med refills  
1. DM-2 on Januvia, metformin gave her diarrhea so not taking it, last A1C last month at 8 uncontrolled, trying to hard to exercise regularly and carb control not checking at home regularly  
2. HTN- used to ob on HCTZ 2 years ago not on any meds  
3. HLD- last labs from 12/2016 brought report- TGL high at 676 started pravastatin, needs refills

#### Review of Systems

Constitutional: no fever and no chills.

Cardiovascular: Negative.

Respiratory: Negative.

Gastrointestinal: Negative.

#### Active Problems

1. Actinic keratosis
2. Acute sinusitis
3. Asthma
4. History of AV nodal re-entry tachycardia
  - 5/2009 slow pathway modification ISLAM
5. Benign nevus of skin
  - Right nare, Fibrous Papule, Bx 2/16/15.
6. Decreased thyroxine level
7. Esophageal reflux
8. Hypercholesterolemia
9. Hypertension
10. Injury of left foot, initial encounter
11. Irritable bowel syndrome
12. Lentigo
13. Lung nodule seen on imaging study
14. Menorrhagia
15. Obesity, Class I, BMI 30.0-34.9 (see actual BMI)
16. History of Obesity, Class II, BMI 35-39.9
17. History of Overweight
18. Pain in hip
19. Seborheic keratosis
20. Stress incontinence
21. Visit for routine gyn exam

Type 2 diabetes mellitus (250.00) (E11.9)

### Family History

1. Family history of Acute Venous Thrombosis Of The Deep Vessels Of The Lower Extremity : Father
2. Family history of Alzheimer Disease : Paternal Grandmother
3. Family history of Breast Cancer : Paternal Grandmother
  - age dx late 60's
4. Family history of Congestive Heart Failure : Mother
5. Family history of Congestive Heart Failure : Maternal Grandmother
6. Family history of Coronary Artery Disease : Maternal Grandmother
7. Family history of Diabetes Mellitus : Mother
8. Family history of Diabetes Mellitus : Father
9. Family history of Diabetes Mellitus : Sister
10. Family history of malignant neoplasm : Father
11. Family history of obesity : Mother
12. Family history of Heart Disease : Mother
13. Family history of Heart Disease : Father
14. Family history of Hypercholesterolemia : Father
15. Family history of Hypertension : Father
16. Family history of Obstructive sleep apnea : Father
17. Family history of Osteogenesis Imperfecta : Sister
18. Family history of Peripheral Arterial Disease : Father
19. Family history of Pulmonary Embolism : Mother
20. Family history of Reported Family History Of Kidney Disease : Father

### Social History

1. Alcohol Use
  - rarely has up to 2 drinks
2. Caffeine Use
3. Marital History - Currently Married
4. Never a smoker
5. No drug use
6. Occupation
  - phlebotomy supervisor Clare Hospital
7. Partner had vasectomy
8. Uses Safety Equipment - Seatbelts

### Current Meds

Medication Name	Instruction
Cetirizine HCl - 10 MG Oral Tablet	TAKE 1 TABLET DAILY.
Co Q-10 CAPS	TAKE 1 CAPSULE DAILY WITH A MEAL.
Fluticasone Propionate 50 MCG/ACT Nasal Suspension	USE 1 TO 2 SPRAYS IN EACH NOSTRIL ONCE DAILY.
HydroCHLORothiazide 25 MG Oral Tablet	TAKE ONE TABLET BY MOUTH EVERY DAY
Januvia 100 MG Oral Tablet	TAKE 1 TABLET DAILY.
Proventil HFA 108 (90 Base) MCG/ACT Inhalation Aerosol Solution	INHALE 2 PUFFS EVERY 4 HOURS AS NEEDED

### Physical Exam

#### Constitutional

General appearance: No acute distress. overweight.

#### Eyes

Conjunctiva and lids: Normal.

Pupils, Irises and Sclerae: PERRL, EOM's intact, sclerae normal.

#### Ears, Nose, Mouth, and Throat

Otoscopic examination: Canals clear, TM's normal.

Oropharynx: Pink and moist, without erythema or exudate. No tonsil enlargement.

#### Neck

Examination of the neck: Supple, no masses.

#### Pulmonary

Respiratory effort: Normal.

Auscultation of lungs: Clear without wheezes, rhonchi or rales.

#### Cardiovascular

Auscultation of heart: RRR without murmur, gallop or rub, nl S1 S2.

Extremities: No edema or varicosities noted.

#### Lymphatic

Palpation of lymph nodes in neck: Normal.

#### Skin

Skin and subcutaneous tissue: No rashes or suspicious lesions.

#### Psychiatric

Orientation to person, place, and time: Normal.

Mood and affect: Normal.

### Assessment

1. Type 2 diabetes mellitus
2. Hypertension
3. Hypercholesterolemia
4. History of AV nodal re-entry tachycardia

### Plan

1. Renew: Proventil HFA 108 (90 Base) MCG/ACT Inhalation Aerosol Solution; INHALE 2 PUFFS EVERY 4 HOURS AS NEEDED
2. Renew: Pravastatin Sodium 20 MG Oral Tablet; TAKE 1 TABLET DAILY AT BEDTIME
3. Temporarily Stop: HydroCHLOROthiazide 25 MG Oral Tablet
4. Renew: Fluticasone Propionate 50 MCG/ACT Nasal Suspension; USE 1 TO 2 SPRAYS

**Progress Notes signed by Vadlamudi, Phani Deepthi, MD at 4/19/2017 4:22 PM (continued)**

IN EACH NOSTRIL ONCE DAILY

5. Start: Losartan Potassium-HCTZ 50-12.5 MG Oral Tablet; TAKE 1 TABLET ONCE DAILY
6. Start: MetFORMIN HCl ER 500 MG Oral Tablet Extended Release 24 Hour; TAKE 1 TABLET DAILY AS DIRECTED
7. Renew: Januvia 100 MG Oral Tablet; TAKE 1 TABLET DAILY

Type 2 diabetes mellitus (250.00) (E11.9)

**Discussion/Summary**

1. DM-2- cont januvia, start ER form low dose metformin take it with food to prevent SE and will f/up
2. HTN- uncontrolled- need to be on BP med, started dual agent rec check at work and see how its running
3. HLD- refilled pravastatin, last labs are from 12/2016  
f/up in 3months

MM Discussion Summary-PC:

**Patient/Family was counseled regarding today's diagnosis and prescribed medication use and potential side effects.**

Discussed with: patient

Status at end of visit: Sent home

Follow-up: If symptoms do not resolve or you have any concerns please call or return.

Condition at discharge: Stable

**If your provider ordered testing: Most test results are available within 14 days after your visit. Your results will be communicated to you by the provider who ordered your test. If you haven't received your results within that timeframe, please contact the provider who ordered your test.**

MM Medical Decision Making:

**Education/Counseling Issues Discussed:** The plan was discussed and patient agrees and understands.

**End of Encounter Meds**

### Chief Complaint

Patient presents with

- Follow-up  
diabetes<sup>[PV.1]</sup>

### HPI:

HPI<sup>[PV.2]</sup>

The patient is a 53-year-old female with past medical history significant for type 2 diabetes, hypertension, hyperlipidemia, obesity, history of AV nodal reentry tachycardia status post ablation here for followup.

1. Type 2 diabetes on Januvia. Started on low dose metformin extended release as she was having diarrhea with the metformin. Last checked 3 months ago. The patient reports she took it for a couple of weeks and started having bad stomach burn, acid reflux sensations so quit taking the metformin and the sensation went away. Currently, only on Januvia. She has been checking her blood sugars once or twice a day. Forgot the blood sugar logs through, but reports in the morning fasting sugars are in the 150s to 180s. Last week they were high and postprandial in 200s, very rarely 300s. Denies any low blood sugar episodes. Has had a diabetic eye exam 05/2016. Upcoming appointment with Dr. Claringbold next week.
2. Hypertension. She was started on losartan/HCTZ at last visit. Reports her blood pressure has been excellent when she is checking at work. Denies any headache or chest pain or palpitations. She has been occasionally feeling extra beat or skipped beat, especially after caffeine intake but not regularly and not giving any other symptoms.
3. Hyperlipidemia. Restarted pravastatin at last visit and no side effects with it so far, tolerating well.
4. Acid reflux. She is not on any medications for it.<sup>[PV.3]</sup>

### Review of Systems

Constitutional: Negative for chills, fatigue, fever and unexpected weight change.

HENT: Negative.

Eyes: Negative for blurred vision.

Respiratory: Negative for cough, orthopnea and PND.

Cardiovascular: Negative for chest pain, palpitations, orthopnea and PND.

Gastrointestinal: Negative.

Neurological: Negative for light-headedness and headaches.<sup>[PV.4]</sup>

The following have been reviewed by the Provider during this visit:

I have reviewed the following and agree: Chief complaint, ROS and Past, Family, Social History<sup>[PV.2]</sup>

|  | Lipid panel                           |
| 4. Gastroesophageal reflux disease without esophagitis <sup>[PV.1]</sup>                             | Hemoglobin A1c                        |

There are no diagnoses linked to this encounter.<sup>[PV.2]</sup>

1. Type 2 diabetes. A1c today is 7.7, down from 8. reviewed treatment options with the patient. She is unable to tolerate metformin; however, she wants to try metformin every other day. She also lost 10 pounds, congratulated her on weight loss. She is trying to be more active in the summer as well. She had a sulfa allergy, which limits our glipizide prescriptions or other sulfonylureas. She does not want to be on Actos which I agree with. We will repeat her labs in 3 months' time and if it continues to be high, we will consider adding other medications. For now, just continue Januvia and add metformin 3 times a week.
2. Hypertension, well controlled. Continue Hyzaar.
3. Hyperlipidemia. Ordered labs to be done in 3 months' time in future and will follow up. Continue pravastatin.
4. She is up to date on mammogram, reports she has a colonoscopy coming up tomorrow with Dr. Ofori-Darko in Midland. She does need Pap smear. She will come back for a physical.<sup>[PV.3]</sup>

**C counseled Patient/Family: Diagnosis, Prescribed meds and Lab/Diagnostic tests**

**Subjective<sup>[JS.1]</sup>**

Patient: <sup>[NC.1]</sup> Terresa L Slocum<sup>[JS.1]</sup> is a <sup>[NC.1]</sup> 54 y.o. female<sup>[JS.1]</sup>.

**Chief Complaint: Patient Is here for Acute Visit.<sup>[NC.1]</sup>**

**Chief Complaint**

Patient presents with

- Cough
- Nasal Congestion<sup>[JS.1]</sup>

**HPI:<sup>[NC.1]</sup>**

**Cough**

This is a new problem. The current episode started in the past 7 days. The problem has been gradually worsening. The cough is productive of sputum and productive of purulent sputum. Associated symptoms include ear congestion, ear pain, a fever, headaches, nasal congestion, postnasal drip, rhinorrhea, shortness of breath and wheezing. Pertinent negatives include no myalgias or sore throat. Associated symptoms comments: Fever highest 101.7. The symptoms are aggravated by lying down and exercise. Treatments tried: Claritin D, Flonase, Albuterol, Nytime., Tylenol. The treatment provided mild relief.<sup>[NC.2]</sup> non-smoker. No recent travel. Immunocompromised s/t DM. Works at the hospital with lots of sick contacts<sup>[JS.2]</sup>

**Review of Systems**

Constitutional: Positive for fever.

HENT: Positive for ear pain, postnasal drip and rhinorrhea. Negative for sore throat.

Respiratory: Positive for cough, shortness of breath and wheezing.

Musculoskeletal: Negative for myalgias.

Neurological: Positive for headaches.<sup>[NC.2]</sup>

All other systems reviewed and are negative<sup>[JS.2]</sup><sup>[NC.2]</sup>

The following have been reviewed by the Provider during this visit:<sup>[INC.1]</sup>  
Problems<sup>[JS.1]</sup>

I have reviewed the following and agree: Chief complaint, ROS, Past, Family, Social History and Immunizations<sup>[INC.1]</sup>

**Progress Notes by Schlitzkus, Jennifer, PA at 9/5/2017 3:00 PM (continued)****Objective**

Blood pressure (l) 158/92, pulse (l) 96, resp. rate (l) 24, height 4' 11" (1.499 m), weight 171 lb 1 oz (77.6 kg), SpO2 95 %.

**Current Outpatient Prescriptions:**

- albuterol HFA (PROVENTIL HFA;VENTOLIN HFA;PROAIR HFA) 90 mcg/actuation Inhaler, INHALE 2 PUFFS EVERY 4 HOURS AS NEEDED, Disp: 25.5 g, Rfl: 3
- cetirizine (ZyrTEC) 10 mg tablet, Take 1 tablet by mouth daily., Disp: , Rfl:
- coenzyme Q10 (CO Q-10) 300 mg capsule, Take 1 capsule by mouth daily., Disp: , Rfl:
- fluticasone (FLONASE) 50 mcg/actuation nasal spray, USE 1 TO 2 SPRAYS IN EACH NOSTRIL ONCE DAILY., Disp: 48 g, Rfl: 3
- losartan-hydrochlorothiazide (HYZAAR) 50-12.5 mg per tablet, TAKE 1 TABLET BY MOUTH ONCE DAILY., Disp: 90 tablet, Rfl: 1
- pravastatin (PRAVACHOL) 20 mg tablet, TAKE 1 TABLET BY MOUTH DAILY AT BEDTIME., Disp: 90 each, Rfl: 1
- sitagliptin (JANUVIA) 100 mg tablet, TAKE 1 TABLET BY MOUTH DAILY., Disp: 90 tablet, Rfl: 3
- azithromycin (ZITHROMAX) 250 mg tablet, Take 2 tabs (500 mg) by mouth today, than 1 daily for 4 days., Disp: 6 tablet, Rfl: 0
- metFORMIN (GLUCOPHAGE) 500 mg tablet, TAKE TWO TABLETS BY MOUTH TWICE DAILY (Patient not taking: Reported on 9/5/2017 ), Disp: 360 each, Rfl: 1
- metFORMIN (GLUCOPHAGE-XR) 500 mg 24 hr tablet, TAKE 1 TABLET DAILY AS DIRECTED. (Patient not taking: Reported on 9/5/2017 ), Disp: 90 each, Rfl: 1<sup>[JS.1]</sup>

**Physical Exam**

Constitutional: She is<sup>[NC.2]</sup> oriented to person, place, and time<sup>[JS.2]</sup>. She appears<sup>[NC.2]</sup> well-developed<sup>[JS.2]</sup> and<sup>[NC.2]</sup> well-nourished<sup>[JS.2]</sup>. She<sup>[NC.2]</sup> appears i<sup>[JS.2]</sup>.

**HENT:**

Head:<sup>[NC.2]</sup> Normocephalic<sup>[JS.2]</sup> and<sup>[NC.2]</sup> atraumatic<sup>[JS.2]</sup>.

Right Ear:<sup>[NC.2]</sup> Tympanic membrane<sup>[JS.2]</sup> normal.

Left Ear:<sup>[NC.2]</sup> Tympanic membrane<sup>[JS.2]</sup> normal.

Nose:<sup>[NC.2]</sup> Rhinorrhea<sup>[JS.2]</sup> present<sup>[NC.2]</sup> Edema<sup>[JS.2]</sup> in the right nostril.<sup>[NC.2]</sup> Edema<sup>[JS.2]</sup> in the left nostril.

Mouth/Throat:<sup>[NC.2]</sup> Oropharynx is clear and moist<sup>[JS.2]</sup>.

Eyes:<sup>[NC.2]</sup> EOM<sup>[JS.2]</sup> are normal.<sup>[NC.2]</sup> Pupils are equal, round, and reactive to light<sup>[JS.2]</sup>.

Neck:<sup>[NC.2]</sup> Normal range of motion<sup>[JS.2]</sup>.<sup>[NC.2]</sup> Neck supple<sup>[JS.2]</sup>.<sup>[NC.2]</sup> No tracheal deviation<sup>[JS.2]</sup> present.

Cardiovascular:<sup>[NC.2]</sup> Normal rate<sup>[JS.2]</sup>,<sup>[NC.2]</sup> regular rhythm<sup>[JS.2]</sup> and<sup>[NC.2]</sup> normal heart sounds<sup>[JS.2]</sup>.<sup>[NC.2]</sup>

No murmur<sup>[JS.2]</sup> heard.

Pulmonary/Chest:<sup>[NC.2]</sup> Effort normal<sup>[JS.2]</sup> and<sup>[NC.2]</sup> breath sounds normal<sup>[JS.2]</sup>. No<sup>[NC.2]</sup> respiratory distress<sup>[JS.2]</sup>.

She has<sup>[NC.2]</sup> no wheezes<sup>[JS.2]</sup>.<sup>[NC.2]</sup>

**Dry harsh cough<sup>[JS.2]</sup>**

Abdominal:<sup>[NC.2]</sup> Soft<sup>[JS.2]</sup>.<sup>[NC.2]</sup> Bowel sounds are normal<sup>[JS.2]</sup>. She exhibits<sup>[NC.2]</sup> no mass<sup>[JS.2]</sup>. There is<sup>[NC.2]</sup> no tenderness<sup>[JS.2]</sup>. There is<sup>[NC.2]</sup> no guarding<sup>[JS.2]</sup>.

Musculoskeletal:<sup>[NC.2]</sup> Normal range of motion<sup>[JS.2]</sup>.

Neurological: She is<sup>[NC.2]</sup> alert<sup>[JS.2]</sup> and<sup>[NC.2]</sup> oriented to person, place, and time<sup>[JS.2]</sup>. No<sup>[NC.2]</sup> cranial nerve deficit<sup>[JS.2]</sup>. She exhibits<sup>[NC.2]</sup> normal muscle tone<sup>[JS.2]</sup>.

Skin: Skin is<sup>[NC.2]</sup> warm<sup>[JS.2]</sup> and<sup>[NC.2]</sup> dry<sup>[JS.2]</sup>.<sup>[NC.2]</sup> No rash<sup>[JS.2]</sup> noted.

Psychiatric: She has a<sup>[NC.2]</sup> normal mood and affect<sup>[JS.2]</sup>.<sup>[NC.2]</sup> Thought content<sup>[JS.2]</sup> normal.<sup>[NC.2]</sup>

Nursing note<sup>[JS.2]</sup> and<sup>[NC.2]</sup> vitals<sup>[JS.2]</sup> reviewed.<sup>[NC.2]</sup>

Progress Notes by Schlitzkus, Jennifer, PA at 9/5/2017 3:00 PM (continued)

### Assessment/Plan

Diagnosis	Plan
1. Acute upper respiratory infection	azithromycin (ZITHROMAX) 250 mg tablet <sup>[JS.1]</sup>

1. The patient is afebrile with stable vital signs today in no acute distress. Blood pressure was elevated at 158/92.
2. She is ill with an acute upper respiratory infection ongoing for a week, not improving with a temperature of 101.7 in an adult. This is concerning. She has failed all over-the-counter aids including 2 antihistamines, an inhaler as well as Nyquil.

We will treat her with a course of antibiotics as directed. Encourage lots of fluids, rest, can continue with the Nyquil prior to sleep. I would like her to keep an eye on her sugar; would like for her to follow up with Dr. Vadlamudi on Friday as already planned. ER precautions are given for any acute changes.  
[JS.3]

### Discussion/Summary Topics: URI

C counseled Patient/Family: Diagnosis and Prescribed meds

Supervising/Collaboration Physician was<sup>[JS.2]</sup> VADLAMUDI, PHANI DEEPTHI<sup>[JS.4]</sup>

- Diabetes  
*follow up*<sup>[PV.1]</sup>

**HPI:**<sup>[PV.2]</sup>**HPI**<sup>[PV.3]</sup>

The patient is a 5<sup>[PV.2]</sup>4<sup>[PV.4]</sup>-year-old female with past medical history significant for type 2 diabetes, hypertension, hyperlipidemia, obesity, history of AV nodal reentry tachycardia status post ablation here for followup.

1. Type 2 diabetes on Januvia. She has been checking her blood sugars once or twice a day.<sup>[PV.2]</sup> Last one week she has been sick and her BG is very high in 200s, 300s, before that FSBS in 150-180s range and postprandial low 200s<sup>[PV.4]</sup>  
Denies any low blood sugar episodes. Has had a diabetic eye exam 05/2011<sup>[PV.2]</sup>7 w<sup>[PV.4]</sup>ith Dr. Claringbold<sup>[PV.2]</sup>,<sup>[PV.4]</sup>
2. Hypertension.<sup>[PV.2]</sup> On losartan HCTZ combo, denies any HA/CP/DOE<sup>[PV.4]</sup>
3. Hyperlipidemia.<sup>[PV.2]</sup> ON PRAVASTATIN,<sup>[PV.4]</sup> no side effects with it so far, tolerating well.
- 4.<sup>[PV.2]</sup> RECENT URI- improved, on zpack

Since last seen has had colonoscopy done wit hdr. oforidarko<sup>[PV.4]</sup>

**Review of Systems**

Constitutional: Negative for chills, fever and unexpected weight change.

HENT: Negative.

Respiratory: Negative for cough, orthopnea and PND.

Cardiovascular: Negative for palpitations, orthopnea and PND.

Gastrointestinal: Negative.

Neurological: Negative for light-headedness.

The following have been reviewed by the Provider during this visit:<sup>[PV.2]</sup>  
Meds<sup>[PV.1]</sup>

**Progress Notes by Vadlamudi, Phani Deepthi, MD at 9/8/2017 3:40 PM (continued)**

I have reviewed the following and agree: Chief complaint, ROS and Past, Family, Social History [PV.2]

**Patient Active Problem List****Diagnosis**

- Actinic keratosis
- Asthma
- Melanocytic nevus
- Gastroesophageal reflux disease
- Hypercholesterolemia
- Hypertension
- Decreased thyroxine (T4) level
- Injury of foot
- Irritable bowel syndrome
- Temporal headache
- Lentigo
- Lung mass
- Menorrhagia
- Arthralgia of hip
- Seborheic keratosis
- Stress incontinence of urine
- Type 2 diabetes mellitus (CMS/HCC)
- Acute upper respiratory infection

**Current Outpatient Prescriptions:**

- albuterol HFA (PROVENTIL HFA; VENTOLIN HFA; PROAIR HFA) 90 mcg/actuation inhaler, INHALE 2 PUFFS EVERY 4 HOURS AS NEEDED, Disp: 25.5 g, Rfl: 3
- azithromycin (ZITHROMAX) 250 mg tablet, Take 2 tabs (500 mg) by mouth today, than 1 daily for 4 days., Disp: 6 tablet, Rfl: 0
- cetirizine (ZyrTEC) 10 mg tablet, Take 1 tablet by mouth daily., Disp: , Rfl:
- coenzyme Q10 (CO Q-10) 300 mg capsule, Take 1 capsule by mouth daily., Disp: , Rfl:
- fluticasone (FLONASE) 50 mcg/actuation nasal spray, USE 1 TO 2 SPRAYS IN EACH NOSTRIL ONCE DAILY., Disp: 48 g, Rfl: 3

**Assessment/Plan**

Diagnosis	Plan
1. Type 2 diabetes mellitus without complication, without long-term current use of insulin (CMS/HCC)	glipizIDE (GLUCOTROL) 5 mg tablet
2. Essential hypertension	pravastatin (PRAVACHOL) 20 mg tablet
3. Acute upper respiratory infection	
4. Hypercholesterolemia <sup>[PV.1]</sup>	

There are no diagnoses linked to this encounter.

1. Type 2 diabetes. A1c today is 7.<sup>[PV.2]</sup> 5<sup>[PV.4]</sup>, down from<sup>[PV.2]</sup> 7.7<sup>[PV.4]</sup> reviewed treatment options with the patient. She is unable to tolerate metformin<sup>[PV.2]</sup>, will try low dose Glipizide only with meals, risk of hypoglycemia d/w pt<sup>[PV.4]</sup>. We will repeat her labs in 3 months' time<sup>[PV.2]</sup> from last one- A1C only. She has labile numbers and will benefit from CGMS will need to find out if insurance covers it. Will be next step if glipizide no help<sup>[PV.4]</sup>
2. Hypertension, well controlled. Continue Hyzaar.
3. Hyperlipidemia.<sup>[PV.2]</sup> Labs reviewed with pt from 7/2017, TGL much better.<sup>[PV.4]</sup> Continue pravastatin.
4. She is up to date on mammogram,<sup>[PV.2]</sup> and<sup>[PV.4]</sup> colonoscopy<sup>[PV.2]</sup>.<sup>[PV.4]</sup> She does need Pap smear. She will come back for a physical.

- Diabetes
- follow up<sup>[PV.1]</sup>

**HPI:**

HPI<sup>[PV.2]</sup>

The patient is a 54-year-old female with past medical history significant for type 2 diabetes, hypertension, hyperlipidemia, obesity, history of AV nodal reentry tachycardia status post ablation here for followup.<sup>[PV.3]</sup>

1. Type 2 diabetes. She is on Januvia and glipizide. Unable to tolerate metformin. Since last seen, she has seen diabetic educator twice. Had the continuous glucose monitor done for a few days and found out that even that her carb restrictions, less than 45 gm of carbs per day, she was still not under control, maybe only 20% of the time they are under control and it suggested that she try that she try a GLP-1 agonist. The patient seems frustrated that she is still not able to control the sugars, even with a strict diet and exercise.

Notes

---

Progress Notes by Vadlamudi, Phani Deepthi, MD at 11/20/2017 4:20 PM (continued)

---

2. Hypertension, stable on current medications. Does not check it at home.
3. Dyslipidemia, on statin.
4. Recent UTI. Went to urgent care and was given antibiotics about a couple weeks ago and since then she occasionally has intermittent flank pain on 1 side and would like it checked again. Denies any urinary symptoms like dysuria or frequency.<sup>[PV.4]</sup>

**Review of Systems**

Constitutional: Negative for chills, fatigue, fever and unexpected weight change.

HENT: Negative.

Eyes: Negative for blurred vision.

Respiratory: Negative for cough, orthopnea and PND.

Cardiovascular: Negative for chest pain, palpitations and PND.

Gastrointestinal: Negative.

Genitourinary: Positive for flank pain.

Musculoskeletal: Positive for flank pain.

Neurological: Negative for light-headedness and headaches.<sup>[PV.3]</sup>

The following have been reviewed by the Provider during this visit:

---

I have reviewed the following and agree: Chief complaint, ROS and Past, Family, Social History<sup>[PV.2]</sup>

**Current Outpatient Prescriptions:**

- albuterol HFA (PROVENTIL HFA;VENTOLIN HFA;PROAIR HFA) 90 mcg/actuation inhaler, INHALE 2 PUFFS EVERY 4 HOURS AS NEEDED, Disp: 25.5 g, Rfl: 3
- cetirizine (ZyrTEC) 10 mg tablet, Take 1 tablet by mouth daily., Disp: , Rfl:
- coenzyme Q10 (CO Q-10) 300 mg capsule, Take 1 capsule by mouth daily., Disp: , Rfl:
- fluticasone (FLONASE) 50 mcg/actuation nasal spray, USE 1 TO 2 SPRAYS IN EACH NOSTRIL ONCE DAILY., Disp: 48 g, Rfl: 3
- glipizIDE (GLUCOTROL) 5 mg tablet, Take 1 tablet (5 mg total) by mouth 2 (two) times a day before meals., Disp: 180 tablet, Rfl: 3
- losartan-hydrochlorothiazide (HYZAAR) 50-12.5 mg per tablet, TAKE 1 TABLET BY MOUTH ONCE DAILY., Disp: 90 tablet, Rfl: 1
- pravastatin (PRAVACHOL) 20 mg tablet, TAKE 1 TABLET BY MOUTH DAILY AT BEDTIME., Disp: 90 tablet, Rfl: 3
- dulaglutide (TRULICITY) 0.75 mg/0.5 mL pen injector, Inject 0.5 mL (0.75 mg total) under the skin every 7 days., Disp: 6 mL, Rfl: 3

**Patient Active Problem List**

**Diagnosis:**

- Actinic keratosis
- Asthma

Progress Notes by Vadlamudi, Phani Deepthi, MD at 11/20/2017 4:20 PM (continued)

### Assessment/Plan

Diagnosis	Plan
1. Type 2 diabetes mellitus without complication, without long-term current use of insulin (CMS/HCC)	dulaglutide (TRULICITY) 0.75 mg/0.5 mL pen injector
2. Left flank pain	POCT glycosylated hemoglobin (Hb A1C)
3. Benign essential hypertension	POCT urinalysis dipstick
4. Hypercholesterolemia <sup>[PV.1]</sup>	

1. Type 2 diabetes, uncontrolled. A1c today is up from last time at 9.6. Unfortunately, the pills she is on are not helping and she is not able to tolerate metformin. Informed the patient we will try Trulicity as the patient already found out that it is cheaper than Victoza. Discussed with the patient about online coupons. If she is going to get Trulicity, stop Januvia, but continue glipizide and follow up with diabetic educator for further monitoring and need for adjusting. Started at a low dose right now, can go to 1.5 as tolerated. Side effects of Trulicity discussed with the patient.
2. Hypertension, stable.
3. Dyslipidemia. Labs are all updated as of 07/2017, reviewed with the patient.
4. Left flank pain. Urinalysis in the office has been fine. UTI has resolved. Suspect musculoskeletal pain, discussed with the patient.

Followup in 3 months or earlier p.r.n.<sup>[PV.4]</sup>

C counseled Patient/Family: Diagnosis, Prescribed meds and Lab/Diagnostic tests

Discussed with: Patient

Disposition: Home

Condition: Stable

If your provider ordered testing, most test results are available within 14 days after your visit. Your results will be communicated to you by the provider who ordered your test. If you haven't received your results within that timeframe, please contact the provider who ordered your test.

Patient understands and agrees with the plan<sup>[PV.2]</sup>

### New Medications Ordered This Visit

#### Medications

- dulaglutide (TRULICITY) 0.75 mg/0.5 mL pen injector  
Sig: Inject 0.5 mL (0.75 mg total) under the skin every 7 days.  
Dispense: 6 mL  
Refill: 3<sup>[PV.1]</sup>

**Subjective**<sup>[PV.1]</sup>

Patient: <sup>[PV.2]</sup> Terresa L Slocum<sup>[PV.1]</sup> is a <sup>[PV.2]</sup> 54 y.o. female<sup>[PV.1]</sup>.

**Chief Complaint:**<sup>[PV.2]</sup>

**Chief Complaint**

Patient presents with

- Numbness

*L hand numbness, thumb tendon snaps, same in feet. Has same issue with R hand but not as bad. has been going on about 6 months getting worse not better*<sup>[PV.1]</sup>

**HPI:**

HPI<sup>[PV.2]</sup>

The patient is a 54-year-old female with history of uncontrolled type 2 diabetes, hypertension, dyslipidemia, obesity, carpal tunnel syndrome here with complaints as below.

1. Bilateral hand numbness, but more so on the left side. The patient is right-handed. She works as a phlebotomist and, when she is getting blood drawn when tying the tourniquet, she can feel her left thumb tendon snap and can feel the numbness along the left thumb and index finger. Same issue with the right hand, but not as bad. It has actually gotten much worse over the last 6 months and not getting better. She was told to have carpal tunnel in the past and she was using a cockup wrist splint p.r.n. That seemed to take care of it, but not recently. She denies any other injury. She had no other surgeries done on the wrist.
2. Diabetes, uncontrolled. She is on glipizide and recently started on Trulicity 3 months ago. She has not had an A1c done since then. She did not have any blood sugar numbers report initially. It looked like they were helping her, but not lately. She is seeing some 200s.
3. Right foot pain. The tendon on the bottom of the foot feels like there is a lump on it. She has a history of plantar fasciitis, with seeing a podiatrist and had physical therapy, cortisone shots, etc., done but this does not feel like plantar fasciitis. It is actually the bottom of the right foot that has been getting painful. Because of her job, she is on her feet most of the day.<sup>[PV.3]</sup>

**Assessment/Plan**

Diagnosis	Plan
1. Bilateral hand numbness	Comprehensive metabolic panel Hemoglobin A1c Lipid panel
2. Right foot pain	
3. Type 2 diabetes mellitus without complication, without long-term current use of insulin (CMS/HCC)	Comprehensive metabolic panel Hemoglobin A1c Lipid panel
4. Hypercholesterolemia	Comprehensive metabolic panel Hemoglobin A1c Lipid panel[PV.1]

1. Bilateral hand numbness, especially in the left thumb and index finger area, question of carpal tunnel syndrome. We will check EMG and nerve conduction study and follow up. Reviewed various pain medication treatment options for the numbness and pain. She is unfortunately allergic to all anti-inflammatories. She is not sure if she has taken tramadol or not. Next, her options would be gabapentin, Lyrica or amitriptyline. We will wait until the test results before we choose on any treatment. The patient is reluctant to be on any daily medications and requests something p.r.n.
2. Right foot pain. Foot exam today is normal. In view of her diabetes, referral done to podiatry for diabetic foot check and followup on the right foot pain. Proper footwear discussed with patient.
3. Check A1c, lipids and comp and followup on her diabetes.
4. Continue wearing cock-up wrist splints, especially at nighttime and see if that helps.[PV.3]

- Other

*R knee issue*<sup>[PV.1]</sup>

**HPI:**<sup>[PV.2]</sup>

Hurts medial rt knee, especially with changing positions and going downstairs

**Knee Pain**

There was no injury mechanism. The pain is present in the right knee. The quality of the pain is described as aching. The pain is at a severity of 4/10. The pain is moderate. The pain has been fluctuating since onset. Pertinent negatives include no loss of sensation, muscle weakness, numbness or tingling. The symptoms are aggravated by palpation, weight bearing and movement. She has tried nothing for the symptoms. The treatment provided mild relief.

**Review of Systems**

Neurological: Negative for tingling and numbness.<sup>[PV.3]</sup>

---

Evaluation by Wenzel, Frances, PT at 1/24/2019 4:48 PM (continued)

---

Based on the following information this patient presents as [FW.1] Low [FW.3] complexity [FW.1]  
This patient presented with No personal Factors or comorbidities that would impact the plan of care.  
The examination of body systems revealed 1-2 elements that will be addressed in the plan of care.  
This patient's clinical presentation included stable and/or uncomplicated characteristics.  
The clinical decision making for this patient was of low complexity [FW.3]

**Session Time:**

Total Timed Base Calculation: 15 Minutes

Total Session Time: 40 Minutes

**Subjective:**

**General**

Additional Pertinent History: Reports that last summer, she knelt on her right knee on the couch and felt a "ripping, tearing pain." Tried a yoga class recently, but couldn't do child's pose. Does remember pain in right knee years ago. Patient runs and walks, but doesn't feel it then. Ran 2 miles on TM last weekend, and didn't have any issues. Going down is more painful than going up. Has to go up/down stairs one at a time because of "short legs." Also reports her dog ran into her knee last summer which did hurt. 25 years ago fell into a manhole. Reports some pain in the middle of the night. Driving does bother her knee. [FW.1] Does [FW.2] light weight lifting [FW.1] at home. Enjoys running when the weather is conducive. [FW.2]

Response to Previous Treatment: Patient with no complaints from previous session.

Family/Caregiver Present: No

**Reported Pain**

**Pain Assessment**

Pain Assessment: 0-10 [FW.1]

Pain Rating: anywhere from 0-10 depending on the activity [FW.2]

Pain Descriptors: Burning [FW.1]

Pain location: medial and inferior aspect of right knee [FW.2]

Effect of Pain on Daily Activities: can't kneel at all

**Objective:**

**Strength/ROM**

AROM RLE (degrees)

R Knee Flexion 0-140: 125

R Knee Extension 0-130: 0

AROM LLE (degrees)

L Knee Flexion 0-140: 130

L Knee Extension 0-130: 0

**Mobility** [FW.1]

No significant gait deviations. Patient unable to perform deep squat, or kneel without increased pain [FW.2] in the inferior portion of her patella. [FW.4]

Physical Therapy: MyMichiganSlocum, Terresa L  
Medical Offices Clare MRN: 1000134674, DOB: 8/28/1963, Legal Sex: F  
602 Beech Street Acct #: 3000468364  
Clare MI 48617-1466 Adm: 1/24/2019, D/C: 1/24/2019  
Notes

---

Evaluation by Wenzel, Frances, PT at 1/24/2019 4:48 PM (continued)

---

N<sup>[FW.2]</sup>euro/Postural Control/Coordination<sup>[FW.1]</sup>

SLS: good<sup>[FW.2]</sup>

Exercise/Activity<sup>[FW.1]</sup>

**Home Exercises**

- Supine Quad Set - 10 reps - 2 sets - 3 second hold - 1x daily
- Clamshell with Resistance - 10 reps - 2 sets - 1x daily
- Also discussed ascending stairs using her hip extensors more so than quads<sup>[FW.5]</sup>

**Assessment:**<sup>[FW.1]</sup>

Patient presents to evaluation with pain and slight decrease in ROM of her right knee but otherwise good strength. Based on pain location, she may be experiencing some patellar tendonitis as special tests do not indicate significant meniscal or lateral collateral ligament pathology. Patient is a good candidate for skilled PT services for eccentric strengthening of her quadriceps to decrease<sup>[FW.6]</sup> stress<sup>[FW.4]</sup> through patellar tendon. Based on patient's current level of fitness, motivation and their absence of compounding co-morbidities, the level of complexity for this evaluation was deemed low.<sup>[FW.6]</sup>

**Goals**

**1. Physical Therapy- Long Term Goal 1**

Patient will report an overall reduction in pain to no greater than 2/10 during a regular days' activities.

Goal to be met in 6weeks

**2. Physical Therapy- Long Term Goal 2**

Patient will be able to kneel onto her right knee for a few seconds without significant increase in pain in order to allow her to perform yoga positions that help reduce her stress and improve overall well-being.

Goal to be met in 6weeks

**3. Physical Therapy- Long Term Goal 3**

Patient will report being able to sleep at least 6 consecutive hours without waking due to pain.

Goal to be met in 6weeks

Physical Therapy: MyMichiganSlocum, Terresa L  
Medical Offices Clare  
602 Beech Street  
Clare MI 48617-1466  
Notes  
MRN: 1000134674, DOB: 8/28/1963, Legal Sex: F  
Acct #: 3000468364  
Adm: 1/24/2019, D/C: 1/24/2019

Evaluation by Wenzel, Frances, PT at 1/24/2019 4:48 PM (continued)

#### 4. Physical Therapy- Long Term Goal 4

Patient will be able to descend a step using the right knee without increased pain and without significant increase in genu valgum or varum.

Goal to be met in 6 weeks

#### 5. Physical Therapy- Short Term Goal 1

The patient will be independent and compliant with a home exercise program, and will verbalize understanding of appropriate progressions to the program.

Goal to be met in 2 weeks<sup>[FW.7]</sup>

#### Plan:<sup>[FW.1]</sup>

Patient to be seen in the clinic 1-2 times a week for up to 6 weeks with assessment for continued need along way. Patient will be treated with the following therapeutic interventions:

1. Therapeutic exercises for strength and range of motion
2. Manual therapy for soft tissue restrictions and joint mobility
3. Therapeutic activities for body mechanics and posture
4. Neuromuscular re-education for coordinated muscle activation
5. Modalities as needed
6. Home exercise program

Patient expresses agreement and consent with the above stated goals and plan of care.

Thank you very much for this referral. If you have any questions regarding this patient's plan of care, please feel free to contact us at 989-802-5167.<sup>[FW.5]</sup>

Patient Name: <sup>[FW.1]</sup> Terresa L Slocum <sup>[FW.2]</sup>  
DOB: <sup>[FW.1]</sup> 8/28/1963 <sup>[FW.2]</sup>

**Initial Evaluation Date:** 1/24/19

**Onset Date:** 1/23/19 (date of referral)

**Visit Diagnosis:** Right knee pain, decreased ROM right knee

**Visit #:** 2 of 30

**Changes since last visit:** No

**Insurance Authorization/Recertification End Date:** PN due 2/22/19

**Patient Subjective:** Patient denies any improvement in symptoms. Has been doing her HEP and has been trying to go up stairs slower, but no change.

**Pain:** 5/10

**Pain Description:** burning

**Location:** patellar tendon region and just medial

**Objective:**

Functional Limitations	Treatments
Pain, Decreased ROM	Manual therapy techniques, Therapeutic exercises - see log, Modalities for pain: Estim, Cold pack

**Treatment Log**

Treatment Activity:				
1/31/19				
IFC with 4				

Physical Therapy: MyMichiganSlocum, Teresa L  
Medical Offices Clare  
UNIVERSITY OF MICHIGAN HEALTH 602 Beech Street  
Clare MI 48617-1466  
Notes  
MRN: 1000134674, DOB: 8/28/1963, Legal Sex: F  
Acct #: 3000468364  
Adm: 1/31/2019, D/C: 1/31/2019

Therapy Treatment Note by Wenzel, Frances, PT at 1/31/2019 11:59 PM (continued)

electrodes, no ice pack. Right knee x20 minutes (18 minutes treat, 2 minutes set up)				
Attempted eccentric leg press right leg only but D/C due to pain				
Leg press, seat 3 70# double leg press, x4 minutes				

**Assessment:**

In attempting single leg eccentric leg press, (double leg press, single leg return) patient experienced the "burning" pain that she has during the day. When we switched the exercise to double leg concentric press, she had less pain though still present.

Patient will benefit from continued skilled physical therapy.

**Plan:**

Plan for next visit: Depending on patient's report of how she felt after IFC, may consider IFC again or pulsesd ultrasound to patellar tendon. May consider low weight NK table or weight SLR for quad strengthening. May consider Ktape

**Session Time:**

total session time: 32 minutes

Time-based calculation: 32 minutes

## Physical Therapy

### Outpatient Discharge Note

Patient Name: [FW.1] Terresa L Slocum [FW.2]

DOB: [FW.1] 8/28/1963 [FW.2]

Diagnosis: right knee pain [FW.3]

Today's Date: [FW.1] 2/14/2019 [FW.2]

Date of evaluation: 1/24/19

Dates of treatment: 1/31, 2/04, 2/07, 2/14 [FW.3]

Session Time: [FW.1]

Total Timed Base Calculation: 26 Minutes [FW.2]

#### Subjective [FW.1]-[FW.4]

Patient continues to report pain that limits her from kneeling on her knee [FW.3]. Otherwise, the pain is minimal when she is walking and/or running. [FW.5]

#### Objective: [FW.1]

S [FW.3] strength/ROM [FW.1]

AROM RLE (degrees)

R Knee Flexion 0-140: 131

AROM LLE (degrees)

L Knee Flexion 0-140: 136 [FW.2]

Notes

---

Therapy Discharge Note by Wenzel, Frances, PT at 2/14/2019 4:42 PM (continued)

---

Mobility<sup>[FW.1]</sup>

No significant gait deviations<sup>[FW.3]</sup>

Exercise/Activity<sup>[FW.1]</sup>

reviewed patient's home exercise program and emphasized the importance of glute and extension strengthening to stabilize the knee<sup>[FW.5]</sup>

Assessment:<sup>[FW.1]</sup>

Patient has been seen for 4 treatment sessions since initial evaluation. During that time we have worked on general hip strengthening exercise to decrease stress placed through her right knee. However, patient has not experienced any change in her pain. Her limitations from her knee pain include pain, but otherwise patient has full function of her right LE. She is able to perform<sup>[FW.3]</sup> higher level strengthening and balance activities on her right LE without pain provocation. Based on the location and behavior of pain, there is likely minor soft tissue pathology causing her pain, suspect possible meniscus lesion. As patient has not had any change in her symptoms with 1 month of PT, she will be discharged to her HEP at this time.<sup>[FW.5]</sup>

Plan:<sup>[FW.1]</sup>

Patient will be discharged at this time as the deficits related to her diagnosis have been addressed through her home exercise program.<sup>[FW.3]</sup>

Location: CRM1 OB AND GYN Date Received: 2/22/2019 Gender: F Service:  
Reported: 2/25/2019 Physician(s): SARAH SOKOLOV PA  
Other Inst: Bill #: 45958338\10001

Final Pathologic Diagnosis

Endometrium, biopsy; atrophic appearing endometrium with hemorrhage and breakdown changes. No hyperplasia or malignancy is noted.

ajf/2/25/2019

Electronically Signed Out

Daniel W. Wunderlich M.D.

Signed: 2/25/2019 14:54:19

Microscopic Description

Fragments of endometrium consisting of fragmented bits of endometrial glands and endometrial stroma with hemorrhage and breakdown changes. No hyperplasia or malignancy is noted. There is no significant intact endometrial tissue on this sample.

Specimen(s) Received

Endo biopsy

Pre-Operative Diagnosis

Postmenopausal bleeding

Gross Description

Specimen labeled, "endometrium." The specimen consists of scant bits of tissue c cc in aggregate. Bits ns, 1 cassette.

tsp/2/22/2019 Daniel W. Wunderlich M.D.

CPT Codes

A: 88305<sup>[PV.1]</sup>

Results for orders placed during the hospital encounter of 03/06/19  
Ultrasound pelvic complete w transvaginal

Impression      *Borderline thickening of the endometrial stripe measuring 4 to 5 mm in thickness. Consider tissue sampling for further evaluation.*

**Subjective<sup>[JW.1]</sup>**

Patient<sup>[JW.2]</sup> Terresa L Slocum<sup>[JW.1]</sup> is a<sup>[JW.2]</sup> 56 y.o. female<sup>[JW.1]</sup>.

**Chief Complaint<sup>[JW.2]</sup>**

**Chief Complaint**

Patient presents with

- ED Follow Up<sup>[JW.1]</sup>

**HPI:**

HPI

Patient presents today for follow-up ED visit. Patient went to the ED in<sup>[JW.2]</sup> Midland<sup>[JW.3]</sup> yesterday for abdominal pain.<sup>[JW.2]</sup>

Patient states onset of pain was on Sunday, 3/1/2020. She states the pain was of right upper quadrant, more posterior. She had one emesis on Sunday, feels it was related to the severe pain. She states the pain did not let up, continued on through Tuesday, late Tuesday night and early Wednesday morning the pain seemed to radiate around to anterior right upper quadrant, around umbilicus, slightly to the left upper quadrant and then now it is present again in the right upper quadrant only, more posterior. She also admits to very poor appetite, has only had fluids today, 16 ounces of water, sugar-free Sprite, juice. She was nauseated this morning, was completely alleviated with Zofran. She is also taking Bentyl as ordered by the ED for the pain. she states she

---

Progress Notes by Walderzak, Jamie, PA at 3/5/2020 4:00 PM (continued)

---

also became pale, cold/clammy, and vomited which made her go to the emergency department. She has not had that happen today.

She denies any fevers. She denies any chest pain, has some chronic allergies/cough. She denies any hemoptysis, dyspnea. She denies any history of blood clots. She does have a history of renal calculi, denies any hematuria, flank pain, dysuria, difficulty urinating.

She denies having alcohol recently, did have some beer on Sunday, 3/1/2020. Denies any left upper quadrant pain radiating to back or history of pancreatitis. She had a normal lipase. She does have a history of diabetes mellitus.

Patient has history of fatty liver she states, unsure of hepatitis immunizations, does have elevated transaminases, no jaundice. She is status post cholecystectomy.

Patient has history of diverticulosis, did have sigmoidectomy because of diverticulitis, is denying any melena, hematochezia, last bowel movement was 2 days ago and admits to constipation at that time. She did try a stool softener. She wonders what else to take to get her bowels to move.

She has had many abdominal surgeries, cholecystectomy, gastric sleeve, sigmoidectomy, ovarian cystectomy, hernia repair, appendectomy, is denying any previous problems with adhesions but is aware that these are possible complications.<sup>[JW.3]</sup>

CT of abdomen pelvis demonstrated mild hepatomegaly<sup>[JW.2]</sup> and angiomyolipoma<sup>[JW.3]</sup>, stable exophytic complex 2 cm right renal cyst, status post gastric sleeve, status post sigmoidectomy, nonobstructed left nephrolithiasis, diverticulosis no evidence of diverticulitis, nonspecific bowel wall thickening enteritis not excluded<sup>[JW.2]</sup>.

CMP demonstrated elevated transaminases, elevated glucose level, patient states glucose today was 107 and she reports last hemoglobin A1c in April was 6.1.

#### Review of Systems

Constitutional: Positive for appetite change and chills (**Sunday and Wednesday none today**). Negative for activity change and fever.

HENT: Positive for rhinorrhea.

Eyes: Negative for scleral icterus.

Respiratory: Positive for cough. Negative for hemoptysis, dyspnea at rest and dyspnea with exertion.

Cardiovascular: Negative for chest pain and leg swelling.

Gastrointestinal: Positive for abdominal pain, constipation and nausea. Negative for abdominal distention, anal bleeding, blood in stool, diarrhea and vomiting (**Sunday and Wednesday**).

Genitourinary: Negative for bladder incontinence, decreased urine volume, difficulty urinating, dysuria, flank pain, frequency, hematuria, pelvic pain, urgency and vaginal pain.

Musculoskeletal: Positive for back pain (**Admits to some chronic low back pain with intermittent sciatica asks for exercises**). Negative for myalgias.

Skin: Negative for rash and wound.

Allergic/Immunologic: Positive for environmental allergies.

Neurological: Negative for dizziness, light-headedness and headaches.<sup>[JW.3]</sup>

---

#### Patient Active Problem List

**Objective**<sup>[JW.1]</sup>

**COMPARISON:**  
CT ABDOMEN PELVIS W/WO CONTRAST 8/30/2018 5:37 PM

**FINDINGS:**

Liver: 6 mm angiomyolipoma in the right hepatic lobe. Mild hepatomegaly.  
Gallbladder and bile ducts: Status post cholecystectomy.  
Pancreas: Normal. No ductal dilation.  
Spleen: Normal. No splenomegaly.  
Adrenals: Normal. No mass.  
Kidneys and ureters: Nonobstructive left nephrolithiasis. No hydronephrosis.  
Stable exophytic complex 2 cm right renal cyst.  
Stomach and bowel: Status post gastric sleeve. Status post sigmoidectomy with intact anastomosis at the rectosigmoid junction. Diverticulosis of the colon.  
No evidence of acute diverticulitis. Mild nonspecific bowel wall thickening involving several small bowel loops likely reflecting under distension.  
Enteritis cannot be completely excluded.  
Appendix: Status post appendectomy.  
Intraperitoneal space: Unremarkable. No free air. No significant fluid collection.  
Vasculation: Unremarkable. No abdominal aortic aneurysm.  
Lymph nodes: Unremarkable. No enlarged lymph nodes.

Bladder: Unremarkable as visualized.  
Reproductive: Unremarkable as visualized.  
Bones/joints: Degenerative changes in the bilateral sacroiliac joints.  
Multilevel degenerative disease and facet hypertrophy of the lumbar spine.  
Stenosis of the spinal canal and neural foramina at several levels.  
Soft tissues: Unremarkable.

**IMPRESSION:**

Mild hepatomegaly.  
Nonobstructive left nephrolithiasis. No hydronephrosis.  
Diverticulosis of the colon. No evidence of acute diverticulitis.  
Mild nonspecific bowel wall thickening involving several small bowel loops likely reflecting under distension. Enteritis cannot be completely excluded.

**Urinalysis with microscopic (clean catch)**

Physical Exam

Constitutional: She is oriented to person, place, and time. She appears well-developed. She has a normal appearance. She does not appear ill. No distress.

HENT:

Head: Normocephalic and atraumatic.

Ears:

Right Ear: Tympanic membrane normal.

Left Ear: Tympanic membrane normal.

Nose: Rhinorrhea and congestion present.

Mouth/Throat: Mucous membranes are moist. No oropharyngeal exudate or posterior oropharyngeal erythema.

Eyes: Pupils are equal, round, and reactive to light. Conjunctivae are normal. No scleral icterus. Extraocular movement intact.

Neck: Normal range of motion. Neck supple. No neck rigidity.

Cardiovascular: Normal rate, regular rhythm, S1 normal, S2 normal and normal heart sounds.

Pulmonary/Chest: Effort normal and breath sounds normal.

Abdominal: Soft. Bowel sounds are normal. She exhibits no distension, no pulsatile midline mass and no mass. There is no abdominal tenderness. There is no rigidity, no rebound, no guarding, no tenderness at McBurney's point and negative Murphy's sign. No hernia.

Musculoskeletal: Normal range of motion.

**Procedures** [JW.2]

**Assessment/Plan**

- |   |   |
|---|---|
| 1. Constipation, unspecified constipation type  | Hepatic function panel                                  |
| 2. Elevated transaminase level  | Hepatitis Screen (Past Exp/Immun)                       |
| 3. Hepatic steatosis  | Hepatic function panel                                  |
| 4. RUQ abdominal pain   | Hepatitis Screen (Past Exp/Immun)                       |
| 5. Nausea   | Hepatic function panel                                  |
| 6. Healthcare maintenance   | Hepatitis Screen (Past Exp/Immun)                       |
| 7. SI joint arthritis   | ondansetron ODT (Zofran ODT) 4 mg disintegrating tablet |
| 8. Spinal stenosis of lumbar region, unspecified whether neurogenic claudication present [JW.1] | Hepatitis Screen (Past Exp/Immun)                       |

Abdominal pain, posterior/right upper quad— refilled Zofran, has not Bentyl, high-fiber diet, yogurt to help with enteritis, report if symptoms worsen over the next few days, ER precautions discussed

Hepatic steatosis, elevated transaminases—repeat hepatic function panel

Constipation—high-fiber diet, counseling, see after visit summary

Patient complained of noticing she had some lower back pain/sciatica in the past and saw spinal stenosis and CT results, we discussed the pathophysiology of this, discussed various treatments including exercises and for severe progressed stenosis surgery, recommended patient to do exercises, consider physical therapy, she would like to try exercises at home will print out and give to her. We will also print off and mail her SI joint exercises. [JW.3]

Editor: Vadlamudi, Phani Deepthi, MD (Physician)

**Subjective<sup>[PV.1]</sup>**

**Patient:**<sup>[PV.2]</sup> Terresa L Slocum<sup>[PV.1]</sup> is a<sup>[PV.2]</sup> 57 y.o. female<sup>[PV.1]</sup>.

**Chief Complaint:**<sup>[PV.2]</sup>

**Chief Complaint**

**Patient presents with**

- Annual Exam
- Diabetes
- Asthma<sup>[PV.1]</sup>

**HPI:**<sup>[PV.2]</sup>

She sees GYN for PPB<sup>[PV.3]</sup>

**MM HM, Adult Female:** The patient is being seen for a health maintenance evaluation. The last health maintenance visit was<sup>[PV.2]</sup> 2019<sup>[PV.3]</sup>.

**General Health:** The patient's health since the last visit is described as fair. She has irregular dental visits.

---

**Progress Notes by Vadlamudi, Phani Deepthi, MD at 10/19/2020 3:20 PM (continued)**

---

She admits to vision problems. Vision care includes<sup>[PV.2]</sup> eye check ups<sup>[PV.3]</sup>. She<sup>[PV.2]</sup> denies<sup>[PV.3]</sup> hearing loss. **Life Style:** She has<sup>[PV.2]</sup> normal<sup>[PV.3]</sup> diet. She has<sup>[PV.2]</sup> some<sup>[PV.3]</sup> weight concerns. She exercises by walking<sup>[PV.2]</sup> and does step counting.<sup>[PV.3]</sup>

**Reproductive Health:** The patient is postmenopausal. She<sup>[PV.2]</sup> is<sup>[PV.3]</sup> sexual active. She<sup>[PV.2]</sup> is<sup>[PV.3]</sup> monogamous with a male. Pregnancy history:<sup>[PV.2]</sup> G3P2<sup>[PV.3]</sup>.

**Screening:** Cervical cancer screening includes:<sup>[PV.2]</sup> PAP<sup>[PV.3]</sup>. Breast cancer screening includes:<sup>[PV.2]</sup> MAMMI<sup>[PV.3]</sup>. Colorectal cancer screening includes:<sup>[PV.2]</sup> CRC<sup>[PV.3]</sup>. Metabolic screening includes:<sup>[PV.2]</sup> LABS<sup>[PV.3]</sup>.

**Additional History:** <sup>[PV.2]</sup> DM- s/p bariatric surgery, gaining weight unable to stay at goal weight of 128-130 lbs. Due for labs. Adherent to current meds<sup>[PV.3]</sup>

Pt in healthcare and would like to be screened for covid antibodies.

She was sick in march<sup>[PV.4]</sup>

**Review of Systems**

**Constitutional:** Negative for fatigue, fever and unexpected weight change.

**HENT:** Negative.

**Eyes:** Negative for blurred vision.

**Respiratory:** Negative. Negative for cough and wheezing.

**Cardiovascular:** Negative for chest pain and palpitations.

**Gastrointestinal:** Negative.

**Breast:** Negative.

**Genitourinary:** Negative. Negative for bladder incontinence and dysuria.

**Musculoskeletal:** Negative.

**Skin:** Negative for rash and skin lesions.

**Neurological:** Negative.

**Psychiatric/Behavioral:** Negative.<sup>[PV.3]</sup>

The following have been reviewed by the Provider during this visit:

I have reviewed the following and agree: Chief complaint, ROS, Past, Family, Social History and Immunizations[PV.2]

**Vitals:**

10/19/20 1524

BP: 135/78

Blood Pressure Right arm

**Location:**

Patient Sitting

**Position:**

Pulse: 86

Temp: 98.2 °F (36.8 °C)

SpO2: 99%

Weight: 150 lb 9 oz (68.3 kg)

Height: 4' 11" (1.499 m)

**Objective**[PV.1]

**Physical Exam**

**Constitutional**

General appearance: No acute distress.

**Eyes**

Conjunctiva and lids: Normal.

Pupils, Irises and Sclerae: PERRL, EOM's intact, sclerae normal.

**Ears, Nose, Mouth, and Throat**

External inspection of ears and nose: No lesions.

Nasal mucosa, septum, and turbinates: No lesions or discharge.

Otoscopic examination: Canals clear, TM's normal.

Oropharynx: Pink and moist, without erythema or exudate. No tonsil enlargement.

**Neck**

Examination of the neck: Supple, no masses.

Examination of thyroid: Normal size, without nodules or tenderness.

**Pulmonary**

Respiratory effort: Normal.

Auscultation of lungs: Clear without wheezes, rhonchi or rales.

**Cardiovascular**

**Progress Notes by Vadlamudi, Phani Deepthi, MD at 10/19/2020 3:20 PM (continued)**

Auscultation of heart: RRR without murmur, gallop or rub, nl S1 S2.

Extremities: No edema or varicosities noted.

**Abdomen**

Abdomen: non-distended, non-tender, without masses.

Liver and spleen: No HSM.

**Breast**

**Genitourinary**<sup>[PV.2]</sup>

Deferred<sup>[PV.3]</sup>

**Lymphatic**

Palpation of lymph nodes in neck: Normal.

Palpation of lymph nodes in axillae: Normal.

**Musculoskeletal**

Gait and station: Normal.

Digits and nails: No clubbing, or cyanosis.

Inspection/palpation of joints, and bones: Normal.

**Skin**

Skin and subcutaneous tissue: No rashes or suspicious lesions.

Palpation of skin and subcutaneous tissue: Warm and dry.

**Psychiatric**

Orientation to person, place, and time: Normal.

Mood and affect: Normal.<sup>[PV.2]</sup>

The following have been reviewed by the Provider during this visit:

I have reviewed the following and agree: Chief complaint, ROS, Past, Family, Social History and Immunizations<sup>[PV.2]</sup>

**Vitals:**

	11/03/21 0820
BP:	133/79
Pulse:	69
Resp:	16
Temp:	98 °F (36.7 °C)
SpO2:	100%
Weight:	137 lb (62.1 kg)
Height:	4' 11" (1.499 m)

**Objective<sup>[PV.1]</sup>**
**Physical Exam**

---

**Progress Notes by Vadlamudi, Phani Deepthi, MD at 11/3/2021 8:00 AM (continued)**

---

**Constitutional**

General appearance: No acute distress.

**Eyes**

Conjunctiva and lids: Normal.

Pupils, Irises and Sclerae: PERRL, EOM's intact, sclerae normal.

**Ears, Nose, Mouth, and Throat**

External inspection of ears and nose: No lesions.

Nasal mucosa, septum, and turbinates: No lesions or discharge.

Otoscopic examination: Canals clear, TM's normal.

Oropharynx: Pink and moist, without erythema or exudate. No tonsil enlargement.

**Neck**

Examination of the neck: Supple, no masses.

Examination of thyroid: Normal size, without nodules or tenderness.

**Pulmonary**

Respiratory effort: Normal.

Auscultation of lungs: Clear without wheezes, rhonchi or rales.

**Cardiovascular**

Auscultation of heart: RRR without murmur, gallop or rub, nl S1 S2,

Extremities: No edema or varicosities noted.

**Abdomen**

Abdomen: non-distended, non-tender, without masses.

Liver and spleen: No HSM.

**Breast****Genitourinary****Deferred****Lymphatic**

Palpation of lymph nodes in neck: Normal.

Palpation of lymph nodes in axillae: Normal.

**Musculoskeletal**

Gait and station: Normal.

Digits and nails: No clubbing, or cyanosis.

Inspection/palpation of joints, and bones: Normal.

**Skin**

Skin and subcutaneous tissue: No rashes or suspicious lesions.

Palpation of skin and subcutaneous tissue: Warm and dry.

**Psychiatric**

Orientation to person, place, and time: Normal.

Mood and affect: Normal.<sup>[PV:2]</sup>

**Results for orders placed or performed during the hospital encounter of 10/27/21**

**Basic Metabolic Panel, Fasting**

**Subjective**

Patient: <sup>[JS.1]</sup> Terresa L Slocum <sup>[JS.2]</sup> is a <sup>[JS.1]</sup> 59 y.o. female <sup>[JS.2]</sup>.

**Chief Complaint:** <sup>[JS.1]</sup>

**Chief Complaint**

Patient presents with:

- Spasms
- Tremors <sup>[JS.2]</sup>

**HPI:** <sup>[JS.1]</sup> The patient presents today for some concerns about possible tremors and/or muscle spasms. States that it has been ongoing, maybe the last couple of weeks. Describes it as an internal vibration throughout her whole body. States that initially she would wake up feeling this, but now she is having it during the day. There is no obvious tremor. No muscle fasciculations. She has no history of stroke, is status post cardiac ablation years ago for SVT. She reports no seizures or head trauma. States that it can range from her stomach to her left foot. She does report some reflux, had to take some Bentyl over the weekend, states that this is rare. She does not smoke. Rare alcohol, does not do drugs. She does get water as well as coffee. She is postmenopausal. Denies any possibility of pregnancy. Did report COVID in May. Denies any known family history of tremors, Parkinson's disease or essential tremor. <sup>[JS.3]</sup>

**HPI**

**Review of Systems**

Constitutional: Negative for chills <sup>[JS.1]</sup> and <sup>[JS.4]</sup> fever <sup>[JS.1]</sup>.

HENT: Negative for <sup>[JS.4]</sup> congestion <sup>[JS.1]</sup>, <sup>[JS.4]</sup> ear pain <sup>[JS.1]</sup>, <sup>[JS.4]</sup> hearing loss <sup>[JS.1]</sup>, <sup>[JS.4]</sup> rhinorrhea <sup>[JS.1]</sup>, <sup>[JS.4]</sup> sinus pressure <sup>[JS.1]</sup>, <sup>[JS.4]</sup> sore throat <sup>[JS.1]</sup>, <sup>[JS.4]</sup> tinnitus <sup>[JS.1]</sup> and <sup>[JS.4]</sup> facial pain <sup>[JS.1]</sup>.

Eyes: Negative for <sup>[JS.4]</sup> blurred vision <sup>[JS.1]</sup>, <sup>[JS.4]</sup> double vision <sup>[JS.1]</sup>, <sup>[JS.4]</sup> photophobia <sup>[JS.1]</sup> and <sup>[JS.4]</sup> discharge <sup>[JS.1]</sup>.

Respiratory: Negative for <sup>[JS.4]</sup> cough <sup>[JS.1]</sup>, <sup>[JS.4]</sup> chest tightness <sup>[JS.1]</sup>, <sup>[JS.4]</sup> wheezing <sup>[JS.1]</sup> and <sup>[JS.4]</sup> dyspnea with exertion <sup>[JS.1]</sup>.

Cardiovascular: Negative for <sup>[JS.4]</sup> chest pain <sup>[JS.1]</sup>, <sup>[JS.4]</sup> palpitations <sup>[JS.1]</sup> and <sup>[JS.4]</sup> leg swelling <sup>[JS.1]</sup>.

Gastrointestinal: Negative for <sup>[JS.4]</sup> abdominal pain <sup>[JS.1]</sup>, <sup>[JS.4]</sup> constipation <sup>[JS.1]</sup>, <sup>[JS.4]</sup> diarrhea <sup>[JS.1]</sup>, <sup>[JS.4]</sup> heartburn <sup>[JS.1]</sup>, <sup>[JS.4]</sup> nausea <sup>[JS.1]</sup> and <sup>[JS.4]</sup> vomiting <sup>[JS.1]</sup>.

Endocrine: Negative for <sup>[JS.4]</sup> cold intolerance <sup>[JS.1]</sup>, <sup>[JS.4]</sup> heat intolerance <sup>[JS.1]</sup> and <sup>[JS.4]</sup> hot flashes <sup>[JS.1]</sup>.

Genitourinary: Negative for <sup>[JS.4]</sup> dysuria <sup>[JS.1]</sup>, <sup>[JS.4]</sup> frequency <sup>[JS.1]</sup>, <sup>[JS.4]</sup> hematuria <sup>[JS.1]</sup>, <sup>[JS.4]</sup> urgency <sup>[JS.1]</sup> and <sup>[JS.4]</sup> vaginal discharge <sup>[JS.1]</sup>.

Musculoskeletal: Positive for <sup>[JS.4]</sup> myalgias <sup>[JS.1]</sup>, Negative for <sup>[JS.4]</sup> arthralgias <sup>[JS.1]</sup>.

Skin: Negative for <sup>[JS.4]</sup> rash <sup>[JS.1]</sup>.

Neurological: Negative for <sup>[JS.4]</sup> dizziness <sup>[JS.1]</sup>, <sup>[JS.4]</sup> seizures <sup>[JS.1]</sup>, <sup>[JS.4]</sup> syncope <sup>[JS.1]</sup>, <sup>[JS.4]</sup> light-headedness <sup>[JS.1]</sup> and <sup>[JS.4]</sup> confusion <sup>[JS.1]</sup>.

Hematological: <sup>[JS.4]</sup> Does not bruise/bleed easily <sup>[JS.1]</sup>.

Psychiatric/Behavioral: Negative for <sup>[JS.4]</sup> confusion <sup>[JS.1]</sup>, <sup>[JS.4]</sup> depression <sup>[JS.1]</sup>, <sup>[JS.4]</sup> self-injury <sup>[JS.1]</sup> and <sup>[JS.4]</sup> suicidal ideas <sup>[JS.1]</sup>. The patient <sup>[JS.4]</sup> is not nervous/anxious <sup>[JS.1]</sup>, <sup>[JS.4]</sup>

The following have been reviewed by the Provider during this visit:

I have reviewed the following and agree: Chief complaint, ROS, Past, Family, Social History and Immunizations

**Objective**

Blood pressure 131/75, pulse 74, height 4' 11" (1.499 m), weight 145 lb 8 oz (66 kg), SpO2 98 %. [JS.1]

**Current Outpatient Medications:**

- albuterol sulfate (ProAir RespiClick) 90 mcg/actuation aerosol powdr breath activated, Inhale 2 puffs every 6 (six) hours as needed for wheezing., Disp: 3 each, Rfl: 3
- cetirizine (ZyrTEC) 10 mg tablet, Take 1 tablet by mouth daily as needed., Disp: , Rfl: 0
- dicyclomine (Bentyl) 10 mg capsule, Take 1-2 capsules (10-20 mg total) by mouth every 6 (six) hours as needed (abdominal pain and cramping) for up to 30 doses., Disp: 30 capsule, Rfl: 0
- dulaglutide (Trulicity) 1.5 mg/0.5 mL pen injector, Inject 0.5 mL (1.5 mg total) under the skin every 7 days., Disp: 6 mL, Rfl: 3
- EpiNEPHRINE (EPIPEN) 0.3 mg/0.3 mL injection syringe, Inject 0.3 mL (0.3 mg total) into the shoulder, thigh, or buttocks once as needed for anaphylaxis for up to 1 dose., Disp: 2 Syringe, Rfl: 0
- fluticasone (FLONASE) 50 mcg/actuation nasal spray, Administer 1 spray into each nostril 2 (two) times a day., Disp: , Rfl: 0
- fluticasone propion-salmeterol (advAIR HFA) 115-21 mcg/actuation inhaler, Inhale 2 puffs 2 (two) times a day., Disp: 36 g, Rfl: 1
- FreeStyle Libre 14 Day Sensor kit, SMARTSIG:Topical, Disp: , Rfl: 0
- montelukast (SINGULAIR) 10 mg tablet, Take 1 tablet (10 mg total) by mouth once daily., Disp: 90 tablet, Rfl: 1
- multivitamin (THERAGRAN) tablet, Take 1 tablet by mouth daily., Disp: , Rfl: 0
- rosuvastatin (CRESTOR) 20 mg tablet, Take 1 tablet (20 mg total) by mouth once daily., Disp: 90 tablet, Rfl: 1
- cyclobenzaprine (FLEXERIL) 5 mg tablet, Take 1 tablet (5 mg total) by mouth nightly as needed for muscle spasms., Disp: 30 tablet, Rfl: 0
- hydrOXYzine (Atarax) 25 mg tablet, Take 1-2 PO Q 6 hours PRN itching, Disp: 30 tablet, Rfl: 0
- tamsulosin (Flomax) 0.4 mg 24 hr capsule, Take 1 capsule (0.4 mg total) by mouth daily. (Patient not taking: Reported on 7/8/2022), Disp: 30 capsule, Rfl: 0

**Physical Exam**

Constitutional: She is [JS.2] oriented to person, place, and time [JS.1]. She appears [JS.4] well-developed [JS.1].

HENT:

Head: [JS.4] Normocephalic [JS.1] and [JS.4] atraumatic [JS.1].

Mouth/Throat: [JS.4] Oropharynx is clear and moist [JS.1].

Eyes: [JS.4] Pupils are equal, round, and reactive to light [JS.1].

Neck: [JS.4] Normal range of motion [JS.1], [JS.4] Neck supple [JS.1], [JS.4] No tracheal deviation [JS.1] present.

Cardiovascular: [JS.4] Normal rate [JS.1], [JS.4] regular rhythm [JS.1] and [JS.4] normal heart sounds [JS.1], [JS.4]

No murmur [JS.1] heard.

Pulmonary/Chest: [JS.4] Effort normal [JS.1] and [JS.4] breath sounds normal [JS.1]. No [JS.4] respiratory distress [JS.1].

She has [JS.4] no wheezes [JS.1].

Abdominal: [JS.4] Soft [JS.1], [JS.4] Bowel sounds are normal [JS.1]. She exhibits [JS.4] no mass [JS.1]. There is [JS.4] no

**Assessment/Plan**

1. Muscle spasm

cyclobenzaprine (FLEXERIL) 5 mg tablet

2. Type 2 diabetes mellitus without complication,  
without long-term current use of insulin  
(CMS/HCC)

Comprehensive Metabolic Panel, Non-fasting

Lipid Panel, Non-fasting  
CBC and differential  
Ferritin  
Magnesium  
TSH<sup>[JS.1]</sup>

The patient is afebrile with stable vital signs today, in no acute distress. Neurologically, she is completely intact. There are no signs of tremor, weakness. At this point, unclear etiology of what she is actually experiencing. Will go ahead and rule out metabolic cause by updating her blood work. Does have a history of mild iron deficiency anemia. She is status post gastric sleeve. We will give her some Flexeril to try it at nighttime to see if this helps. There are no red flag or alarm symptoms at this time. She already has short-term followup with PCP over the next few weeks. We will hold off on any EMGs or brain imaging at this time because symptoms are vague and diffuse. Otherwise, all questions were answered. She understands and agrees with the plan.  
[JS.2]

Discussion/Summary Topics:<sup>[JS.3]</sup> Cardiometabolic

C counseled Patient/Family: Diagnosis, Prescribed meds, and Lab/Diagnostic tests

Supervising/Collaboration Physician was VADLAMUDI, PHANI DEEPTHI  
[JS.4]

If your provider ordered testing, most test results are available within 14 days after your visit. Your results will be communicated to you by the provider who ordered your test. If you haven't received your results within that timeframe, please contact the provider who ordered your test.<sup>[JS.5]</sup>

All questions were answered. ER precautions given for any acute changes. They understand and agree with

**Chief Complaint**

Patient presents with

- Annual Exam [PV.2]

**HPI:**

Pt is a 5 [PV.1] g [PV.3] y/o F here for HM and DM recheck. She [PV.1] was [PV.3] seen [PV.1] ing [PV.3] GYN for PPB. She is in 'Day Two' program

**MM HM, Adult Female:** The patient is being seen for a health maintenance evaluation. The last health maintenance visit was 202 [PV.1] 1 [PV.4]

**General Health:** The patients health since the last visit is described as fair. She has regular dental visits. She admits to vision problems. Vision care includes eye check ups. She denies hearing loss.

**Life Style:** She has normal diet. She has some weight concerns. She exercises by walking and very active

**Reproductive Health:** The patient is postmenopausal. She is sexual active. She is monogamous with a male. Pregnancy history: G3P2..

**Screening:** Cervical cancer screening includes: PAP. Breast cancer screening includes: MAMM. Colorectal cancer screening includes: CRC. Metabolic screening includes: LABS.

**Additional History:** DM- s/p bariatric surgery, stable weight [PV.1]

Buzzing feeling [PV.3]

All over body for 'months' worse last 2 weeks, unable to pin point sx

Had covid 5/2022 [PV.4]

**Review of Systems**

**Constitutional:** Negative for fatigue, fever and unexpected weight change.

**Progress Notes by Vadlamudi, Phani Deepthi, MD at 12/7/2022 4:00 PM (continued)**

HENT: Negative.  
Eyes: Negative for blurred vision.  
Respiratory: Negative. Negative for cough and wheezing.  
Cardiovascular: Negative for chest pain and palpitations.  
Gastrointestinal: Negative.  
Breast: Negative.  
Genitourinary: Negative. Negative for bladder incontinence and dysuria.  
Musculoskeletal: Negative.  
Skin: Negative for rash and skin lesions.  
Neurological: Negative.  
Psychiatric/Behavioral: Negative.<sup>[PV.3]</sup>

## Progress Notes by Vadlamudi, Phani Deepthi, MD at 12/7/2022 4:00 PM (continued)

- Not on file

## Social Determinants of Health

## Financial Resource Strain: Low Risk

- In the past 12 months, have you experienced difficulty paying for basic needs like housing, utilities, food, transportation, or clothing?: No
- Are there any financial concerns that limit you from seeing the doctor?: No

## Food Insecurity: Low Risk

- Within the past 12 months, did you run out of food to eat or have concerns that you would not have enough food available to eat?: No

## Transportation Needs: Low Risk

- In the past 12 months, has lack of transportation kept you from medical appointments or from getting medications?: No
- In the past 12 months, has lack of transportation kept you from meetings, work, or getting things needed for daily living?: No

## Physical Activity: Low Risk

- Do you exercise?: Yes
- How many days do you exercise per week?: 5
- How intense is your typical exercise?: Moderate

## Stress: Low Risk

- How well do you handle stress in your life?: I am usually able to cope effectively

## Social Connections: Low Risk

- How often do you feel that you lack companionship?: Never
- How often do you feel left out?: Never
- How often do you feel isolated from others?: Never

## Outpatient Encounter Medications as of 12/7/2022

Medication	Sig	Dispense	Refill
• albuterol sulfate (ProAir RespiClick) 90 mcg/actuation aerosol powdr breath activated	Inhale 2 puffs every 6 (six) hours as needed for wheezing.	3 each	3
• cetirizine (ZyrTEC) 10 mg tablet	Take 1 tablet by mouth daily as needed.		
• cyclobenzaprine (FLEXERIL) 5 mg tablet	Take 1 tablet (5 mg total) by mouth nightly as needed for muscle spasms.	30 tablet	0
• dicyclomine (Bentyl) 10 mg capsule	Take 1-2 capsules (10-20 mg total) by mouth every 6 (six) hours as needed (abdominal pain and cramping) for up to 30 doses.	30 capsule	0
• dulaglutide (Trulicity) 1.5 mg/0.5 mL	Inject 0.5 mL (1.5 mg 6 mL		3

## Progress Notes by Vadlamudi, Phani Deepthi, MD at 12/7/2022 4:00 PM (continued)

mL pen injector	total) under the skin every 7 days.	
• EpiNEPHRINE (EPIPEN) 0.3 mg/0.3 mL injection syringe	Inject 0.3 mL (0.3 mg 2 Syringe 0 total) into the shoulder, thigh, or buttocks once as needed for anaphylaxis for up to 1 dose.	
• fluticasone (FLONASE) 50 mcg/actuation nasal spray	Administer 1 spray into each nostril 2 (two) times a day.	
• fluticasone propion-salmeterol (advAIR HFA) 115-21 mcg/actuation inhaler	Inhale 2 puffs 2 (two) 36 g 1 times a day.	
• montelukast (SINGULAIR) 10 mg tablet	Take 1 tablet (10 mg 90 tablet 1 total) by mouth once daily.	
• multivitamin (THERAGRAN) tablet	Take 1 tablet by mouth daily.	
• rosuvastatin (CRESTOR) 20 mg tablet	Take 1 tablet (20 mg 90 tablet 1 total) by mouth once daily.	
• [DISCONTINUED] FreeStyle Libre 14 Day Sensor kit	SMARTSIG:Topical	
• FreeStyle Libre 14 Day Sensor kit	Inject 1 kit under the skin every 14 (fourteen) days.	0
• [DISCONTINUED] hydrOXYzine (Atarax) 25 mg tablet	Take 1-2 PO Q 6 hours PRN itching	0
• [DISCONTINUED] tamsulosin (Flomax) 0.4 mg 24 hr capsule	Take 1 capsule (0.4 mg total) by mouth daily.	0

No facility-administered encounter medications on file as of 12/7/2022.

**Objective****Physical Exam****Constitutional**

General appearance: No acute distress.

**Eyes**

Conjunctiva and lids: Normal.

Pupils, Irises and Sclerae: PERRL, EOM's intact, sclerae normal.

**Ears, Nose, Mouth, and Throat**

External inspection of ears and nose: No lesions.

Nasal mucosa, septum, and turbinates: No lesions or discharge.

Otoscopic examination: Canals clear, TM's normal.

Oropharynx: Pink and moist, without erythema or exudate. No tonsil enlargement.

**Neck**

Examination of the neck: Supple, no masses.

Examination of thyroid: Normal size, without nodules or tenderness.

**Pulmonary**

Respiratory effort: Normal.

Auscultation of lungs: Clear without wheezes, rhonchi or rales.

**Cardiovascular**

Auscultation of heart: RRR without murmur, gallop or rub, nl S1 S2.

Extremities: No edema or varicosities noted.

**Abdomen**

Abdomen: non-distended, non-tender, without masses.

Liver and spleen: No HSM.

**Breast****Genitourinary**

Deferred

**Lymphatic**

Palpation of lymph nodes in neck: Normal.

Palpation of lymph nodes in axillae: Normal.

**Musculoskeletal**

Gait and station: Normal.

Digits and nails: No clubbing, or cyanosis.

Inspection/palpation of joints, and bones: Normal.

**Skin**

Skin and subcutaneous tissue: No rashes or suspicious lesions.

Palpation of skin and subcutaneous tissue: Warm and dry.

**Psychiatric**

Orientation to person, place, and time: Normal.

**Chief Complaint**

Patient presents with

- Follow-up
- DM,<sup>[PV.2]</sup>

**HPI:**

HPI<sup>[PV.1]</sup>

Patient is a 59-year-old female with history significant for type 2 diabetes, hyperlipidemia, acid reflux disease, asthma, history of COVID-19, s/p bariatric surgery status here for recheck and follow-up.

1. Type 2 diabetes she wears a libre monitor when her average glucose 90 days is 206 and 30 days is 207 fasting numbers seems to be okay within normal range per 12 PM to bedtime numbers are in the high year 200s. No hypoglycemic events and about 50% of the time she is in the green zone and 50% she is in the

**Progress Notes by Vadlamudi, Phani Deepthi, MD at 6/8/2023 3:00 PM (continued)**

higher zone. Her last A1c done via Quest labs is from March 13, 2023 at 9.3. She is currently taking Trulicity at 3 mg weekly unable to tolerate metformin due to GI side effects.

2. hyperlipidemia she is taking Crestor for high cholesterol and not on any blood pressure medications.

3. Asthma stable on current inhalers.

4. Post COVID symptoms she did have COVID-19 infection twice in the last 1 year. Reports the buzzing sensation that she was complaining of is still there randomly happens. A lot of stress at work as well.<sup>[PV.2]</sup>

deficiency anemia type

CBC and differential  
Hemoglobin A1c  
Basic Metabolic Panel, Non-fasting  
Ferritin

1. Type 2 diabetes uncontrolled with A1c of 9.3 not due for another A1c yet. Will increase Trulicity to max of 4.5 also added Jardiance. Proper use discussed with patient including risks of yeast infections and UTIs with the new pill. Urine microalbumin was slightly elevated at that time patient also had urinary tract infection. Okay to try losartan low-dose. Reports she was on lisinopril in the past that gave her cough.
2. Continue Crestor.
3. Continue current inhalers for asthma.
4. Do labs a week before your next appointment.<sup>[PV.2]</sup>

C counseled Patient/Family: Diagnosis, Prescribed meds and Lab/Diagnostic tests

Discussed with: Patient

**Subjective**

Patient: Terresa L Slocum is a 60 y.o. female.

**Chief Complaint:****Chief Complaint**

Patient presents with:

- Follow-up  
DM

**Assessment/Plan**

1. Numbness and tingling of left side of face MRI brain with and without contrast
2. Type 2 diabetes mellitus without complication, without long-term current use of insulin (CMS/HCC)
3. Other hyperlipidemia
4. Bariatric surgery status

Labs from 8/15/23 reviewed lipids normal now, normal ferritin, BMP, CRP d/w pt A1c >7 but based on CGM numbers no med changes  
Can do MRI brain r/o other pathology for her numbness sx

**HPI:****HPI**

Patient is a 60-year-old female with history significant for type 2 diabetes, hyperlipidemia, acid reflux disease, asthma, history of COVID-19, s/p bariatric surgery status here for recheck and follow-up.

1. Type 2 diabetes she wears a libre monitor when her average glucose 90 days is 149 and 30 days is 138, 14 DAY IS 124 AND LAST 7 DAYS AVG IS ONLY 114 on new work program PIMO and on Vegan diet completely. She is currently taking Trulicity at 4.5 mg weekly and jardiance unable to tolerate metformin due to GI side effects.
2. hyperlipidemia she is taking Crestor for high cholesterol and not on any blood pressure medications.
3. Asthma stable on current inhalers.
4. Reports the buzzing sensation that she was complaining of is still there randomly happens. Left side of face tingling and numbness as well

**Review of Systems**

Constitutional: Negative for chills, fatigue, fever and unexpected weight change.

**Subjective**

Patient: [PV.1] Terresa L Slocum [PV.2] is a [PV.1] 60 y.o. female [PV.2].

**Chief Complaint:** [PV.1]

**Chief Complaint**

Patient presents with:

- Annual Exam
- Gynecologic Exam [PV.2]

**HPI:**

G3P2 [PV.1], used to see GYN for PPB before [PV.3]

Menopause at age 52 [PV.1]

Pt seen neurology and was told follow up PRN, pt would like a referral for second opinion on her abnormal MRI brain [PV.3]

**MM HM, Adult Female:** The patient is being seen for a health maintenance and gynecology evaluation. The last health maintenance visit was [PV.1] 2022 [PV.3].

**General Health:** The patients health since the last visit is described as fair. She has irregular dental visits.

She admits to vision problems. Vision care includes [PV.1] eye checks [PV.3]. She [PV.1] denies [PV.3] hearing loss.

**Life Style:** She has [PV.1] normal [PV.3] diet. She has weight concerns. She exercises by walking

**Reproductive Health:** The patient is postmenopausal. She [PV.1] is [PV.3] sexual active. She [PV.1] is [PV.3] monogamous with a male. Pregnancy history: [PV.1] G3P2 [PV.3].

**Screening:** Cervical cancer screening includes: [PV.1] pap due [PV.3]. Breast cancer screening includes: [PV.1] mamm [PV.3]. Colorectal cancer screening includes: [PV.1] crc [PV.3]. Metabolic screening includes: [PV.1] labs [PV.3].

**Additional History:** [PV.1] in PT for rt shoulder. Rt knee MRI 5/2024 showed ACL strain and tear of medial meniscus, seeing ortho [PV.3]

**Review of Systems**

**Constitutional:** Negative for [PV.1] fatigue [PV.3], [PV.1] fever [PV.3] and [PV.1] unexpected weight change [PV.3], HENT: [PV.1] Negative [PV.3].

**Eyes:** Negative for [PV.1] blurred vision [PV.3].

**Respiratory:** [PV.1] Negative [PV.3]. Negative for [PV.1] cough [PV.3] and [PV.1] wheezing [PV.3].

**Cardiovascular:** Negative for [PV.1] chest pain [PV.3] and [PV.1] palpitations [PV.3].

**Gastrointestinal:** [PV.1] Negative [PV.3].

**Breast:** [PV.1] Negative [PV.3].

**Genitourinary:** Negative for [PV.1] bladder incontinence [PV.3], [PV.1] dysuria [PV.3] and [PV.1] postmenopausal bleeding [PV.3].

**Musculoskeletal:** Positive for [PV.1] extremity pain [PV.3].

**Skin:** Negative for [PV.1] rash [PV.3] and [PV.1] skin lesions [PV.3].

**Neurological:** Positive for [PV.1] numbness [PV.3].

**Psychiatric/Behavioral:** [PV.1] Negative [PV.3], [PV.1]

## Objective

### Physical Exam

#### Constitutional

General appearance: No acute distress.

#### Eyes

Conjunctiva and lids: Normal.

Pupils, Irises and Sclerae: PERRL, EOM's intact, sclerae normal.

#### Ears, Nose, Mouth, and Throat

External inspection of ears and nose: No lesions.

Nasal mucosa, septum, and turbinates: No lesions or discharge.

Otoscopic examination: Canals clear, TM's normal.

Oropharynx: Pink and moist, without erythema or exudate. No tonsil enlargement.

#### Neck

Examination of the neck: Supple, no masses.

Examination of thyroid: Normal size, without nodules or tenderness.

#### Pulmonary

Respiratory effort: Normal.

Auscultation of lungs: Clear without wheezes, rhonchi or rales.

#### Cardiovascular

Auscultation of heart: RRR without murmur, gallop or rub, nl S1 S2.

Extremities: No edema or varicosities noted.

#### Abdomen

Abdomen: non-distended, non-tender, without masses.

Liver and spleen: No HSM.

Office nurse served as the chaperone for the exam.

#### Breast

Breasts: Symmetrical, no nipple discharge, skin retraction or dimpling.

Palpation of breasts and axillae: No masses or tenderness.

#### Genitourinary

External genitalia and vagina: No lesions or discharge.

Does monthly breast self examination

PAP is due done today, CBE done, SBE taught

Health Maintenance reviewed - glycohemoglobin ordered.<sup>[PV.3]</sup>

**Health Maintenance**

Topic	Date Due
• HIV Screening	Never done
• Pap Smear	08/17/2023
• COVID-19 Vaccine (7 - 2023-24 season)	02/18/2024
• Influenza Vaccine (1)	09/01/2024
• Mammogram	01/10/2025
• Hemoglobin A1C	04/19/2025
• Colorectal Cancer Screening	04/28/2025
• Diabetic Foot Exam	05/15/2025
• Domestic Violence	07/18/2025
• Diabetic Eye Exam	08/29/2025
• Zoster Vaccine	Completed
• Hepatitis C Screening	Completed
• Depression Screening & Follow-up	Completed <sup>[PV.2]</sup>

Immunization status: up to date and documented.

The patient is advised to continue current medications, continue current healthy lifestyle patterns, and return for routine annual checkups.<sup>[PV.3]</sup>

Follow Up:<sup>[PV.1]</sup> 3 months<sup>[PV.3]</sup>

If your provider ordered testing, most test results are available within 14 days after your visit. Your results will be communicated to you by the provider who ordered your test. If you haven't received your results within that timeframe, please contact the provider who ordered your test.<sup>[PV.1]</sup>

Phani D Vadlamudi, MD<sup>[PV.2]</sup>

Order status: Completed

Resulting lab: SUNQUEST

#### Specimen Information

ID	Type	Source	Collected By
T70710	Nasal	—	03/14/17 1118

#### Components

Component	Value	Reference Range	Flag	Lab
Influenza A Ag	NEGATIVE	NEG^NEGATIV	—	Sunquest
		E		

#### Comment:

A negative result does not rule out Influenza A infection. Sensitivity for novel H1N1 is 10-60 % and 75-95 % for seasonal A serotypes. PCR testing for H1N1 is required for definitive negative results.

Influenza B Ag	NEGATIVE	NEG^NEGATIV	—	Sunquest
		E		

#### Testing Performed By

Lab - Abbreviation	Name	Director	Address	Valid Date Range
12 - Sunquest	SUNQUEST	Unknown	Unknown	06/29/16 1450 - 06/24/20 1454

Comment:

The Instrument enumerates NRBC's separately from the WBC's. Therefore the need to differentiate manually is not necessary.

Comment:

The Instrument enumerates NRBC's separately from the WBC's. Therefore the need to differentiate manually is not necessary.

Basic Metabolic Panel, Fasting [152360266]

Status: Completed

Ordering user: Bohy, Brianne 08/14/23 1419  
 Authorized by: Vadlamudi, Phani Deepthi, MD

Ordering provider: Vadlamudi, Phani Deepthi, MD  
 Ordering mode: Written & Signed Paper Order: no cosign required

Frequency: Once 08/15/23 0743 - 1 occurrence

Diagnoses

Type 2 diabetes mellitus without complication, unspecified whether long term insulin use (CMS/HCC) [E11.9]

Bariatric surgery status [Z98.84]

Familial hyperlipidemia [E78.49]

Iron deficiency anemia, unspecified iron deficiency anemia type [D50.9]

Scheduling instructions

Outpatient instructions:

Do not eat or drink anything for 10 to 12 hours. Water may be taken as desired, but this is the only exception. No coffee, gum, candy, or any lozenges of any kind. It is desirable to start the fast in the evening and report to the laboratory the

#### CYTOLGY GYNECOLOGICAL(G) REPORT

Patient Name: SLOCUM, TERRESA L. Accession #: G24-5429 Med. Rec. #: 1000134674  
Client: MyMichigan Health Taken: 7/18/2024 DOB: 8/28/1963 (Age: 60) Location:  
HAMO FAMILY MED Received: 7/19/2024 Gender: F Service: Reported: 7/22/2024  
Physician(s): PHANI DEEPTHI VADLAM  
Billing #: 100469680\1000134674\5\113\1 Copy To:

Final Cytologic Diagnosis

CERVICAL/ENDOCERVICAL (THIN PREP):

Satisfactory for evaluation, a transformation zone component is present.

Negative for Intraepithelial Lesion or Malignancy.

Atrophic cellular changes present.

This specimen was screened by the ThinPrep Imaging System along with additional manual review by a Cytotechnologist.

Comment

The pap smear is a cancer screening test with an inherent false-negative rate which can be reduced by following a regular screening schedule.

Performed: 03/06/18 1518 - 03/06/18 1533

Accession number: 20180074197

Resulting lab: CONVERSION RADIOLOGY SYSTEM

**Narrative:**

**CLINICAL INDICATIONS:** Screening. CAD was utilized in evaluation of this mammogram.

**COMPARISONS:** 2014 through 2017

**FINDINGS:**

Overall breast density: Scattered fibroglandular density.

Benign calcifications are present bilaterally.

No malignant masses or calcifications are identified. No skin, nipple or vascular abnormalities noted.

**Impression:**

Stable benign mammograms.

**BI-RADS Category 2. Benign findings.**

**OVERALL ASSESSMENT:** Benign

**RECOMMENDATION:** Bilateral Routine Screening Mammogram In 1 Yr

#### Resulting lab: CONVERSION RADIOLOGY SYSTEM

## Reading Narrative

**CLINICAL INDICATIONS:** Chronic right knee pain.

**COMPARISON:** No prior exams are available for comparison.

#### TECHNIQUE: 4 views of the right knee

## FINDINGS:

Joint spaces appear maintained. There is no acute fracture or dislocation. There is no knee joint effusion. Soft tissues are unremarkable.

### Impression:

Unremarkable right knee.

PHANI VADLAMUDI MD

Re: Terresa Slocum - DOB: 08/28/1963 - Appt. Date: 09/23/2019

Dear PHANI VADLAMUDI MD,

Your patient, Terresa Slocum, completed a breast cancer risk assessment questionnaire that collected family history and risk factors during her mammogram visit at MidMichigan Health.

The information your patient provided shows that her risk of developing breast cancer is not increased over the general population.

Your patient has an AVERAGE LIFETIME RISK (less than 15%) by an accepted model:

BRCA1: 8.5%  
Tyer-Cuzick v7: 13.6%  
Tyer-Cuzick: 9.4%

Her personalized recommendations for breast cancer screening are as follows:

Continue annual screening mammography with 3D (breast tomosynthesis) if possible.

The breast cancer risk assessment is limited by the data accuracy entered by the patient.

Our goal is to empower, educate, care for and support patients by providing them the most current and relevant information available. Thank you for letting us participate in the care of your patient. Feel free to contact the *MidMichigan Health High Risk Breast Clinic* at (989) 837-9071 if you have any further questions.

Sincerely,

MidMichigan Health  
Breast Health Program

Resulted by: Zeeb, Lindsay, MD

Filed by: Interface, Radiology Results In 12/27/22 0904

Performed: 12/27/22 0808 - 12/27/22 0822

Accession number: 20220572153

Resulting lab: CONVERSION RADIOLOGY SYSTEM

Narrative:

CLINICAL INDICATIONS: Screening mammogram

COMPARISON: 11/5/2021 and before.

**FINDINGS:**

CAD technology was used in interpretation of this exam. Both standard and tomosynthesis images were acquired through each breast.

Overall breast density: Scattered fibroglandular density

There is no mammographic evidence of malignancy.

**Impression:**

BI-RADS Category 1. Negative. Recommend annual screening mammography per the NCCN guidelines.

**OVERALL ASSESSMENT:** Negative

**RECOMMENDATION:** Bilateral Routine Screening Mammogram in 1 Yr

This report was created using voice recognition software and/or free text entry. I have reviewed this report but may have inadvertently missed correcting erroneous or unusual sound-a-like words. If errors occur, please call Transcription Services at 989-839-3464 or fax the report to 989-839-3035.

Authorized by: Vadlamudi, Phani Deepthi, MD

Ordering mode: Verbal with readback

Frequency: Once 10/05/23 0640 - 1 occurrence

Indications comment: left sided facial numbness, hx of TIA, r/o stroke

**Diagnoses**

Numbness and tingling of left side of face [R20.0, R20.2]

**Questionnaire**

Question	Answer
Record Decision Support information?	Yes
Decision Support Session ID	363261555
Decision Support Score	Not Validated
Decision Support Vendor	Change Healthcare CareSelect (G1004)
Decision Support Adherence	No Criteria Available (MG)
Current weight?	138
Does the patient have a Magnetically-Activated Implant or Device (stents, pacemaker, etc.)?	No
Has the patient ever sought medical treatment to have metal removed from the eyes by a physician or hospital?	No
Any surgery ever performed on body part being scanned?	No

**Scheduling instructions**

Please arrive 15 minutes (Alpena patients arrive 30 minutes) prior to appointment to allow for Registration, bring ID, Insurance Card and Order (If Non-Epic Provider)

If you have any implants or metal objects, please contact your physician to make sure it is okay to proceed.

Narrative:

EXAMINATION: MRI Brain without Contrast

EXAM DATE: 10/5/2023 7:06 AM

MRI: MyMichigan Medical  
Center Clare  
703 N. McEwan Street  
Clare MI 48617-1440  
Orders/Results

Slocum, Teresa L  
MRN: 1000134674, DOB: 8/28/1963, Legal Sex: F  
Acct #: 3002689516  
Adm: 10/5/2023, D/C: 10/5/2023

TECHNIQUE: Routine Protocol MR images of the brain were obtained without intravenous contrast.

INDICATION: Left sided facial numbness, hx of TIA, r/o stroke, Anesthesia of skin, Paresthesia of skin  
COMPARISON: CT brain from 12/22/2016.

HAND DOMINANCE: Unknown

ENCOUNTER: Not applicable

**FINDINGS:**

Infarct/Vascular: No evidence of acute infarct.

Brain parenchyma: Numerous foci of T2/FLAIR hyperintensity in the supratentorial periventricular and subcortical white matter are nonspecific. Broad differential considerations include vascular, demyelinating, and inflammatory etiologies.

Intracranial hemorrhage: No evidence of intracranial hemorrhage.

Intracranial Mass: No evidence of intracranial mass.

CSF Spaces: The ventricles and sulci are normal in size.

Calvarium and Scalp: Unremarkable.

Paranasal Sinuses and Orbita: Mild mucosal thickening in the right maxillary sinus with small air-fluid level, correlate for acute sinusitis. Orbita are unremarkable.

**Impression:**

1. No evidence of acute infarct.
2. Moderate supratentorial white matter changes which are nonspecific, broad differential considerations include vascular, demyelinating, and inflammatory etiologies.
3. Small air-fluid level right maxillary sinus, correlate for acute sinusitis.

#### Questionnaire

Question	Answer
Is the patient pregnant at the time of this order?	Patient Denies

Order comments: Please arrive 15 minutes prior to appointment. 24 Hours prior to the exam, DO NOT TAKE CALCIUM or MULTI-VITAMIN and MINERAL SUPPLEMENTS due to it may be visible in the stomach during the exam and obstruct the spine. Take your other medications as you normally would. Eat a normal diet on the day of your test. Wear comfortable clothing that does not have any metal zippers, buttons, buckles, or decorations. You may be asked to change into a gown. BMD No Oral /Enema Contrast 1 Week Prior If the patient is going to have gastrointestinal contrast administered oral or by enema such as a barium enema x-ray/CT, upper GI/esophagram, small bowel follow through, CT scan, or any other procedure with contrast to drink please schedule the bone density test FIRST. Otherwise, the patient will have to wait at least 7 days afterwards for the bone density test to be done. Patients post myelogram should wait 2 days prior to BMD.

Resulted: 02/02/24 1204, Result status: Final result

#### Dexa bone density [183791031]

Ordering provider: Vadlamudi, Phani Deepthi, MD 02/01/24 1411	Order status: Completed

Orders/Results

Slocum, Terresa L  
MRN: 1000134674, DOB: 8/28/1963, Legal Sex: F  
Acct #: 3002947099  
Adm: 2/1/2024, D/C: 2/1/2024

---

EXAMINATION: DEXA BONE DENSITY  
EXAM DATE: 2/1/2024 2:57 PM

TECHNIQUE: Dual-Energy X-ray Absorptiometry (DXA) scanning was performed at MidMichigan Medical Center on a Hologic Horizon W scanner. At this facility, the least significant change in BMD with 95% confidence is 0.022 g/cm<sup>2</sup> at the lumbar spine and 0.027 g/cm<sup>2</sup> at the femoral neck.

INDICATION: Asymptomatic menopausal state, Encounter for screening for osteoporosis.  
COMPARISON: None

ENCOUNTER: Not applicable.

---

#### FINDINGS:

##### Lumbar Spine

The BMD measured in the L1-L4 region is 0.768 g/cm<sup>2</sup>.  
The T score of the lumbar spine is -2.5.  
The Z score of the lumbar spine is -1.1.

##### Left Femoral Neck

The BMD measured at the left femoral neck is 0.728 g/cm<sup>2</sup>.  
The T score of the left femoral neck is -1.1.  
Z score of the left femoral neck is 0.2.

##### Left Total Hip

The BMD measured at the total hip is 0.929 g/cm<sup>2</sup>.  
The T score of the total hip is -0.1.  
Z score of the total hip is 0.9.

WHO classification: The T-score compares the patient's BMD to the average BMD of a young adult. The criteria below are from the World Health Organization:

Normal: T-score -1.0 or above

Osteopenia/low bone mass: T-score -1.1 to < -2.5

Osteoporosis: T-score -2.5 or lower

Severe or established osteoporosis: T-score -2.5 or lower plus fragility fracture

FRAX not reported because:

Some T-scores for Spine Total, Hip Total, Femoral Neck at or below -2.5.

---

#### Impression:

1. By the WHO classification, the bone mineral density of the lumbar spine is osteoporotic.
2. By the WHO classification, the bone mineral density of the left femoral neck is osteopenic.
